

## Subject Index of Volume 80

- Aluminium anode reserve cells  
Semi-fuel cells; Catalysis (Bessette, R.R. (80) 248)
- Aluminium anodes  
Aluminium/hydrogen peroxide batteries; Applications/underwater vehicles; Semi-fuel cells (Hasvold, Ø. (80) 254)
- Aluminium/hydrogen peroxide batteries  
Aluminium anodes; Applications/underwater vehicles; Semi-fuel cells (Hasvold, Ø. (80) 254)
- Applications/aircraft  
Applications/electric vehicles; Lead-acid batteries; Electrolytes/aqueous/additives (Kozawa, A. (80) 12)
- Applications/electric vehicles; Lithium-ion secondary batteries (Saft, M. (80) 180)
- Nickel/metal hydride rechargeable batteries (Erbacher, J.K. (80) 265)
- Applications/electric vehicles  
Lead-acid batteries, valve regulated; Charging techniques (Moseley, P.T. (80) 1)
- Lead/acid batteries; Lead battery plates (Battlebury, D.R. (80) 7)
- Applications/aircraft; Lead-acid batteries; Electrolytes/aqueous/additives (Kozawa, A. (80) 12)
- Supercapacitors (Bonnefoi, L. (80) 149)
- Nickel/metal hydride batteries (Gifford, P. (80) 157)
- Sodium/metal chloride batteries; ZEBRA (Galloway, R.C. (80) 164)
- Zinc/air batteries (Goldstein, J. (80) 171)
- Applications/aircraft; Lithium-ion secondary batteries (Saft, M. (80) 180)
- Fuel cells/alkaline electrolyte; Zinc anode rechargeable cells; RAM cells (Kordesch, K. (80) 190)
- Photovoltaics (Shacklock, A. (80) 199)
- Fuel cells/alkaline electrolyte (De Geeter, E. (80) 207)
- Lead-acid batteries; Sodium/metal chloride batteries (Van den Bosche, P. (80) 213)
- Electricity distribution networks (Webster, R. (80) 217)
- Applications/submarines; Sodium/metal chloride batteries (Kluiters, E.C. (80) 261)
- Applications/electronic equipment  
Nickel/metal hydride rechargeable batteries; Lithium-ion rechargeable batteries; Lithiated transition metal oxides (Ilic, D. (80) 112)
- Lithium primary batteries; Reliability (Chan, M.-L. (80) 273)
- Applications/medical  
Lithium/manganese dioxide batteries; Lithium/iodine batteries (Drews, J. (80) 107)
- Applications/military portable equipment  
Lithium-ion secondary batteries Charge control; Safety devices (Juzkow, M. (80) 286)
- Applications/stationary energy storage  
Life cycle assessment; Lead-acid secondary batteries; Vanadium redox batteries (Rydh, C.J. (80) 21)
- Applications/submarines  
Applications/electric vehicles; Sodium/metal chloride batteries (Kluiters, E.C. (80) 261)
- Applications/underwater vehicle  
Semi-fuel cells; Sea-water batteries; Magnesium anode reserve batteries (Medeiros, M.G. (80) 78)
- Applications/underwater vehicles  
Aluminium/hydrogen peroxide batteries; Aluminium anodes; Semi-fuel cells (Hasvold, Ø. (80) 254)
- Battery separators  
Capillary flow porometry; Pore structure (Jena, A.K. (80) 46)
- Capillary flow porometry  
Pore structure; Battery separators (Jena, A.K. (80) 46)
- Catalysis  
Aluminium anode reserve cells; Semi-fuel cells (Bessette, R.R. (80) 248)
- Charging techniques  
Lead-acid batteries, valve regulated; Applications/electric vehicles (Moseley, P.T. (80) 1)
- Lead-acid batteries; Maintenance free; Mathematical modelling (Catherino, H.A. (80) 17)
- Constructional techniques  
Lithium-ion secondary batteries; Lithium cobalt oxide (Ritchie, A.G. (80) 128)
- Diffusion coefficients  
Lithium rechargeable batteries; Vanadium oxides; Structural and morphological characteristics: electrode reactions/non-aqueous (Shembel, E. (80) 90)
- Electricity distribution networks  
Applications/electric vehicles (Webster, R. (80) 217)
- Electrode reactions  
Metal hydrides; Nickel/metal hydride batteries (Han, J. (80) 39)
- Electrolytes  
Lithium-ion secondary batteries; Lithium manganese oxides; Non-aqueous (Kalyani, P. (80) 103)
- Electrolytes/aqueous/additives  
Applications/aircraft; Applications/electric vehicles; Lead-acid batteries (Kozawa, A. (80) 12)
- Electrolytes/solid inorganic  
Li-ion solid-state batteries; Manufacturing processes (Jak, M.J.G. (80) 83)
- Energy density  
Silver-zinc battery; Specific energy (Karpinski, A.P. (80) 53)
- Fuel cells  
Polymer electrolyte membrane (Chu, D. (80) 226)
- Polymer electrolyte membrane (Hentall, P.L. (80) 235)
- Fuel cells/alkaline electrolyte  
Zinc anode rechargeable cells; RAM cells; Applications/electric vehicles (Kordesch, K. (80) 190)
- Applications/electric vehicles (De Geeter, E. (80) 207)

- Fuel cells/polymer electrolyte membrane  
Hybrid power sources (Jones, P.B. (80) 242)
- Fuzzy logic methodology  
State-of-charge monitors; Impedance spectroscopy; Lithium primary batteries/sulfur dioxide; Nickel/metal hydride rechargeable batteries; Mathematical modeling (Salkind, A.J. (80) 293)
- Hardware simulation  
Supercapacitors; Porous electrodes (Pell, W.G. (80) 134)
- Hybrid power sources  
Fuel cells/polymer electrolyte membrane (Jones, P.B. (80) 242)
- Hybrid power supplies  
Photovoltaics; Lead-acid batteries; Mathematical modelling (Urbina, A. (80) 30)
- Impedance spectroscopy  
State-of-charge monitors; Lithium primary batteries/sulfur dioxide; Nickel/metal hydride rechargeable batteries; Mathematical modeling; Fuzzy logic methodology (Salkind, A.J. (80) 293)
- Lead/acid batteries  
Applications/electric vehicles; Lead battery plates (Battlebury, D.R. (80) 7)
- Lead-acid batteries  
Applications/aircraft; Applications/electric vehicles; Electrolytes/aqueous/additives (Kozawa, A. (80) 12)
- Lead-acid batteries  
Maintenance free; Mathematical modelling; Charging techniques (Catherino, H.A. (80) 17)
- Lead-acid batteries  
Photovoltaics; Mathematical modelling; Hybrid power supplies (Urbina, A. (80) 30)  
Applications/electric vehicles; Sodium/metal chloride batteries (Van den Bossche, P. (80) 213)
- Lead-acid batteries, valve regulated  
Applications/electric vehicles; Charging techniques (Moseley, P.T. (80) 1)
- Lead-acid secondary batteries  
Life cycle assessment; Vanadium redox batteries; Applications/stationary energy storage (Rydh, C.J. (80) 21)
- Lead battery plates  
Applications/electric vehicles; Lead/acid batteries (Battlebury, D.R. (80) 7)
- Life cycle assessment  
Lead-acid secondary batteries; Vanadium redox batteries; Applications/stationary energy storage (Rydh, C.J. (80) 21)
- Li-ion solid-state batteries  
Electrolytes/solid inorganic; Manufacturing processes (Jak, M.J.G. (80) 83)
- Lithiated transition metal oxides  
Applications/electronic equipment; Nickel/metal hydride rechargeable batteries; Lithium-ion rechargeable batteries (Ilic, D. (80) 112)  
Lithium-ion solid polymer electrolyte batteries (Xue, J.S. (80) 119)
- Lithium batteries  
Specifications; Safety (Farrington, M.D. (80) 278)
- Lithium cobalt oxide  
Lithium-ion secondary batteries; Constructional techniques (Ritchie, A.G. (80) 128)
- Lithium/iodine batteries  
Applications/medical; Lithium/manganese dioxide batteries (Drews, J. (80) 107)
- Lithium-ion rechargeable batteries  
Lithium transition metal oxides (Ritchie, A.G. (80) 98)  
Applications/electronic equipment; Nickel/metal hydride rechargeable batteries; Lithiated transition metal oxides (Ilic, D. (80) 112)
- Lithium-ion rechargeable cells  
(Nagasubramanian, G. (80) 116)
- Lithium-ion secondary batteries  
Lithium manganese oxides; Electrolytes; Non-aqueous (Kalyani, P. (80) 103)  
Lithium cobalt oxide; Constructional techniques (Ritchie, A.G. (80) 128)  
Applications/aircraft; Applications/electric vehicles (Saft, M. (80) 180)
- Lithium-ion secondary batteries Charge control  
Applications/military portable equipment; Safety devices (Juzkow, M. (80) 286)
- Lithium-ion solid polymer electrolyte batteries  
Lithiated transition metal oxides (Xue, J.S. (80) 119)
- Lithium/manganese dioxide batteries  
Applications/medical; Lithium/iodine batteries (Drews, J. (80) 107)
- Lithium manganese oxides  
Lithium-ion secondary batteries; Electrolytes; Non-aqueous (Kalyani, P. (80) 103)
- Lithium primary batteries  
Applications/electronic equipment; Reliability (Chan, M.-L. (80) 273)
- Lithium primary batteries/sulfur dioxide  
State-of-charge monitors; Impedance spectroscopy; Nickel/metal hydride rechargeable batteries; Mathematical modeling; Fuzzy logic methodology (Salkind, A.J. (80) 293)
- Lithium rechargeable batteries  
Vanadium oxides; Structural and morphological characteristics: electrode reactions/non-aqueous; Diffusion coefficients (Shembel, E. (80) 90)
- Lithium transition metal oxides  
Lithium-ion rechargeable batteries (Ritchie, A.G. (80) 98)
- Magnesium anode reserve batteries  
Semi-fuel cells; Sea-water batteries; Applications/underwater vehicle (Medeiros, M.G. (80) 78)
- Maintenance free  
Lead-acid batteries; Mathematical modelling; Charging techniques (Catherino, H.A. (80) 17)
- Manufacturing processes  
Li-ion solid-state batteries; Electrolytes/solid inorganic (Jak, M.J.G. (80) 83)
- Mathematical modeling  
State-of-charge monitors; Impedance spectroscopy; Lithium primary batteries/sulfur dioxide; Nickel/metal hydride rechargeable batteries; Fuzzy logic methodology (Salkind, A.J. (80) 293)  
Lead-acid batteries; Maintenance free; Charging techniques (Catherino, H.A. (80) 17)  
Photovoltaics; Lead-acid batteries; Hybrid power supplies (Urbina, A. (80) 30)
- Metal hydrides  
Nickel/metal hydride batteries; Electrode reactions (Han, J. (80) 39)
- Nickel/metal hydride batteries  
Metal hydrides; Electrode reactions (Han, J. (80) 39)  
Applications/electric vehicles (Gifford, P. (80) 157)
- Nickel/metal hydride rechargeable batteries  
Applications/electronic equipment; Lithium-ion rechargeable batteries; Lithiated transition metal oxides (Ilic, D. (80) 112)  
Applications/aircraft (Erbacher, J.K. (80) 265)  
State-of-charge monitors; Impedance spectroscopy; Lithium primary batteries/sulfur dioxide; Mathematical modeling; Fuzzy logic methodology (Salkind, A.J. (80) 293)
- Non-aqueous  
Lithium-ion secondary batteries; Lithium manganese oxides; Electrolytes (Kalyani, P. (80) 103)

- Photovoltaics  
 Lead-acid batteries; Mathematical modelling; Hybrid power supplies (Urbina, A. (80) 30)  
 Applications/electric vehicles (Shacklock, A. (80) 199)
- Polymer electrolyte membrane  
 Fuel cells (Chu, D. (80) 226)  
 Fuel cells (Hentall, P.L. (80) 235)
- Polythiophene  
 Supercapacitors (Laforgue, A. (80) 142)
- Pore structure  
 Capillary flow porometry; Battery separators (Jena, A.K. (80) 46)
- Porous electrodes  
 Supercapacitors; Hardware simulation (Pell, W.G. (80) 134)
- RAM cells  
 Fuel cells/alkaline electrolyte; Zinc anode rechargeable cells; Applications/electric vehicles (Kordesch, K. (80) 190)
- Reliability  
 Lithium primary batteries; Applications/electronic equipment (Chan, M.-L. (80) 273)
- Safety  
 Specifications; Lithium batteries (Farrington, M.D. (80) 278)
- Safety devices  
 Applications/military portable equipment; Lithium-ion secondary batteries Charge control (Juzkow, M. (80) 286)
- Sea-water batteries  
 Semi-fuel cells; Magnesium anode reserve batteries; Applications/underwater vehicle (Medeiros, M.G. (80) 78)
- Semi-fuel cells  
 Sea-water batteries; Magnesium anode reserve batteries; Applications/underwater vehicle (Medeiros, M.G. (80) 78)  
 Aluminium anode reserve cells; Catalysis (Bessette, R.R. (80) 248)  
 Aluminium/hydrogen peroxide batteries; Aluminium anodes; Applications/underwater vehicles (Hasvold, Ø. (80) 254)
- Separators/cellulosic  
 Zinc-silver oxide rechargeable batteries (Lewis, H.L. (80) 61)
- Silver oxides  
 Zinc electrodes; Zinc anode reserve batteries (Smith, D.F. (80) 66)
- Silver-zinc battery  
 Specific energy; Energy density (Karpinski, A.P. (80) 53)
- Sodium/metal chloride batteries  
 Applications/electric vehicles; ZEBRA (Galloway, R.C. (80) 164)  
 Applications/electric vehicles; Lead-acid batteries (Van den Bosche, P. (80) 213)  
 Applications/submarines; Applications/electric vehicles (Kluiters, E.C. (80) 261)
- Specifications  
 Lithium batteries; Safety (Farrington, M.D. (80) 278)
- Specific energy  
 Silver-zinc battery; Energy density (Karpinski, A.P. (80) 53)
- State-of-charge monitors  
 Impedance spectroscopy; Lithium primary batteries/sulfur dioxide; Nickel/metal hydride rechargeable batteries; Mathematical modelling; Fuzzy logic methodology (Salkind, A.J. (80) 293)
- Structural and morphological characteristics: electrode reactions/non-aqueous  
 Lithium rechargeable batteries; Vanadium oxides; Diffusion coefficients (Shembel, E. (80) 90)
- Supercapacitors  
 Porous electrodes; Hardware simulation (Pell, W.G. (80) 134)  
 Polythiophene (Laforgue, A. (80) 142)  
 Applications/electric vehicles (Bonnetfoi, L. (80) 149)
- Vanadium oxides  
 Lithium rechargeable batteries; Structural and morphological characteristics: electrode reactions/non-aqueous; Diffusion coefficients (Shembel, E. (80) 90)
- Vanadium redox batteries  
 Life cycle assessment; Lead-acid secondary batteries; Applications/stationary energy storage (Rydh, C.J. (80) 21)
- ZEBRA  
 Sodium/metal chloride batteries; Applications/electric vehicles (Galloway, R.C. (80) 164)
- Zinc/air batteries  
 Applications/electric vehicles (Goldstein, J. (80) 171)
- Zinc/alkaline primary batteries  
 Zinc gassing (Glaeser, W. (80) 72)
- Zinc anode rechargeable cells  
 Fuel cells/alkaline electrolyte; RAM cells; Applications/electric vehicles (Kordesch, K. (80) 190)
- Zinc anode reserve batteries  
 Silver oxides; Zinc electrodes (Smith, D.F. (80) 66)
- Zinc electrodes  
 Silver oxides; Zinc anode reserve batteries (Smith, D.F. (80) 66)
- Zinc gassing  
 Zinc/alkaline primary batteries (Glaeser, W. (80) 72)
- Zinc-silver oxide rechargeable batteries  
 Separators/cellulosic (Lewis, H.L. (80) 61)
