

Subject Index of Volumes 81–82

Ab initio

Gaussian; Lithium intercalation; Coronene; Tetraboroanthracene; Carbon anodes (Scanlon, L.G. (81) 176)

Ab initio calculation

Cathode materials; Lithium-ion batteries; Spectroscopy (Ebina, T. (81) 393)

Acetylacetonate

Lithium–nickel orthovanadate; Solution precipitation; Cathode materials; Nickel; Vanadium; Lithium batteries (Fey, G.T.-K. (81) 467)

Acid leaching

Positive electrode; Lithium nickelate; Chemical delithiation; Thermal decomposition mechanism (Arai, H. (81) 401)

Ac impedance

Polymer gel electrolyte; Polyacrylonitrile; Lithium polymer batteries; Metallic lithium anode; Surface analysis (Sotomura, T. (81) 192)

Rechargeable lithium battery; Lithium metal anode; Electrolyte temperature; Coulombic efficiency; Precycling (Ishikawa, M. (81) 217)

Lithium ion battery; Metal oxide cathodes; Organic electrolytes (Morita, M. (81) 425)

AC impedance

Polymer blend; Ionic conductivity (Stephan, A.M. (81) 752)

AC impedance spectroscopy

Lithium-ion; Batteries; Rechargeable; Mathematical model; Interfacial resistance (Fellner, J.P. (81) 867)

Activation energy

Lithium secondary batteries; Lithium nickel oxide; Reaction with CO₂ (Matsumoto, K. (81) 558)

Activation volume

Electrical conductivity; Nuclear magnetic resonance; Lithium electrolytes; High pressure (Stallworth, P.E. (81) 739)

Active carbon fiber

Surface treatment; Faradaic adsorption; Li-ion battery; Anode (Takasu, R. (81) 224)

Additives

Lithium intercalation; Graphite; Impurities; Cycling behavior; Irreversible charge loss (Joho, F. (81) 243)

Aerogel

Lithium batteries; Sol–gel; Xerogel; Vanadium pentoxide; Manganese dioxide (Owens, B.B. (81) 150)

Al

Nonaqueous electrolyte; Imide; LiCoO₂; FTIR (Kanamura, K. (81) 123)

Alloy

Li–Sn; Mixed-conductor matrix; Solid electrolyte matrix; Nucleation; Convertible metal oxides; Near-equilibrium; Composite microstructure (Huggins, R.A. (81) 13)

Battery; Lithium; Anode; Silicide; High capacity; Cycling (Weydanz, W.J. (81) 237)

All-solid-state lithium batteries

Lithium titanium phosphate; Spark-plasma-sintering; Ionic conductivity; Lithium cobalt oxide (Kobayashi, Y. (81) 853)

Aluminium

Lithium ion batteries; Cathodes; Cobalt (Huang, H. (81) 690)

Aluminium chloride

Room temperature molten salt; Lithium battery; Lithium cobalt oxide; 1-Methyl-3-ethyl-imidazolium chloride; C₆H₅SO₂Cl (Fung, Y.S. (81) 891)

Amorphous

Vanadate; Quenching; Lithium; Insertion (Kawakita, J. (81) 448)

Anode

Lithium-ion cell; Hard carbon; Structural analysis; Graphite; Soft carbon (Azuma, H. (81) 1)

Lithium intercalated graphite; Electrochemical (Basu, S. (81) 200)

Active carbon fiber; Surface treatment; Faradaic adsorption; Li-ion battery (Takasu, R. (81) 224)

Lithium battery; Silicon; Thin film (Bourderau, S. (81) 233)

Battery; Lithium; Alloy; Silicide; High capacity; Cycling (Weydanz, W.J. (81) 237)

Li-ion batteries; Li₄Ti₅O₁₂; SPE (Zaghib, K. (81) 300)

Lithium battery; Intermetallic; Tin alloy (Kepler, K.D. (81) 383)

Lithium; Cell design; Large scale; Cathode (Majima, M. (81) 877)

Anode material

Vanadates; Chimie douce; Li-ion battery (Denis, S. (81) 79)

Lithium secondary battery; Coke carbon; Mesophase-pitch carbon; Surface modification (Sato, Y. (81) 182)

Lithium secondary battery; Mg₂Ge; Mechanical alloying; Crystallinity (Sakaguchi, H. (81) 229)

A-site deficient

Ionic conductivity; Lithium ion; Perovskite; Solid solution; Solid electrolyte (Harada, Y. (81) 777)

Atomic structure

Lithium battery; Vanadium oxide; Modelling (Benedek, R. (81) 487)

Batteries

Lithium (Du Pasquier, A. (81) 54)

Electrolyte solution; Minimizing (Heider, U. (81) 119)

Conducting polymers; Li-ion; Rocking chair; Polypyrrole (Otero, T.F. (81) 838)

Lithium-ion; AC impedance spectroscopy; Rechargeable; Mathematical model; Interfacial resistance (Fellner, J.P. (81) 867)

In situ visualisation; Dendrites; Lithium; Polymer electrolyte (Brissot, C. (81) 925)

Battery

Lithium; Cathode (Kawai, H. (81) 67)

Electrode; Cell design (Blomgren, G.E. (81) 112)

Lithium; Alloy; Anode; Silicide; High capacity; Cycling (Weydanz, W.J. (81) 237)

Lithium; Li_{1+x}Mn_{2-x}O₄ (Takada, T. (81) 505)

Lithium-ion; Conductive additive; Metal fiber (Ahn, S. (81) 896)

Battery cathodes

Electron microscopy; LiCoO₂; Li(Al,Co)O₂ (Wang, H. (81) 594)

Battery energy storage

Electric energy; Secondary battery; Electric vehicle; Lithium battery (Yoda, S. (81) 162)

- Boroxine ring
 Polymer electrolyte; Ionic conductivity (Mehta, M.A. (81) 724)
- Bronze
 Lithium batteries; Vanadium pentoxide; Sol–gel synthesis; Electrochemical insertion; Cesium (Grégoire, G. (81) 612)
- Calorimetry
 Lithium ion cell; Spinel lithium manganese oxide; Capacity fading (Kobayashi, Y. (81) 463)
 Lithium-ion cell; Staircase voltage step coulometry; Hard carbon (Saito, Y. (81) 913)
- Capacity fading
 Lithium ion cell; Spinel lithium manganese oxide; Calorimetry (Kobayashi, Y. (81) 463)
 Lithium-ion battery; Lithium manganese oxide; STM (Inaba, M. (81) 554)
- Capacity failure
 Lithium-ion batteries; Manganese oxides; Storage (Iwata, E. (81) 430)
- Carbon
 Lithium; Mechanical-milling; TEM (Salver-Disma, F. (81) 291)
 Nanocomposites; Lithium (Duclaux, L. (81) 323)
- Carbon anode
 Lithium-ion batteries; Non-graphitizable carbon; ^7Li -NMR (Tatsumi, K. (81) 397)
- Carbon anodes
 Ab initio; Gaussian; Lithium intercalation; Coronene; Tetraboroanthracene (Scanlon, L.G. (81) 176)
- Carbon electrode
 Lithium microbattery; Carbon film; Polypyrrole (Kinoshita, K. (81) 170)
- Carbon electrodes
 Lithium insertion/extraction; Pyrolyzed phenolic resin (Wang, Z. (81) 328)
- Carbon film
 Lithium microbattery; Carbon electrode; Polypyrrole (Kinoshita, K. (81) 170)
- Cathode
 Lithium; Battery (Kawai, H. (81) 67)
 Lithium-ion cell; Intercalation; Layered rocksalt (Asakura, K. (81) 388)
 $\text{Li}_{0.3}\text{MnO}_2$; Lithium battery (Banov, B. (81) 562)
 Lithium; Cell design; Large scale; Anode (Majima, M. (81) 877)
- Cathode active material
 Lithium nickelate; Cobalt; Fluorine; Lithium ion battery; Co-substitution (Kubo, K. (81) 599)
- Cathode capacity loss
 Rechargeable lithium battery; Lithium–manganese oxide cathode (Nishimura, K. (81) 420)
- Cathode material
 LiMn_2O_4 ; Particle size; Electrochemical characterization (Vacassy, R. (81) 621)
 Lithium batteries; Lithium manganese oxide (Nakamura, H. (81) 632)
 Lithium-ion batteries; Microwave synthesis; LiMn_2O_4 (Yan, H. (81) 647)
 Vanadium oxide; Lithium insertion mechanism; In situ X-ray diffraction; Deformation electron density refinement (Bergström, Ö. (81) 685)
 Li-ion; Performance; Properties; Prismatic (Ehrlich, G.M. (81) 863)
- Cathode materials
 Defect chemistry; Lithium ion battery; Magnetic susceptibility; Electron spin resonance (Schoonman, J. (81) 44)
 Ab initio calculation; Lithium-ion batteries; Spectroscopy (Ebina, T. (81) 393)
 Secondary lithium cell; Lithium nickelate–cobalt and manganese substituted (Liu, Z. (81) 416)
- Lithium–nickel orthovanadate; Solution precipitation; Acetylacetonate; Nickel; Vanadium; Lithium batteries (Fey, G.T.-K. (81) 467)
- Cathodes
 Lithium-ion batteries; Lithium manganese oxides; Jahn–Teller effect; Local structure; EXAFS (Yamada, A. (81) 73)
 Li-ion batteries; LiNiO_2 ; Chemical delithiation (Moshtev, R. (81) 434)
 Lithium batteries; Lithium cobalt oxide; Lithium nickel oxide (Jang, Y.-I. (81) 589)
 Lithium ion batteries; Aluminium; Cobalt (Huang, H. (81) 690)
- Cation disorder
 LiNiO_2 ; Layered materials; Rietveld analysis; Neutron diffraction; Reversibility (Gover, R.K.B. (81) 535)
- Cation mixing
 Lithium intercalation; $\text{Li}_{1-\delta}\text{Al}_{1/4}\text{Ni}_{3/4}\text{O}_2$ electrode; Current transient technique; Lithium-ion diffusion (Pyun, S.-I. (81) 442)
- Cations migration
 Lithium intercalation; Thiospinels; ^{57}Fe Mössbauer (Branci, C. (81) 282)
- Cation substitution
 Spinel; Lithium manganese oxides; X-ray absorption fine structure spectroscopy; Computer simulation (Ammundsen, B. (81) 500)
- Cavitation
 Ultrasound; Lithium; Interfacial resistance; Erosion; Propylene carbonate (Birkin, P.R. (81) 833)
- Cell
 Power density; Voltage (Wilson, A.M. (81) 642)
- Cell design
 Battery; Electrode (Blomgren, G.E. (81) 112)
 Lithium; Large scale; Cathode; Anode (Majima, M. (81) 877)
- Cellular phone
 Lithium ion cell; Safety; Rechargeable cell (Tobishima, S.-i. (81) 882)
- Cesium
 Lithium batteries; Vanadium pentoxide; Bronze; Sol–gel synthesis; Electrochemical insertion (Grégoire, G. (81) 612)
- Characterization
 $\gamma\text{-MnO}_2$; Electrodeposition; Li insertion; Cycling behavior (Sarciaux, S. (81) 656)
- Charge–discharge
 Polymer electrolyte; Interatomic distance (Kostov, S. (81) 709)
- Chemical delithiation
 Positive electrode; Lithium nickelate; Acid leaching; Thermal decomposition mechanism (Arai, H. (81) 401)
 Li-ion batteries; Cathodes; LiNiO_2 (Moshtev, R. (81) 434)
- Chemical lithiation
 Lithium batteries; Vanadium pentoxide (Garcia, B. (81) 670)
- Chemical substitution
 $\text{Li}_1\text{Mn}_2\text{O}_4$; Jahn–Teller distortion (Amatucci, G.G. (81) 39)
- Chimie douce
 Vanadates; Anode material; Li-ion battery (Denis, S. (81) 79)
- Chloroethylene carbonate
 Lithium battery electrolyte; Graphite electrode; Solid electrolyte interphase; In-situ infrared spectroscopy; In-situ mass spectrometry (Winter, M. (81) 818)
- $\text{C}_6\text{H}_5\text{SO}_2\text{Cl}$
 Room temperature molten salt; Lithium battery; Aluminium chloride; Lithium cobalt oxide; 1-Methyl-3-ethyl-imidazolium chloride (Fung, Y.S. (81) 891)
- Cobalt
 Lithium nickelate; Cathode active material; Fluorine; Lithium ion battery; Co-substitution (Kubo, K. (81) 599)
 Lithium ion batteries; Cathodes; Aluminium (Huang, H. (81) 690)
- Cobalt oxide
 Lithium ion battery; Nickel-based oxide (Broussely, M. (81) 140)
 Nickel oxide; Structure resolution (Seguin, L. (81) 604)
- Coke
 Graphite; Gel; Kynar; Lithium imide (Christie, L. (81) 378)

- Coke carbon
Lithium secondary battery; Anode material; Mesophase-pitch carbon; Surface modification (Sato, Y. (81) 182)
- Combustion method
Rechargeable lithium-ion battery; Spinel phase LiMn_2O_4 (Yang, W. (81) 412)
- Commercial lithium-ion cell
Gas generation mechanism; Electrolyte decomposition; Long cycling (Kumai, K. (81) 715)
- Composite cathode
 LiMn_2O_4 ; Polypyrrole; Cyclability (Du Pasquier, A. (81) 607)
- Composite microstructure
Alloy; Li–Sn; Mixed-conductor matrix; Solid electrolyte matrix; Nucleation; Convertible metal oxides; Near-equilibrium (Huggins, R.A. (81) 13)
- Computer simulation
Spinel; Lithium manganese oxides; Cation substitution; X-ray absorption fine structure spectroscopy (Ammundsen, B. (81) 500)
- Conductance
 LiBF_4 ; Propylene carbonate; Diethyl carbonate (Moumouzias, G. (81) 830)
- Conducting polymers
Batteries; Li-ion; Rocking chair; Polypyrrole (Otero, T.F. (81) 838)
- Conductive additive
Battery; Lithium-ion; Metal fiber (Ahn, S. (81) 896)
- Conductive additives and binders
Li-ion batteries; Cycling performance (Momchilov, A. (81) 566)
- Conductivity
Poly(vinylidene fluoride); Hybrid electrolytes; Lithium batteries (Arcella, V. (81) 790)
- Convertible metal oxides
Alloy; Li–Sn; Mixed-conductor matrix; Solid electrolyte matrix; Nucleation; Near-equilibrium; Composite microstructure (Huggins, R.A. (81) 13)
- Coronene
Ab initio; Gaussian; Lithium intercalation; Tetraboroanthracene; Carbon anodes (Scanlon, L.G. (81) 176)
- Co-substitution
Lithium nickelate; Cobalt; Cathode active material; Fluorine; Lithium ion battery (Kubo, K. (81) 599)
- Coulombic efficiency
Rechargeable lithium battery; Lithium metal anode; Electrolyte temperature; Precycling; Ac impedance (Ishikawa, M. (81) 217)
- Crystallinity
Lithium secondary battery; Anode material; Mg_2Ge ; Mechanical alloying (Sakaguchi, H. (81) 229)
Lithium ion batteries; Hydrothermal synthesis (Lu, C.-H. (81) 696)
- Cubic
Spinel; Tetragonal (Kanno, R. (81) 542)
- Current density
Lithium electrode; SEM; Dendrite (Orsini, F. (81) 918)
- Current transient technique
Lithium intercalation; $\text{Li}_{1-\delta}\text{Al}_{1/4}\text{Ni}_{3/4}\text{O}_2$ electrode; Lithium-ion diffusion; Cation mixing (Pyun, S.-I. (81) 442)
- Cyanometallate
Intercalation; Prussian blue; Multinuclear complex (Imanishi, N. (81) 530)
- Cyclability
 LiMn_2O_4 ; Polypyrrole; Composite cathode (Du Pasquier, A. (81) 607)
- Cycle life
Lithium ion batteries; Lithium manganese spinel; Energy density; High-power performance; Low temperature performance (Bäuerlein, P. (81) 585)
- Cyclic ethers
Poly(ethylene-oxide) electrolytes; Lithium ionophores; Lithium deposition (Lisowska-Oleksiak, A. (81) 813)
- Cyclic voltammogram
SnO anode; Electrolyte; Passivating film; FTIR (Li, J. (81) 346)
- Cycling
Battery; Lithium; Alloy; Anode; Silicide; High capacity (Weydanz, W.J. (81) 237)
- Cycling behavior
Lithium intercalation; Graphite; Additives; Impurities; Irreversible charge loss (Joho, F. (81) 243)
 $\gamma\text{-MnO}_2$; Electrodeposition; Characterization; Li insertion (Sarciaux, S. (81) 656)
- Cycling efficiency
Electrolyte; Solvation; Lithium metal anode; NMR (Hayashi, K. (81) 782)
- Cycling performance
Li-ion batteries; Conductive additives and binders (Momchilov, A. (81) 566)
- dc polarisation
Gel polyelectrolytes; Impedance spectroscopy; Transference number; Interface passivation; Equivalent circuit (Krok, F. (81) 766)
- Defect chemistry
Cathode materials; Lithium ion battery; Magnetic susceptibility; Electron spin resonance (Schoonman, J. (81) 44)
- Deformation electron density refinement
Vanadium oxide; Cathode material; Lithium insertion mechanism; In situ X-ray diffraction (Bergström, Ö. (81) 685)
- Dendrite
Lithium electrode; Current density; SEM (Orsini, F. (81) 918)
- Dendrites
In situ visualisation; Lithium; Polymer electrolyte; Batteries (Brissot, C. (81) 925)
- Diethyl carbonate
Conductance; LiBF_4 ; Propylene carbonate (Moumouzias, G. (81) 830)
- Diffraction
Lithium-ion batteries; Manganese oxide; Synchrotron (Strobel, P. (81) 458)
- Diffusion
Lithium batteries; Electrolyte solutions; EC; EMC; NMR (Capiglia, C. (81) 859)
- Diffusion-controlled phase boundary movement
 $\text{Li}_{1+\delta}[\text{Ti}_{2-y}\text{Li}_y]\text{O}_4$ electrode; Lithium transport; Three-stage current transient; Large potential stepping (Pyun, S.-I. (81) 248)
- EC
Lithium batteries; Electrolyte solutions; EMC; NMR; Diffusion (Capiglia, C. (81) 859)
- EELS
Graphite; Intercalation; Passivating layer; Electrochemical properties; TEM (Naji, A. (81) 207)
- Electrical conductivity
Nuclear magnetic resonance; Lithium electrolytes; Activation volume; High pressure (Stallworth, P.E. (81) 739)
- Electric energy
Battery energy storage; Secondary battery; Electric vehicle; Lithium battery (Yoda, S. (81) 162)
- Electric-power storage
Lithium batteries; Graphite anode; Manganese oxide cathode (Tamura, K. (81) 156)
- Electric vehicle
Electric energy; Battery energy storage; Secondary battery; Lithium battery (Yoda, S. (81) 162)
Lithium batteries; Performance; Temperature; Safety (Hyung, Y.-E. (81) 842)
Li-ion battery; Safety test (Kitoh, K. (81) 887)
- Electric vehicles
Lithium secondary batteries; Load leveling systems (Iwahori, T. (81) 872)

- Electrochemical
 Lithium-ion battery; Energy storage (Kodama, T. (81) 144)
 Lithium intercalated graphite; Anode (Basu, S. (81) 200)
 In situ diffraction; Li-ion batteries (Gérard, B. (81) 922)
- Electrochemical behavior
 Lithium batteries; Vanadium oxide cathodes; Structural characteristics; Li-ion diffusion coefficient (Shembel, E. (81) 480)
- Electrochemical characterization
 Cathode material; LiMn_2O_4 ; Particle size (Vacassy, R. (81) 621)
- Electrochemical insertion
 Lithium batteries; Vanadium pentoxide; Bronze; Sol–gel synthesis; Cesium (Grégoire, G. (81) 612)
- Electrochemical intercalation
 $\text{Li}_x\text{Mn}_2\text{O}_4$ -based cathodes; Raman spectroscopy (Huang, W. (81) 616)
- Electrochemical lithium insertion
 Niobates; Lithium batteries (Martínez-de la Cruz, A. (81) 255)
- Electrochemical lithium intercalation
 Vanadium pentoxide; Electrodeposition; Physico-chemical characterization (Potiron, E. (81) 666)
- Electrochemical potential spectroscopy
 LiMn_2O_4 ; $\text{LiMn}_2\text{O}_{(4-y)}\text{F}_y$; In situ XRD (Palacín, M.R. (81) 627)
- Electrochemical properties
 Graphite; Intercalation; Passivating layer; TEM; EELS (Naji, A. (81) 207)
 Sol–gel; $\text{Li}_{4/3}\text{Ti}_{5/3}\text{O}_4$ (Bach, S. (81) 273)
 SnO anode; XRD; Lithium ion batteries (Li, H. (81) 335)
- Electrochemical quartz crystal microbalance
 Vanadium oxide; Thin film; Sputtering; Lithium battery (Koike, S. (81) 581)
- Electrochemical stability
 Polymer electrolyte; Lithium salts (Alloin, F. (81) 795)
- Electrochemistry
 $\text{Li}_2\text{Cr}_y\text{Mn}_{2-y}\text{O}_4$; Structure (Davidson, I.J. (81) 406)
- Electrode
 Lithium; Rechargeable (García-Alvarado, F. (81) 85)
 Battery; Cell design (Blomgren, G.E. (81) 112)
- Electrode interface
 Polymer electrolyte; Ionic conductivity; Lithium polymer battery (Watanabe, M. (81) 786)
- Electrode materials
 Li_xMO_y cathodes; Li–graphite anodes (Aurbach, D. (81) 95)
- Electrodeposition
 $\gamma\text{-MnO}_2$; Characterization; Li insertion; Cycling behavior (Sarciaux, S. (81) 656)
 Vanadium pentoxide; Physico-chemical characterization; Electrochemical lithium intercalation (Potiron, E. (81) 666)
- Electrodes
 Lithium battery; Structure; Stability (Thackeray, M.M. (81) 60)
- Electrolyte
 SnO anode; Passivating film; FTIR; Cyclic voltammogram (Li, J. (81) 346)
 Morphology; Lithium; Poly(vinylidene fluoride) (Osaka, T. (81) 734)
 Solvation; Lithium metal anode; Cycling efficiency; NMR (Hayashi, K. (81) 782)
- Electrolyte decomposition
 Lithium-ion cell; Graphite electrode; SEI-film; In situ mass spectrometry; In situ infrared spectroscopy; In situ Raman mapping (Novák, P. (81) 212)
 Commercial lithium-ion cell; Gas generation mechanism; Long cycling (Kumai, K. (81) 715)
- Electrolytes
 Rechargeable lithium batteries; Gel alkylene oxide (Matsuda, Y. (81) 762)
- Electrolyte solution
 Batteries; Minimizing (Heider, U. (81) 119)
- Electrolyte solutions
 Lithium batteries; EC; EMC; NMR; Diffusion (Capiglia, C. (81) 859)
- Electrolyte temperature
 Rechargeable lithium battery; Lithium metal anode; Coulombic efficiency; Precycling; Ac impedance (Ishikawa, M. (81) 217)
- Electron microscopies
 Lithium intercalation; Petroleum cokes; Multi-point N_2 gas adsorption analysis; X-ray diffraction (Tran, T.D. (81) 296)
- Electron microscopy
 LiCoO_2 ; $\text{Li}(\text{Al},\text{Co})\text{O}_2$; Battery cathodes (Wang, H. (81) 594)
- Electron spin resonance
 Cathode materials; Defect chemistry; Lithium ion battery; Magnetic susceptibility (Schoonman, J. (81) 44)
- EMC
 Lithium batteries; Electrolyte solutions; EC; NMR; Diffusion (Capiglia, C. (81) 859)
- Energy density
 Lithium ion batteries; Lithium manganese spinel; High-power performance; Low temperature performance; Cycle life (Bauerlein, P. (81) 585)
- Energy storage
 Lithium-ion battery; Electrochemical (Kodama, T. (81) 144)
- Equivalent circuit
 Gel polyelectrolytes; Impedance spectroscopy; dc polarisation; Transference number; Interface passivation (Krok, F. (81) 766)
- Erosion
 Ultrasound; Lithium; Interfacial resistance; Cavitation; Propylene carbonate (Birkin, P.R. (81) 833)
- Europe
 Lithium batteries; R & D (Broussely, M. (81) 137)
- EVS
 Sol–gel process; LiCoO_2 ; Lithium rechargeable batteries; EXAFS (Yoon, W.-S. (81) 517)
- EXAFS
 Lithium-ion batteries; Cathodes; Lithium manganese oxides; Jahn–Teller effect; Local structure (Yamada, A. (81) 73)
 Sol–gel process; LiCoO_2 ; Lithium rechargeable batteries; EVS (Yoon, W.-S. (81) 517)
- Exfoliation
 Graphite; Lithium; Intercalation; Rhombohedral (Simon, B. (81) 312)
- Faradaic adsorption
 Active carbon fiber; Surface treatment; Li-ion battery; Anode (Takasu, R. (81) 224)
- ⁵⁷Fe Mössbauer
 Lithium intercalation; Thiospinels; Cations migration (Branci, C. (81) 282)
- ⁵⁷Fe Mössbauer spectroscopy
 Lithium battery; Lithium-ion batteries; Lithium cobalt oxide; Lithium iron oxide (Alcántara, R. (81) 547)
- First-principles total energies
 LiCoO_2 ; Ordering; Spinel; Li intercalation (Wolverton, C. (81) 680)
- Fluorine
 Lithium nickelate; Cobalt; Cathode active material; Lithium ion battery; Co-substitution (Kubo, K. (81) 599)
- Fluoroethylene carbonate electrolyte
 Lithium ion batteries; Graphite anodes (McMillan, R. (81) 20)
- FTIR
 Nonaqueous electrolyte; Imide; LiCoO_2 ; Al (Kanamura, K. (81) 123)
 SnO anode; Electrolyte; Passivating film; Cyclic voltammogram (Li, J. (81) 346)
- Gas generation mechanism
 Commercial lithium-ion cell; Electrolyte decomposition; Long cycling (Kumai, K. (81) 715)

- Gaussian
Ab initio; Lithium intercalation; Coronene; Tetraboroanthracene; Carbon anodes (Scanlon, L.G. (81) 176)
- Gel
Graphite; Coke; Kynar; Lithium imide (Christie, L. (81) 378)
- Gel alkylene oxide
Rechargeable lithium batteries; Electrolytes (Matsuda, Y. (81) 762)
- Gel electrolyte
Interfacial resistance; Lithium; Macromonomer (Kono, M. (81) 748)
- Gel polyelectrolytes
Impedance spectroscopy; dc polarisation; Transference number; Interface passivation; Equivalent circuit (Krok, F. (81) 766)
- Graphite
Lithium-ion cell; Anode; Hard carbon; Structural analysis; Soft carbon (Azuma, H. (81) 1)
Intercalation; Passivating layer; Electrochemical properties; TEM; EELS (Naji, A. (81) 207)
Lithium intercalation; Additives; Impurities; Cycling behavior; Irreversible charge loss (Joho, F. (81) 243)
Lithium; Intercalation; Exfoliation; Rhombohedral (Simon, B. (81) 312)
Coke; Gel; Kynar; Lithium imide (Christie, L. (81) 378)
- Graphite anode
Lithium batteries; Electric-power storage; Manganese oxide cathode (Tamura, K. (81) 156)
Li-ion batteries; High-temperature performance; X-ray photoelectron spectroscopy (Andersson, A.M. (81) 286)
Rate enhancement; Metal film; Li-ion batteries; Vacuum evaporation (Takamura, T. (81) 368)
- Graphite anodes
Fluoroethylene carbonate electrolyte; Lithium ion batteries (McMillan, R. (81) 20)
- Graphite electrode
Li-ion battery; Lithium intercalation; Thermal stability; SEI layer (Andersson, A.M. (81) 8)
Lithium-ion cell; SEI-film; Electrolyte decomposition; In situ mass spectrometry; In situ infrared spectroscopy; In situ Raman mapping (Novák, P. (81) 212)
Lithium battery electrolyte; Chloroethylene carbonate; Solid electrolyte interphase; In-situ infrared spectroscopy; In-situ mass spectrometry (Winter, M. (81) 818)
- Halogenated carbonates
Nuclear magnetic resonance; Interfacial impedance; Solvation; Organic electrolytes; Lithium battery (Katayama, H. (81) 705)
- Hard carbon
Lithium-ion cell; Anode; Structural analysis; Graphite; Soft carbon (Azuma, H. (81) 1)
Lithium-ion cell; Calorimetry; Staircase voltage step coulometry (Saito, Y. (81) 913)
- Heat treatment
Silicon tin oxynitride (SiTON); Lithium-ion battery; Solder reflow; Microelectronics; Hysteresis (Neudecker, B.J. (81) 27)
- High capacity
Battery; Lithium; Alloy; Anode; Silicide; Cycling (Weydanz, W.J. (81) 237)
- High-power performance
Lithium ion batteries; Lithium manganese spinel; Energy density; Low temperature performance; Cycle life (Bäuerlein, P. (81) 585)
- High pressure
Electrical conductivity; Nuclear magnetic resonance; Lithium electrolytes; Activation volume (Stallworth, P.E. (81) 739)
- High-temperature performance
Li-ion batteries; Graphite anode; X-ray photoelectron spectroscopy (Andersson, A.M. (81) 286)
- Hollandite
Lithium battery; Titanium oxide (Noailles, L.D. (81) 259)
- Hybrid electrolytes
Poly(vinylidene fluoride); Conductivity; Lithium batteries (Arcella, V. (81) 790)
- Hybrid vehicle
Lithium titanium oxide; Lithium-ion; Safety (Jansen, A.N. (81) 902)
- Hydrothermal synthesis
Lithium ion batteries; Crystallinity (Lu, C.-H. (81) 696)
- Hyperbranched polymer
Ionic conductivity; Lithium metal salts (Itoh, T. (81) 824)
- Hysteresis
Silicon tin oxynitride (SiTON); Lithium-ion battery; Solder reflow; Microelectronics; Heat treatment (Neudecker, B.J. (81) 27)
- Imide
Nonaqueous electrolyte; LiCoO₂; Al; FTIR (Kanamura, K. (81) 123)
- Impedance spectroscopy
SnO anodes; Nanometer anodes; Passivating film (Li, H. (81) 340)
Gel polyelectrolytes; dc polarisation; Transference number; Interface passivation; Equivalent circuit (Krok, F. (81) 766)
- Impurities
Lithium intercalation; Graphite; Additives; Cycling behavior; Irreversible charge loss (Joho, F. (81) 243)
- Inert second phase
Tin oxide composite; Li–Sn alloy; Lithium chemical diffusion coefficient (Huang, H. (81) 362)
- Insertion
Amorphous; Vanadate; Quenching; Lithium (Kawakita, J. (81) 448)
- In situ diffraction
Electrochemical; Li-ion batteries (Gérand, B. (81) 922)
- In situ infrared spectroscopy
Lithium-ion cell; Graphite electrode; SEI-film; Electrolyte decomposition; In situ mass spectrometry; In situ Raman mapping (Novák, P. (81) 212)
- In-situ infrared spectroscopy
Lithium battery electrolyte; Chloroethylene carbonate; Graphite electrode; Solid electrolyte interphase; In-situ mass spectrometry (Winter, M. (81) 818)
- In situ mass spectrometry
Lithium-ion cell; Graphite electrode; SEI-film; Electrolyte decomposition; In situ infrared spectroscopy; In situ Raman mapping (Novák, P. (81) 212)
- In-situ mass spectrometry
Lithium battery electrolyte; Chloroethylene carbonate; Graphite electrode; Solid electrolyte interphase; In-situ infrared spectroscopy (Winter, M. (81) 818)
- In situ Raman mapping
Lithium-ion cell; Graphite electrode; SEI-film; Electrolyte decomposition; In situ mass spectrometry; In situ infrared spectroscopy (Novák, P. (81) 212)
- In situ visualisation
Dendrites; Lithium; Polymer electrolyte; Batteries (Brissot, C. (81) 925)
- In situ XAFS
Lithium manganese oxide; Spinel-type structure; Local structure; Lithium ion secondary battery (Shiraishi, Y. (81) 571)
- In situ X-ray diffraction
Vanadium oxide; Cathode material; Lithium insertion mechanism; Deformation electron density refinement (Bergström, Ö. (81) 685)
- In situ XRD
LiMn₂O₄; LiMn₂O_(4-y)F_y; Electrochemical potential spectroscopy (Palacín, M.R. (81) 627)
- Interatomic distance
Polymer electrolyte; Charge–discharge (Kostov, S. (81) 709)

- Intercalation**
 Graphite; Passivating layer; Electrochemical properties; TEM; EELS (Naji, A. (81) 207)
 Graphite; Lithium; Exfoliation; Rhombohedral (Simon, B. (81) 312)
 Lithium-ion cell; Layered rocksalt; Cathode (Asakura, K. (81) 388)
 Prussian blue; Multinuclear complex; Cyanometallate (Imanishi, N. (81) 530)
- Interface passivation**
 Gel polyelectrolytes; Impedance spectroscopy; dc polarisation; Transference number; Equivalent circuit (Krok, F. (81) 766)
- Interfacial impedance**
 Nuclear magnetic resonance; Solvation; Organic electrolytes; Halogenated carbonates; Lithium battery (Katayama, H. (81) 705)
- Interfacial resistance**
 Gel electrolyte; Lithium; Macromonomer (Kono, M. (81) 748)
 Organic additives; Lithium–aluminium alloy; Lithium/electrolyte interface (Matsuda, Y. (81) 759)
 Ultrasound; Lithium; Erosion; Cavitation; Propylene carbonate (Birkin, P.R. (81) 833)
 Lithium-ion; Batteries; AC impedance spectroscopy; Rechargeable; Mathematical model (Fellner, J.P. (81) 867)
- Intermetallic**
 Lithium battery; Anode; Tin alloy (Kepler, K.D. (81) 383)
- Ionic conductivity**
 Polymer electrolyte; Boroxine ring (Mehta, M.A. (81) 724)
 Polymer blend; AC impedance (Stephan, A.M. (81) 752)
 Lithium ion; Perovskite; Solid solution; Solid electrolyte; A-site deficient (Harada, Y. (81) 777)
 Polymer electrolyte; Electrode interface; Lithium polymer battery (Watanabe, M. (81) 786)
 Hyperbranched polymer; Lithium metal salts (Itoh, T. (81) 824)
 Lithium titanium phosphate; Spark-plasma-sintering; Lithium cobalt oxide; All-solid-state lithium batteries (Kobayashi, Y. (81) 853)
- Ionic mobility**
 NMR; Lithium battery (Ward, I.M. (81) 700)
- Iron oxy-hydroxide**
 Tunnel structure; Lithium battery; XPS (Amine, K. (81) 221)
- Irreversible capacity**
 Lithium-ion batteries; Passivation layer (Rubino, R.S. (81) 373)
- Irreversible charge loss**
 Lithium intercalation; Graphite; Additives; Impurities; Cycling behavior (Joho, F. (81) 243)
- Jahn–Teller distortion**
 $\text{Li}_1\text{Mn}_2\text{O}_4$; Chemical substitution (Amatucci, G.G. (81) 39)
- Jahn–Teller effect**
 Lithium-ion batteries; Cathodes; Lithium manganese oxides; Local structure; EXAFS (Yamada, A. (81) 73)
- Jahn–Teller ion**
 Oxygen deficiency; Spinel; $\text{Li}(\text{Mn}_{2-x}\text{Li}_x)\text{O}_{4-\delta}$ (Chida, Y. (81) 454)
- Kinetics**
 $\gamma\text{-MnO}_2$; $\gamma\text{-Li}_x\text{MnO}_2$; Li insertion process; Thermodynamics; Structural changes (Sarciaux, S. (81) 661)
- Kynar**
 Graphite; Coke; Gel; Lithium imide (Christie, L. (81) 378)
- Large potential stepping**
 $\text{Li}_{1+\delta}[\text{Ti}_{2-y}\text{Li}_y]\text{O}_4$ electrode; Lithium transport; Diffusion-controlled phase boundary movement; Three-stage current transient (Pyun, S.-I. (81) 248)
- Large scale**
 Lithium; Cell design; Cathode; Anode (Majima, M. (81) 877)
- Large-tunnel structure**
 Lithium ion batteries; Lithium–manganese oxides (Yang, Y. (81) 637)
- Layered materials**
 LiNiO_2 ; Cation disorder; Rietveld analysis; Neutron diffraction; Reversibility (Gover, R.K.B. (81) 535)
- Layered oxide**
 Lithium deintercalation; Molybdenum oxide (Kobayashi, H. (81) 524)
- Layered rocksalt**
 Lithium-ion cell; Intercalation; Cathode (Asakura, K. (81) 388)
- Layered structure**
 Lithium battery; Lithium manganese oxide (Johnson, C.S. (81) 491)
- Layer formation**
 Lithium batteries; Solvated electron; Reactivity of anions and solvents (Rahner, D. (81) 358)
- $\text{Li}(\text{Al},\text{Co})\text{O}_2$**
 Electron microscopy; LiCoO_2 ; Battery cathodes (Wang, H. (81) 594)
- LiBF_4**
 Conductance; Propylene carbonate; Diethyl carbonate (Moumouzias, G. (81) 830)
- $\text{LiCo}_{0.5}\text{Al}_{0.5}\text{O}_2$**
 LiCoO_2 ; Thin film cathodes; Li-ion batteries (Perkins, J.D. (81) 675)
- LiCoO_2**
 Nonaqueous electrolyte; Imide; Al; FTIR (Kanamura, K. (81) 123)
 Sol–gel process; Lithium rechargeable batteries; EXAFS; EVS (Yoon, W.-S. (81) 517)
 Electron microscopy; $\text{Li}(\text{Al},\text{Co})\text{O}_2$; Battery cathodes (Wang, H. (81) 594)
 $\text{LiCo}_{0.5}\text{Al}_{0.5}\text{O}_2$; Thin film cathodes; Li-ion batteries (Perkins, J.D. (81) 675)
 Ordering; First-principles total energies; Spinel; Li intercalation (Wolverton, C. (81) 680)
- LiCoO_x**
 Microbatteries; Thin films (Polo da Fonseca, C.N. (81) 575)
- $\text{Li}_2\text{Cr}_y\text{Mn}_{2-y}\text{O}_4$**
 Electrochemistry; Structure (Davidson, I.J. (81) 406)
- Li–graphite anodes**
 Electrode materials; Li_xMO_y cathodes (Aurbach, D. (81) 95)
- $\text{Li}_{1-\delta}\text{Al}_{1/4}\text{Ni}_{3/4}\text{O}_2$ electrode**
 Lithium intercalation; Current transient technique; Lithium-ion diffusion; Cation mixing (Pyun, S.-I. (81) 442)
- $\text{Li}_{1+\delta}[\text{Ti}_{2-y}\text{Li}_y]\text{O}_4$ electrode**
 Lithium transport; Diffusion-controlled phase boundary movement; Three-stage current transient; Large potential stepping (Pyun, S.-I. (81) 248)
- Li insertion**
 $\gamma\text{-MnO}_2$; Electrodeposition; Characterization; Cycling behavior (Sarciaux, S. (81) 656)
- Li insertion process**
 $\gamma\text{-MnO}_2$; $\gamma\text{-Li}_x\text{MnO}_2$; Thermodynamics; Kinetics; Structural changes (Sarciaux, S. (81) 661)
- Li intercalation**
 LiCoO_2 ; Ordering; First-principles total energies; Spinel (Wolverton, C. (81) 680)
- Li-ion**
 Conducting polymers; Batteries; Rocking chair; Polypyrrole (Otero, T.F. (81) 838)
 Cathode material; Performance; Properties; Prismatic (Ehrlich, G.M. (81) 863)
- Li-ion batteries**
 Graphite anode; High-temperature performance; X-ray photoelectron spectroscopy (Andersson, A.M. (81) 286)
 Anode; $\text{Li}_4\text{Ti}_5\text{O}_{12}$; SPE (Zaghib, K. (81) 300)
 Rate enhancement; Metal film; Graphite anode; Vacuum evaporation (Takamura, T. (81) 368)
 Cathodes; LiNiO_2 ; Chemical delithiation (Moshtev, R. (81) 434)
 Conductive additives and binders; Cycling performance (Momchilov, A. (81) 566)
 LiCoO_2 ; $\text{LiCo}_{0.5}\text{Al}_{0.5}\text{O}_2$; Thin film cathodes (Perkins, J.D. (81) 675)

- Li⁺-ion conducting electrolyte; Nanostructured ceramic (Jak, M.J.G. (81) 808)
 In situ diffraction; Electrochemical (Gérand, B. (81) 922)
- Li-ion battery
 Graphite electrode; Lithium intercalation; Thermal stability; SEI layer (Andersson, A.M. (81) 8)
 Vanadates; Chimie douce; Anode material (Denis, S. (81) 79)
 Active carbon fiber; Surface treatment; Faradaic adsorption; Anode (Takasu, R. (81) 224)
 Titanate; Spinel; Neutron diffraction; Structure (Robertson, A.D. (81) 352)
 Safety test; Electric vehicle (Kitoh, K. (81) 887)
- Li⁺-ion conducting electrolyte
 Nanostructured ceramic; Li-ion batteries (Jak, M.J.G. (81) 808)
- Li-ion diffusion coefficient
 Lithium batteries; Vanadium oxide cathodes; Structural characteristics; Electrochemical behavior (Shembel, E. (81) 480)
- Li_xMn₂O₄
 Spinel electrode; XRD (Aurbach, D. (81) 472)
- γ-Li_xMnO₂
 γ-MnO₂; Li insertion process; Thermodynamics; Kinetics; Structural changes (Sarciaux, S. (81) 661)
- Li_xMn₂O₄-based cathodes
 Raman spectroscopy; Electrochemical intercalation (Huang, W. (81) 616)
- Li_xMO_y cathodes
 Electrode materials; Li-graphite anodes (Aurbach, D. (81) 95)
- Li/Li_x[Mn₂]O₄
 Spinel electrode; Structural fatigue (Shao-Horn, Y. (81) 496)
- Li[Me_{1/2}Mn_{3/2}]O₄
 Solid-state redox potentials; Lithium-ion batteries (Ohzuku, T. (81) 90)
- Li(Mn_{2-x}Li_x)O_{4-δ}
 Oxygen deficiency; Spinel; Jahn–Teller ion (Chida, Y. (81) 454)
- Li₁Mn₂O₄
 Jahn–Teller distortion; Chemical substitution (Amatucci, G.G. (81) 39)
- LiMnO₂
 Synthesis; Reaction mechanism (Nitta, Y. (81) 49)
- Li_{0.3}MnO₂
 Cathode; Lithium battery (Banov, B. (81) 562)
- LiMn₂O₄
 Polypyrrole; Cyclability; Composite cathode (Du Pasquier, A. (81) 607)
 Cathode material; Particle size; Electrochemical characterization (Vacassy, R. (81) 621)
 LiMn₂O_{4-y}F_y; Electrochemical potential spectroscopy; In situ XRD (Palacín, M.R. (81) 627)
 Lithium-ion batteries; Microwave synthesis; Cathode material (Yan, H. (81) 647)
- LiMn₂O_{4-y}F_y
 LiMn₂O₄; Electrochemical potential spectroscopy; In situ XRD (Palacín, M.R. (81) 627)
- Li_{1+x}Mn_{2-x}O₄
 Lithium; Battery (Takada, T. (81) 505)
- LiNi_{1-x}Co_xO₂
 Lithium-ion batteries; Mesocarbon microbeads (Gitzendanner, R.L. (81) 847)
- LiNiO₂
 Li-ion batteries; Cathodes; Chemical delithiation (Moshtev, R. (81) 434)
 Layered materials; Cation disorder; Rietveld analysis; Neutron diffraction; Reversibility (Gover, R.K.B. (81) 535)
- ⁷LiNMR
 Multi-walled carbon nanotubes; Microtexture; Lithium insertion (Leroux, F. (81) 317)
- ⁷Li-NMR
 Lithium-ion batteries; Carbon anode; Non-graphitizable carbon (Tatsumi, K. (81) 397)
- Liquid crystal template
 Nanostructure; Lithium; Mesoporous; Polyoxyethylene ether (Whitehead, A.H. (81) 33)
- Li–Sn
 Alloy; Mixed-conductor matrix; Solid electrolyte matrix; Nucleation; Convertible metal oxides; Near-equilibrium; Composite microstructure (Huggins, R.A. (81) 13)
- Li–Sn alloy
 Tin oxide composite; Inert second phase; Lithium chemical diffusion coefficient (Huang, H. (81) 362)
- Lithium
 Nanostructure; Mesoporous; Liquid crystal template; Polyoxyethylene ether (Whitehead, A.H. (81) 33)
 Batteries (Du Pasquier, A. (81) 54)
 Cathode; Battery (Kawai, H. (81) 67)
 Electrode; Rechargeable (García-Alvarado, F. (81) 85)
 Battery; Alloy; Anode; Silicide; High capacity; Cycling (Weydanz, W.J. (81) 237)
 Carbon; Mechanical-milling; TEM (Salver-Disma, F. (81) 291)
 Graphite; Intercalation; Exfoliation; Rhombohedral (Simon, B. (81) 312)
 Nanocomposites; Carbon (Duclaux, L. (81) 323)
 Amorphous; Vanadate; Quenching; Insertion (Kawakita, J. (81) 448)
 Battery; Li_{1+x}Mn_{2-x}O₄ (Takada, T. (81) 505)
 Morphology; Poly(vinylidene fluoride); Electrolyte (Osaka, T. (81) 734)
 Gel electrolyte; Interfacial resistance; Macromonomer (Kono, M. (81) 748)
 Ultrasound; Interfacial resistance; Erosion; Cavitation; Propylene carbonate (Birkin, P.R. (81) 833)
 Cell design; Large scale; Cathode; Anode (Majima, M. (81) 877)
 In situ visualisation; Dendrites; Polymer electrolyte; Batteries (Brisot, C. (81) 925)
- Lithium-alloy anode
 Lithium-ion batteries; Tin–antimony alloy; Nanocrystalline lithium anode (Besenhard, J.O. (81) 268)
- Lithium–aluminium alloy
 Organic additives; Lithium/electrolyte interface; Interfacial resistance (Matsuda, Y. (81) 759)
- Lithium batteries
 R&D; Europe (Broussely, M. (81) 137)
 Sol–gel; Xerogel; Aerogel; Vanadium pentoxide; Manganese dioxide (Owens, B.B. (81) 150)
 Electric-power storage; Graphite anode; Manganese oxide cathode (Tamura, K. (81) 156)
 Electrochemical lithium insertion; Niobates (Martínez-de la Cruz, A. (81) 255)
 Thin films; XPS analysis; RF magnetron sputtering; Transition element oxysulfide (Martin, I. (81) 306)
 Solvated electron; Reactivity of anions and solvents; Layer formation (Rahner, D. (81) 358)
 Lithium–nickel orthovanadate; Solution precipitation; Acetylacetonate; Cathode materials; Nickel; Vanadium (Fey, G.T.-K. (81) 467)
 Vanadium oxide cathodes; Structural characteristics; Electrochemical behavior; Li-ion diffusion coefficient (Shembel, E. (81) 480)
 Cathodes; Lithium cobalt oxide; Lithium nickel oxide (Jang, Y.-I. (81) 589)
 Vanadium pentoxide; Bronze; Sol–gel synthesis; Electrochemical insertion; Cesium (Grégoire, G. (81) 612)
 Cathode material; Lithium manganese oxide (Nakamura, H. (81) 632)
 Vanadium pentoxide; Chemical lithiation (Garcia, B. (81) 670)

- Poly(vinylidene fluoride); Hybrid electrolytes; Conductivity (Arcella, V. (81) 790)
- Electric vehicle; Performance; Temperature; Safety (Hyung, Y.-E. (81) 842)
- Electrolyte solutions; EC; EMC; NMR; Diffusion (Capiglia, C. (81) 859)
- Lithium battery**
- Electrodes; Structure; Stability (Thackeray, M.M. (81) 60)
- Electric energy; Battery energy storage; Secondary battery; Electric vehicle (Yoda, S. (81) 162)
- Iron oxy-hydroxide; Tunnel structure; XPS (Amine, K. (81) 221)
- Titanium oxide; Hollandite (Noailles, L.D. (81) 259)
- Anode; Intermetallic; Tin alloy (Kepler, K.D. (81) 383)
- Atomic structure; Vanadium oxide; Modelling (Benedek, R. (81) 487)
- Lithium manganese oxide; Layered structure (Johnson, C.S. (81) 491)
- Lithium-ion batteries; Lithium cobalt oxide; Lithium iron oxide; ⁵⁷Fe Mössbauer spectroscopy (Alcántara, R. (81) 547)
- Li_{0.3}MnO₂; Cathode (Banov, B. (81) 562)
- Vanadium oxide; Thin film; Electrochemical quartz crystal microbalance; Sputtering (Koike, S. (81) 581)
- NMR; Ionic mobility (Ward, I.M. (81) 700)
- Nuclear magnetic resonance; Interfacial impedance; Solvation; Organic electrolytes; Halogenated carbonates (Katayama, H. (81) 705)
- Room temperature molten salt; Aluminium chloride; Lithium cobalt oxide; 1-Methyl-3-ethyl-imidazolium chloride; C₆H₅SO₂Cl (Fung, Y.S. (81) 891)
- Lithium battery electrolyte**
- Chloroethylene carbonate; Graphite electrode; Solid electrolyte interphase; In-situ infrared spectroscopy; In-situ mass spectrometry (Winter, M. (81) 818)
- Lithium chemical diffusion coefficient**
- Tin oxide composite; Inert second phase; Li–Sn alloy (Huang, H. (81) 362)
- Lithium cobalt oxide**
- Lithium battery; Lithium-ion batteries; Lithium iron oxide; ⁵⁷Fe Mössbauer spectroscopy (Alcántara, R. (81) 547)
- Lithium batteries; Cathodes; Lithium nickel oxide (Jang, Y.-I. (81) 589)
- Lithium titanium phosphate; Spark-plasma-sintering; Ionic conductivity; All-solid-state lithium batteries (Kobayashi, Y. (81) 853)
- Room temperature molten salt; Lithium battery; Aluminium chloride; 1-Methyl-3-ethyl-imidazolium chloride; C₆H₅SO₂Cl (Fung, Y.S. (81) 891)
- Lithium deintercalation**
- Layered oxide; Molybdenum oxide (Kobayashi, H. (81) 524)
- Lithium deposition**
- Poly(ethylene-oxide) electrolytes; Cyclic ethers; Lithium ionophores (Lisowska-Oleksiak, A. (81) 813)
- Lithium electrode**
- Current density; SEM; Dendrite (Orsini, F. (81) 918)
- Lithium/electrolyte interface**
- Organic additives; Lithium–aluminium alloy; Interfacial resistance (Matsuda, Y. (81) 759)
- Lithium electrolytes**
- Electrical conductivity; Nuclear magnetic resonance; Activation volume; High pressure (Stallworth, P.E. (81) 739)
- Solvation effect; Pulsed-field gradient NMR (Saito, Y. (81) 772)
- Lithium imide**
- Plasticisers; Polyether electrolytes (Labrèche, C. (81) 130)
- Graphite; Coke; Gel; Kynar (Christie, L. (81) 378)
- Lithium insertion**
- Vanadates (Fuentes, A.F. (81) 264)
- Multi-walled carbon nanotubes; Microtexture; ⁷LiNMR (Leroux, F. (81) 317)
- Transition metal oxides; Vanadate; Vanadium oxide (Andrukaitis, E. (81) 651)
- Lithium insertion/extraction
- Pyrolyzed phenolic resin; Carbon electrodes (Wang, Z. (81) 328)
- Lithium insertion mechanism**
- Vanadium oxide; Cathode material; In situ X-ray diffraction; Deformation electron density refinement (Bergström, Ö. (81) 685)
- Lithium intercalated graphite**
- Anode; Electrochemical (Basu, S. (81) 200)
- Lithium intercalation**
- Li-ion battery; Graphite electrode; Thermal stability; SEI layer (Andersson, A.M. (81) 8)
- Ab initio; Gaussian; Coronene; Tetraboroanthracene; Carbon anodes (Scanlon, L.G. (81) 176)
- Graphite; Additives; Impurities; Cycling behavior; Irreversible charge loss (Joho, F. (81) 243)
- Tin oxide; ¹¹⁹Sn Mössbauer; Lithium-ion cells (Chouvin, J. (81) 277)
- Thiospinels; ⁵⁷Fe Mössbauer; Cations migration (Branci, C. (81) 282)
- Petroleum cokes; Multi-point N₂ gas adsorption analysis; Electron microscopies; X-ray diffraction (Tran, T.D. (81) 296)
- Li_{1-δ}Al_{1/4}Ni_{3/4}O₂ electrode; Current transient technique; Lithium-ion diffusion; Cation mixing (Pyun, S.-I. (81) 442)
- Lithium interface**
- Polymer electrolytes; Manganese cathode; Lithium metal polymer batteries (Mastragostino, M. (81) 729)
- Lithium ion**
- Ionic conductivity; Perovskite; Solid solution; Solid electrolyte; A-site deficient (Harada, Y. (81) 777)
- Lithium-ion**
- Batteries; AC impedance spectroscopy; Rechargeable; Mathematical model; Interfacial resistance (Fellner, J.P. (81) 867)
- Battery; Conductive additive; Metal fiber (Ahn, S. (81) 896)
- Lithium titanium oxide; Hybrid vehicle; Safety (Jansen, A.N. (81) 902)
- Thermal stability; Safety; Materials (Biensan, Ph. (81) 906)
- Lithium ion batteries**
- Fluoroethylene carbonate electrolyte; Graphite anodes (McMillan, R. (81) 20)
- Lithium-ion batteries**
- Cathodes; Lithium manganese oxides; Jahn–Teller effect; Local structure; EXAFS (Yamada, A. (81) 73)
- Solid-state redox potentials; Li[Me_{1/2}Mn_{3/2}]O₄ (Ohzuku, T. (81) 90)
- Lithium-alloy anode; Tin–antimony alloy; Nanocrystalline lithium anode (Besenhard, J.O. (81) 268)
- Lithium ion batteries**
- SnO anode; XRD; Electrochemical properties (Li, H. (81) 335)
- Lithium-ion batteries**
- Irreversible capacity; Passivation layer (Rubino, R.S. (81) 373)
- Ab initio calculation; Cathode materials; Spectroscopy (Ebina, T. (81) 393)
- Carbon anode; Non-graphitizable carbon; ⁷Li-NMR (Tatsumi, K. (81) 397)
- Manganese oxides; Capacity failure; Storage (Iwata, E. (81) 430)
- Manganese oxide; Diffraction; Synchrotron (Strobel, P. (81) 458)
- Lithium battery; Lithium cobalt oxide; Lithium iron oxide; ⁵⁷Fe Mössbauer spectroscopy (Alcántara, R. (81) 547)
- Lithium ion batteries**
- Lithium manganese spinel; Energy density; High-power performance; Low temperature performance; Cycle life (Bäuerlein, P. (81) 585)
- Lithium–manganese oxides; Large-tunnel structure (Yang, Y. (81) 637)
- Lithium-ion batteries**
- Microwave synthesis; LiMn₂O₄; Cathode material (Yan, H. (81) 647)
- Lithium ion batteries**
- Cathodes; Aluminium; Cobalt (Huang, H. (81) 690)
- Hydrothermal synthesis; Crystallinity (Lu, C.-H. (81) 696)
- Lithium-ion batteries**
- LiNi_{1-x}Co_xO₂; Mesocarbon microbeads (Gitzendanner, R.L. (81) 847)

- Lithium-ion battery
Silicon tin oxynitride (SiTON); Solder reflow; Microelectronics; Heat treatment; Hysteresis (Neudecker, B.J. (81) 27)
- Lithium ion battery
Cathode materials; Defect chemistry; Magnetic susceptibility; Electron spin resonance (Schoonman, J. (81) 44)
Cobalt oxide; Nickel-based oxide (Broussely, M. (81) 140)
- Lithium-ion battery
Energy storage; Electrochemical (Kodama, T. (81) 144)
Synthetic graphite; Modification (Liu, Z. (81) 187)
Anode; Silicon; Thin film (Bourderau, S. (81) 233)
- Lithium ion battery
Metal oxide cathodes; Organic electrolytes; Ac impedance (Morita, M. (81) 425)
- Lithium-ion battery
Lithium manganese oxide; STM; Capacity fading (Inaba, M. (81) 554)
- Lithium ion battery
Lithium nickelate; Cobalt; Cathode active material; Fluorine; Co-substitution (Kubo, K. (81) 599)
- Lithium-ion cell
Anode; Hard carbon; Structural analysis; Graphite; Soft carbon (Azuma, H. (81) 1)
Graphite electrode; SEI-film; Electrolyte decomposition; In situ mass spectrometry; In situ infrared spectroscopy; In situ Raman mapping (Novák, P. (81) 212)
Intercalation; Layered rocksalt; Cathode (Asakura, K. (81) 388)
- Lithium ion cell
Spinel lithium manganese oxide; Calorimetry; Capacity fading (Kobayashi, Y. (81) 463)
Safety; Rechargeable cell; Cellular phone (Tobishima, S.-i. (81) 882)
- Lithium-ion cell
Calorimetry; Staircase voltage step coulometry; Hard carbon (Saito, Y. (81) 913)
- Lithium-ion cells
Tin oxide; ¹¹⁹Sn Mössbauer; Lithium intercalation (Chouvin, J. (81) 277)
- Lithium-ion diffusion
Lithium intercalation; $\text{Li}_{1-\delta}\text{Al}_{1/4}\text{Ni}_{3/4}\text{O}_2$ electrode; Current transient technique; Cation mixing (Pyun, S.-I. (81) 442)
- Lithium ionophores
Poly(ethylene-oxide) electrolytes; Cyclic ethers; Lithium deposition (Lisowska-Oleksiak, A. (81) 813)
- Lithium ion secondary battery
In situ XAFS; Lithium manganese oxide; Spinel-type structure; Local structure (Shiraishi, Y. (81) 571)
- Lithium iron oxide
Lithium battery; Lithium-ion batteries; Lithium cobalt oxide; ⁵⁷Fe Mössbauer spectroscopy (Alcántara, R. (81) 547)
- Lithium manganese oxide
Lithium battery; Layered structure (Johnson, C.S. (81) 491)
X-ray absorption fine structure; Manganese oxidation state (Kwon, O.-S. (81) 510)
Lithium-ion battery; STM; Capacity fading (Inaba, M. (81) 554)
In situ XAFS; Spinel-type structure; Local structure; Lithium ion secondary battery (Shiraishi, Y. (81) 571)
Lithium batteries; Cathode material (Nakamura, H. (81) 632)
- Lithium–manganese oxide cathode
Rechargeable lithium battery; Cathode capacity loss (Nishimura, K. (81) 420)
- Lithium manganese oxides
Lithium-ion batteries; Cathodes; Jahn–Teller effect; Local structure; EXAFS (Yamada, A. (81) 73)
Spinel; Cation substitution; X-ray absorption fine structure spectroscopy; Computer simulation (Ammundsen, B. (81) 500)
- Lithium–manganese oxides
Lithium ion batteries; Large-tunnel structure (Yang, Y. (81) 637)
- Lithium manganese spinel
Lithium ion batteries; Energy density; High-power performance; Low temperature performance; Cycle life (Bauerlein, P. (81) 585)
- Lithium metal anode
Rechargeable lithium battery; Electrolyte temperature; Coulombic efficiency; Precycling; Ac impedance (Ishikawa, M. (81) 217)
Electrolyte; Solvation; Cycling efficiency; NMR (Hayashi, K. (81) 782)
- Lithium metal polymer batteries
Polymer electrolytes; Lithium interface; Manganese cathode (Mastragostino, M. (81) 729)
- Lithium metal salts
Hyperbranched polymer; Ionic conductivity (Itoh, T. (81) 824)
- Lithium microbattery
Carbon electrode; Carbon film; Polypyrrole (Kinoshita, K. (81) 170)
- Lithium nickelate
Positive electrode; Chemical delithiation; Acid leaching; Thermal decomposition mechanism (Arai, H. (81) 401)
Cobalt; Cathode active material; Fluorine; Lithium ion battery; Co-substitution (Kubo, K. (81) 599)
- Lithium nickelate–cobalt and manganese substituted
Secondary lithium cell; Cathode materials (Liu, Z. (81) 416)
- Lithium–nickel orthovanadate
Solution precipitation; Acetylacetonate; Cathode materials; Nickel; Vanadium; Lithium batteries (Fey, G.T.-K. (81) 467)
- Lithium nickel oxide
Lithium secondary batteries; Reaction with CO₂; Activation energy (Matsumoto, K. (81) 558)
Lithium batteries; Cathodes; Lithium cobalt oxide (Jang, Y.-I. (81) 589)
- Lithium polymer batteries
Polymer gel electrolyte; Polyacrylonitrile; Metallic lithium anode; Ac impedance; Surface analysis (Sotomura, T. (81) 192)
- Lithium polymer battery
Polymer electrolyte; Ionic conductivity; Electrode interface (Watanabe, M. (81) 786)
- Lithium rechargeable batteries
Sol–gel process; LiCoO₂; EXAFS; EVS (Yoon, W.-S. (81) 517)
- Lithium salts
Polymer electrolyte; Electrochemical stability (Alloin, F. (81) 795)
- Lithium secondary batteries
Lithium nickel oxide; Reaction with CO₂; Activation energy (Matsumoto, K. (81) 558)
Electric vehicles; Load leveling systems (Iwahori, T. (81) 872)
- Lithium secondary battery
Anode material; Coke carbon; Mesophase-pitch carbon; Surface modification (Sato, Y. (81) 182)
Anode material; Mg₂Ge; Mechanical alloying; Crystallinity (Sakaguchi, H. (81) 229)
- Lithium titanium oxide
Lithium-ion; Hybrid vehicle; Safety (Jansen, A.N. (81) 902)
- Lithium titanium phosphate
Spark-plasma-sintering; Ionic conductivity; Lithium cobalt oxide; All-solid-state lithium batteries (Kobayashi, Y. (81) 853)
- Lithium transport
 $\text{Li}_{1+\delta}[\text{Ti}_{2-y}\text{Li}_y]\text{O}_4$ electrode; Diffusion-controlled phase boundary movement; Three-stage current transient; Large potential stepping (Pyun, S.-I. (81) 248)
- Lithium trifluoromethanesulfonate
Photo-cross-linked polymer; Magnesium trifluoromethanesulfonate; Solid polymer electrolytes; Primary cell; Tetramethylammonium pentafluoroborate (Ikeda, S. (81) 720)
- $\text{Li}_{4/3}\text{Ti}_{5/3}\text{O}_4$
Electrochemical properties; Sol–gel (Bach, S. (81) 273)
- $\text{Li}_4\text{Ti}_5\text{O}_{12}$
Li-ion batteries; Anode; SPE (Zaghib, K. (81) 300)

- Load leveling systems
Lithium secondary batteries; Electric vehicles (Iwahori, T. (81) 872)
- Local structure
Lithium-ion batteries; Cathodes; Lithium manganese oxides; Jahn–Teller effect; EXAFS (Yamada, A. (81) 73)
In situ XAFS; Lithium manganese oxide; Spinel-type structure; Lithium ion secondary battery (Shiraishi, Y. (81) 571)
- Long cycling
Commercial lithium-ion cell; Gas generation mechanism; Electrolyte decomposition (Kumai, K. (81) 715)
- Low temperature performance
Lithium ion batteries; Lithium manganese spinel; Energy density; High-power performance; Cycle life (Bäuerlein, P. (81) 585)
- Macromonomer
Gel electrolyte; Interfacial resistance; Lithium (Kono, M. (81) 748)
- Magnesium trifluoromethanesulfonate
Photo-cross-linked polymer; Lithium trifluoromethanesulfonate; Solid polymer electrolytes; Primary cell; Tetramethylammonium pentatiodide (Ikeda, S. (81) 720)
- Magnetic susceptibility
Cathode materials; Defect chemistry; Lithium ion battery; Electron spin resonance (Schoonman, J. (81) 44)
- Manganese cathode
Polymer electrolytes; Lithium interface; Lithium metal polymer batteries (Mastragostino, M. (81) 729)
- Manganese dioxide
Lithium batteries; Sol–gel; Xerogel; Aerogel; Vanadium pentoxide (Owens, B.B. (81) 150)
- Manganese oxidation state
Lithium manganese oxide; X-ray absorption fine structure (Kwon, O.-S. (81) 510)
- Manganese oxide
Lithium-ion batteries; Diffraction; Synchrotron (Strobel, P. (81) 458)
- Manganese oxide cathode
Lithium batteries; Electric-power storage; Graphite anode (Tamura, K. (81) 156)
- Manganese oxides
Lithium-ion batteries; Capacity failure; Storage (Iwata, E. (81) 430)
- Materials
Lithium-ion; Thermal stability; Safety (Biensan, Ph. (81) 906)
- Mathematical model
Lithium-ion; Batteries; AC impedance spectroscopy; Rechargeable; Interfacial resistance (Fellner, J.P. (81) 867)
- Mechanical alloying
Lithium secondary battery; Anode material; Mg₂Ge; Crystallinity (Sakaguchi, H. (81) 229)
- Mechanical-milling
Lithium; Carbon; TEM (Salver-Disma, F. (81) 291)
- Mesocarbon microbeads
Lithium-ion batteries; LiNi_{1-x}Co_xO₂ (Gitzendanner, R.L. (81) 847)
- Mesophase-pitch carbon
Lithium secondary battery; Anode material; Coke carbon; Surface modification (Sato, Y. (81) 182)
- Mesoporous
Nanostructure; Lithium; Liquid crystal template; Polyoxyethylene ether (Whitehead, A.H. (81) 33)
- Metal fiber
Battery; Lithium-ion; Conductive additive (Ahn, S. (81) 896)
- Metal film
Rate enhancement; Graphite anode; Li-ion batteries; Vacuum evaporation (Takamura, T. (81) 368)
- Metallic lithium anode
Polymer gel electrolyte; Polyacrylonitrile; Lithium polymer batteries; Ac impedance; Surface analysis (Sotomura, T. (81) 192)
- Metal oxide cathodes
Lithium ion battery; Organic electrolytes; Ac impedance (Morita, M. (81) 425)
- 1-Methyl-3-ethyl-imidazolium chloride
Room temperature molten salt; Lithium battery; Aluminium chloride; Lithium cobalt oxide; C₆H₅SO₂Cl (Fung, Y.S. (81) 891)
- Mg₂Ge
Lithium secondary battery; Anode material; Mechanical alloying; Crystallinity (Sakaguchi, H. (81) 229)
- Microbatteries
LiCoO_x; Thin films (Polo da Fonseca, C.N. (81) 575)
- Microelectronics
Silicon tin oxynitride (SiTON); Lithium-ion battery; Solder reflow; Heat treatment; Hysteresis (Neudecker, B.J. (81) 27)
- Microtexture
Multi-walled carbon nanotubes; Lithium insertion; ⁷LiNMR (Leroux, F. (81) 317)
- Microwave synthesis
Lithium-ion batteries; LiMn₂O₄; Cathode material (Yan, H. (81) 647)
- Minimizing
Electrolyte solution; Batteries (Heider, U. (81) 119)
- Mixed-conductor matrix
Alloy; Li–Sn; Solid electrolyte matrix; Nucleation; Convertible metal oxides; Near-equilibrium; Composite microstructure (Huggins, R.A. (81) 13)
- γ-MnO₂
Electrodeposition; Characterization; Li insertion; Cycling behavior (Sarciaux, S. (81) 656)
γ-Li_xMnO₂; Li insertion process; Thermodynamics; Kinetics; Structural changes (Sarciaux, S. (81) 661)
- Modelling
Atomic structure; Lithium battery; Vanadium oxide (Benedek, R. (81) 487)
- Modification
Lithium-ion battery; Synthetic graphite (Liu, Z. (81) 187)
- Molybdenum oxide
Lithium deintercalation; Layered oxide (Kobayashi, H. (81) 524)
- Morphology
Lithium; Poly(vinylidene fluoride); Electrolyte (Osaka, T. (81) 734)
- Multinuclear complex
Intercalation; Prussian blue; Cyanometallate (Imanishi, N. (81) 530)
- Multi-point N₂ gas adsorption analysis
Lithium intercalation; Petroleum cokes; Electron microscopies; X-ray diffraction (Tran, T.D. (81) 296)
- Multi-walled carbon nanotubes
Microtexture; Lithium insertion; ⁷LiNMR (Leroux, F. (81) 317)
- Nanocomposites
Carbon; Lithium (Duclaux, L. (81) 323)
- Nanocrystalline lithium anode
Lithium-ion batteries; Lithium-alloy anode; Tin–antimony alloy (Besenhard, J.O. (81) 268)
- Nanometer anodes
SnO anodes; Impedance spectroscopy; Passivating film (Li, H. (81) 340)
- Nanostructure
Lithium; Mesoporous; Liquid crystal template; Polyoxyethylene ether (Whitehead, A.H. (81) 33)
- Nanostructured ceramic
Li⁺-ion conducting electrolyte; Li-ion batteries (Jak, M.J.G. (81) 808)
- Near-equilibrium
Alloy; Li–Sn; Mixed-conductor matrix; Solid electrolyte matrix; Nucleation; Convertible metal oxides; Composite microstructure (Huggins, R.A. (81) 13)
- Neutron diffraction
Titanate; Spinel; Li-ion battery; Structure (Robertson, A.D. (81) 352)

- LiNiO₂; Layered materials; Cation disorder; Rietveld analysis; Reversibility (Gover, R.K.B. (81) 535)
- Nickel
Lithium–nickel orthovanadate; Solution precipitation; Acetylacetonate; Cathode materials; Vanadium; Lithium batteries (Fey, G.T.-K. (81) 467)
- Nickel-based oxide
Lithium ion battery; Cobalt oxide (Broussely, M. (81) 140)
- Nickel oxide
Cobalt oxide; Structure resolution (Seguin, L. (81) 604)
- Niobates
Electrochemical lithium insertion; Lithium batteries (Martínez-de la Cruz, A. (81) 255)
- NMR
Ionic mobility; Lithium battery (Ward, I.M. (81) 700)
Electrolyte; Solvation; Lithium metal anode; Cycling efficiency (Hayashi, K. (81) 782)
Lithium batteries; Electrolyte solutions; EC; EMC; Diffusion (Capiglia, C. (81) 859)
- Nonaqueous electrolyte
Imide; LiCoO₂; Al; FTIR (Kanamura, K. (81) 123)
- Non-graphitizable carbon
Lithium-ion batteries; Carbon anode; ⁷Li-NMR (Tatsumi, K. (81) 397)
- Nuclear magnetic resonance
Interfacial impedance; Solvation; Organic electrolytes; Halogenated carbonates; Lithium battery (Katayama, H. (81) 705)
Electrical conductivity; Lithium electrolytes; Activation volume; High pressure (Stallworth, P.E. (81) 739)
- Nucleation
Alloy; Li–Sn; Mixed-conductor matrix; Solid electrolyte matrix; Convertible metal oxides; Near-equilibrium; Composite microstructure (Huggins, R.A. (81) 13)
- Ordering
LiCoO₂; First-principles total energies; Spinel; Li intercalation (Wolverton, C. (81) 680)
- Organic additives
Lithium–aluminium alloy; Lithium/electrolyte interface; Interfacial resistance (Matsuda, Y. (81) 759)
- Organic electrolytes
Lithium ion battery; Metal oxide cathodes; Ac impedance (Morita, M. (81) 425)
Nuclear magnetic resonance; Interfacial impedance; Solvation; Halogenated carbonates; Lithium battery (Katayama, H. (81) 705)
- Oxygen deficiency
Spinel; Li(Mn_{2-x}Li_x)O_{4-δ}; Jahn–Teller ion (Chida, Y. (81) 454)
- Particle size
Cathode material; LiMn₂O₄; Electrochemical characterization (Vacassy, R. (81) 621)
- Passivating film
SnO anodes; Nanometer anodes; Impedance spectroscopy (Li, H. (81) 340)
SnO anode; Electrolyte; FTIR; Cyclic voltammogram (Li, J. (81) 346)
- Passivating layer
Graphite; Intercalation; Electrochemical properties; TEM; EELS (Naji, A. (81) 207)
- Passivation layer
Lithium-ion batteries; Irreversible capacity (Rubino, R.S. (81) 373)
- Performance
Lithium batteries; Electric vehicle; Temperature; Safety (Hyung, Y.-E. (81) 842)
Li-ion; Cathode material; Properties; Prismatic (Ehrlich, G.M. (81) 863)
- Perovskite
Ionic conductivity; Lithium ion; Solid solution; Solid electrolyte; A-site deficient (Harada, Y. (81) 777)
- Petroleum cokes
Lithium intercalation; Multi-point N₂ gas adsorption analysis; Electron microscopies; X-ray diffraction (Tran, T.D. (81) 296)
- Phase inversion
Rechargeable lithium batteries; Polymer electrolyte; PVdF (Boudin, F. (81) 804)
- Photo-cross-linked polymer
Lithium trifluoromethanesulfonate; Magnesium trifluoromethanesulfonate; Solid polymer electrolytes; Primary cell; Tetramethylammonium pentafluoroborate (Ikeda, S. (81) 720)
- Physico-chemical characterization
Vanadium pentoxide; Electrodeposition; Electrochemical lithium intercalation (Potiron, E. (81) 666)
- Plasticisers
Lithium imide; Polyether electrolytes (Labrèche, C. (81) 130)
- Polyacrylonitrile
Polymer gel electrolyte; Lithium polymer batteries; Metallic lithium anode; Ac impedance; Surface analysis (Sotomura, T. (81) 192)
- Polyether electrolytes
Plasticisers; Lithium imide (Labrèche, C. (81) 130)
- Poly(ethylene-oxide) electrolytes
Cyclic ethers; Lithium ionophores; Lithium deposition (Lisowska-Oleksiak, A. (81) 813)
- Polymer blend
Ionic conductivity; AC impedance (Stephan, A.M. (81) 752)
- Polymer electrolyte
Charge–discharge; Interatomic distance (Kostov, S. (81) 709)
Boroxine ring; Ionic conductivity (Mehta, M.A. (81) 724)
Ionic conductivity; Electrode interface; Lithium polymer battery (Watanabe, M. (81) 786)
Lithium salts; Electrochemical stability (Alloin, F. (81) 795)
Rechargeable lithium batteries; PVdF; Phase inversion (Boudin, F. (81) 804)
In situ visualisation; Dendrites; Lithium; Batteries (Brissot, C. (81) 925)
- Polymer electrolytes
Lithium interface; Manganese cathode; Lithium metal polymer batteries (Mastragostino, M. (81) 729)
- Polymer gel electrolyte
Polyacrylonitrile; Lithium polymer batteries; Metallic lithium anode; Ac impedance; Surface analysis (Sotomura, T. (81) 192)
- Polyoxyethylene ether
Nanostructure; Lithium; Mesoporous; Liquid crystal template (Whitehead, A.H. (81) 33)
- Polypyrrole
Lithium microbattery; Carbon electrode; Carbon film (Kinoshita, K. (81) 170)
LiMn₂O₄; Cyclability; Composite cathode (Du Pasquier, A. (81) 607)
Conducting polymers; Batteries; Li-ion; Rocking chair (Otero, T.F. (81) 838)
- Poly(vinylidene fluoride)
Morphology; Lithium; Electrolyte (Osaka, T. (81) 734)
- Poly(vinylidene fluoride)
Hybrid electrolytes; Conductivity; Lithium batteries (Arcella, V. (81) 790)
- Positive electrode
Lithium nickelate; Chemical delithiation; Acid leaching; Thermal decomposition mechanism (Arai, H. (81) 401)
- Power density
Cell; Voltage (Wilson, A.M. (81) 642)
- Precycling
Rechargeable lithium battery; Lithium metal anode; Electrolyte temperature; Coulombic efficiency; Ac impedance (Ishikawa, M. (81) 217)

- Primary cell
Photo-cross-linked polymer; Lithium trifluoromethanesulfonate; Magnesium trifluoromethanesulfonate; Solid polymer electrolytes; Tetramethylammonium pentafluoroborate (Ikeda, S. (81) 720)
- Prismatic
Li-ion; Cathode material; Performance; Properties (Ehrlich, G.M. (81) 863)
- Properties
Li-ion; Cathode material; Performance; Prismatic (Ehrlich, G.M. (81) 863)
- Propylene carbonate
Conductance; LiBF₄; Diethyl carbonate (Moumouzias, G. (81) 830)
Ultrasound; Lithium; Interfacial resistance; Erosion; Cavitation (Birkin, P.R. (81) 833)
- Prussian blue
Intercalation; Multinuclear complex; Cyanometallate (Imanishi, N. (81) 530)
- Pulsed-field gradient NMR
Lithium electrolytes; Solvation effect (Saito, Y. (81) 772)
- PVdF
Rechargeable lithium batteries; Polymer electrolyte; Phase inversion (Boudin, F. (81) 804)
- Pyrolyzed phenolic resin
Lithium insertion/extraction; Carbon electrodes (Wang, Z. (81) 328)
- Quenching
Amorphous; Vanadate; Lithium; Insertion (Kawakita, J. (81) 448)
- Raman spectroscopy
Li_xMn₂O₄-based cathodes; Electrochemical intercalation (Huang, W. (81) 616)
- Rate enhancement
Metal film; Graphite anode; Li-ion batteries; Vacuum evaporation (Takamura, T. (81) 368)
- R&D
Lithium batteries; Europe (Broussely, M. (81) 137)
- Reaction mechanism
Synthesis; LiMnO₂ (Nitta, Y. (81) 49)
- Reaction with CO₂
Lithium secondary batteries; Lithium nickel oxide; Activation energy (Matsumoto, K. (81) 558)
- Reactivity of anions and solvents
Lithium batteries; Solvated electron; Layer formation (Rahner, D. (81) 358)
- Rechargeable
Electrode; Lithium (García-Alvarado, F. (81) 85)
Lithium-ion; Batteries; AC impedance spectroscopy; Mathematical model; Interfacial resistance (Fellner, J.P. (81) 867)
- Rechargeable cell
Lithium ion cell; Safety; Cellular phone (Tobishima, S.-i. (81) 882)
- Rechargeable lithium batteries
Gel alkylene oxide; Electrolytes (Matsuda, Y. (81) 762)
Polymer electrolyte; PVdF; Phase inversion (Boudin, F. (81) 804)
- Rechargeable lithium battery
Lithium metal anode; Electrolyte temperature; Coulombic efficiency; Precycling; AC impedance (Ishikawa, M. (81) 217)
Lithium–manganese oxide cathode; Cathode capacity loss (Nishimura, K. (81) 420)
- Rechargeable lithium-ion battery
Spinel phase LiMn₂O₄; Combustion method (Yang, W. (81) 412)
- Reversibility
LiNiO₂; Layered materials; Cation disorder; Rietveld analysis; Neutron diffraction (Gover, R.K.B. (81) 535)
- RF magnetron sputtering
Thin films; XPS analysis; Lithium batteries; Transition element oxy-sulfide (Martin, I. (81) 306)
- Rhombohedral
Graphite; Lithium; Intercalation; Exfoliation (Simon, B. (81) 312)
- Rietveld analysis
LiNiO₂; Layered materials; Cation disorder; Neutron diffraction; Reversibility (Gover, R.K.B. (81) 535)
- Rocking chair
Conducting polymers; Batteries; Li-ion; Polypyrrole (Otero, T.F. (81) 838)
- Room temperature molten salt
Lithium battery; Aluminium chloride; Lithium cobalt oxide; 1-Methyl-3-ethyl-imidazolium chloride; C₆H₅SO₂Cl (Fung, Y.S. (81) 891)
- Safety
Lithium batteries; Electric vehicle; Performance; Temperature (Huang, Y.-E. (81) 842)
Lithium ion cell; Rechargeable cell; Cellular phone (Tobishima, S.-i. (81) 882)
Lithium titanium oxide; Lithium-ion; Hybrid vehicle (Jansen, A.N. (81) 902)
Lithium-ion; Thermal stability; Materials (Biensan, Ph. (81) 906)
- Safety test
Li-ion battery; Electric vehicle (Kitoh, K. (81) 887)
- Secondary battery
Electric energy; Battery energy storage; Electric vehicle; Lithium battery (Yoda, S. (81) 162)
- Secondary lithium cell
Lithium nickelate–cobalt and manganese substituted; Cathode materials (Liu, Z. (81) 416)
- SEI-film
Lithium-ion cell; Graphite electrode; Electrolyte decomposition; In situ mass spectrometry; In situ infrared spectroscopy; In situ Raman mapping (Novák, P. (81) 212)
- SEI layer
Li-ion battery; Graphite electrode; Lithium intercalation; Thermal stability (Andersson, A.M. (81) 8)
- SEM
Lithium electrode; Current density; Dendrite (Orsini, F. (81) 918)
- Silicide
Battery; Lithium; Alloy; Anode; High capacity; Cycling (Weydanz, W.J. (81) 237)
- Silicon
Lithium-ion battery; Anode; Thin film (Bourderau, S. (81) 233)
- Silicon tin oxynitride (SiTON)
Lithium-ion battery; Solder reflow; Microelectronics; Heat treatment; Hysteresis (Neudecker, B.J. (81) 27)
- ¹¹⁹Sn Mössbauer
Tin oxide; Lithium intercalation; Lithium-ion cells (Chouvin, J. (81) 277)
- SnO anode
XRD; Lithium ion batteries; Electrochemical properties (Li, H. (81) 335)
Electrolyte; Passivating film; FTIR; Cyclic voltammogram (Li, J. (81) 346)
- SnO anodes
Nanometer anodes; Impedance spectroscopy; Passivating film (Li, H. (81) 340)
- Soft carbon
Lithium-ion cell; Anode; Hard carbon; Structural analysis; Graphite (Azuma, H. (81) 1)

- Solder reflow
Silicon tin oxynitride (SiTON); Lithium-ion battery; Microelectronics; Heat treatment; Hysteresis (Neudecker, B.J. (81) 27)
- Sol–gel
Lithium batteries; Xerogel; Aerogel; Vanadium pentoxide; Manganese dioxide (Owens, B.B. (81) 150)
Electrochemical properties; $\text{Li}_{4/3}\text{Ti}_{5/3}\text{O}_4$ (Bach, S. (81) 273)
- Sol–gel process
 LiCoO_2 ; Lithium rechargeable batteries; EXAFS; EVS (Yoon, W.-S. (81) 517)
- Sol–gel synthesis
Lithium batteries; Vanadium pentoxide; Bronze; Electrochemical insertion; Cesium (Grégoire, G. (81) 612)
- Solid electrolyte
Ionic conductivity; Lithium ion; Perovskite; Solid solution; A-site deficient (Harada, Y. (81) 777)
- Solid electrolyte interphase
Lithium battery electrolyte; Chloroethylene carbonate; Graphite electrode; In-situ infrared spectroscopy; In-situ mass spectrometry (Winter, M. (81) 818)
- Solid electrolyte matrix
Alloy; Li–Sn; Mixed-conductor matrix; Nucleation; Convertible metal oxides; Near-equilibrium; Composite microstructure (Huggins, R.A. (81) 13)
- Solid polymer electrolytes
Photo-cross-linked polymer; Lithium trifluoromethanesulfonate; Magnesium trifluoromethanesulfonate; Primary cell; Tetramethylammonium pentafluoroborate (Ikeda, S. (81) 720)
- Solid solution
Ionic conductivity; Lithium ion; Perovskite; Solid electrolyte; A-site deficient (Harada, Y. (81) 777)
- Solid-state redox potentials
 $\text{Li}[\text{Me}_{1/2}\text{Mn}_{3/2}]\text{O}_4$; Lithium-ion batteries (Ohzuku, T. (81) 90)
- Solution precipitation
Lithium–nickel orthovanadate; Acetylacetonate; Cathode materials; Nickel; Vanadium; Lithium batteries (Fey, G.T.-K. (81) 467)
- Solvated electron
Lithium batteries; Reactivity of anions and solvents; Layer formation (Rahner, D. (81) 358)
- Solvation
Nuclear magnetic resonance; Interfacial impedance; Organic electrolytes; Halogenated carbonates; Lithium battery (Katayama, H. (81) 705)
Electrolyte; Lithium metal anode; Cycling efficiency; NMR (Hayashi, K. (81) 782)
- Solvation effect
Lithium electrolytes; Pulsed-field gradient NMR (Saito, Y. (81) 772)
- Spark-plasma-sintering
Lithium titanium phosphate; Ionic conductivity; Lithium cobalt oxide; All-solid-state lithium batteries (Kobayashi, Y. (81) 853)
- SPE
Li-ion batteries; Anode; $\text{Li}_4\text{Ti}_5\text{O}_{12}$ (Zaghib, K. (81) 300)
- Spectroscopy
Ab initio calculation; Cathode materials; Lithium-ion batteries (Ebina, T. (81) 393)
- Spinel
Titanate; Li-ion battery; Neutron diffraction; Structure (Robertson, A.D. (81) 352)
Oxygen deficiency; $\text{Li}(\text{Mn}_{2-x}\text{Li}_x)\text{O}_{4-\delta}$; Jahn–Teller ion (Chida, Y. (81) 454)
Lithium manganese oxides; Cation substitution; X-ray absorption fine structure spectroscopy; Computer simulation (Ammundsen, B. (81) 500)
Cubic; Tetragonal (Kanno, R. (81) 542)
 LiCoO_2 ; Ordering; First-principles total energies; Li intercalation (Wolverton, C. (81) 680)
- Spinel electrode
 $\text{Li}_x\text{Mn}_2\text{O}_4$; XRD (Aurbach, D. (81) 472)
 $\text{Li}/\text{Li}_x[\text{Mn}_2]\text{O}_4$; Structural fatigue (Shao-Horn, Y. (81) 496)
- Spinel lithium manganese oxide
Lithium ion cell; Calorimetry; Capacity fading (Kobayashi, Y. (81) 463)
- Spinel phase LiMn_2O_4
Rechargeable lithium-ion battery; Combustion method (Yang, W. (81) 412)
- Spinel-type structure
In situ XAFS; Lithium manganese oxide; Local structure; Lithium ion secondary battery (Shiraishi, Y. (81) 571)
- Sputtering
Vanadium oxide; Thin film; Electrochemical quartz crystal microbalance; Lithium battery (Koike, S. (81) 581)
- Stability
Lithium battery; Electrodes; Structure (Thackeray, M.M. (81) 60)
- Staircase voltage step coulometry
Lithium-ion cell; Calorimetry; Hard carbon (Saito, Y. (81) 913)
- STM
Lithium-ion battery; Lithium manganese oxide; Capacity fading (Inaba, M. (81) 554)
- Storage
Lithium-ion batteries; Manganese oxides; Capacity failure (Iwata, E. (81) 430)
- Structural analysis
Lithium-ion cell; Anode; Hard carbon; Graphite; Soft carbon (Azuma, H. (81) 1)
- Structural changes
 $\gamma\text{-MnO}_2$; $\gamma\text{-Li}_x\text{MnO}_2$; Li insertion process; Thermodynamics; Kinetics (Sarciaux, S. (81) 661)
- Structural characteristics
Lithium batteries; Vanadium oxide cathodes; Electrochemical behavior; Li-ion diffusion coefficient (Shembel, E. (81) 480)
- Structural fatigue
 $\text{Li}/\text{Li}_x[\text{Mn}_2]\text{O}_4$; Spinel electrode (Shao-Horn, Y. (81) 496)
- Structure
Lithium battery; Electrodes; Stability (Thackeray, M.M. (81) 60)
Titanate; Spinel; Li-ion battery; Neutron diffraction (Robertson, A.D. (81) 352)
 $\text{Li}_2\text{Cr}_y\text{Mn}_{2-y}\text{O}_4$; Electrochemistry (Davidson, I.J. (81) 406)
- Structure resolution
Nickel oxide; Cobalt oxide (Seguin, L. (81) 604)
- Surface analysis
Polymer gel electrolyte; Polyacrylonitrile; Lithium polymer batteries; Metallic lithium anode; Ac impedance (Sotomura, T. (81) 192)
- Surface modification
Lithium secondary battery; Anode material; Coke carbon; Mesophase-pitch carbon (Sato, Y. (81) 182)
- Surface treatment
Active carbon fiber; Faradaic adsorption; Li-ion battery; Anode (Takasu, R. (81) 224)
- Synchrotron
Lithium-ion batteries; Manganese oxide; Diffraction (Strobel, P. (81) 458)
- Synthesis
Reaction mechanism; LiMnO_2 (Nitta, Y. (81) 49)
- Synthetic graphite
Lithium-ion battery; Modification (Liu, Z. (81) 187)
- TEM
Graphite; Intercalation; Passivating layer; Electrochemical properties; EELS (Naji, A. (81) 207)
Lithium; Carbon; Mechanical-milling (Salver-Disma, F. (81) 291)

- Temperature
Lithium batteries; Electric vehicle; Performance; Safety (Hyung, Y.-E. (81) 842)
- Tetraboroanthracene
Ab initio; Gaussian; Lithium intercalation; Coronene; Carbon anodes (Scanlon, L.G. (81) 176)
- Tetragonal
Spinel; Cubic (Kanno, R. (81) 542)
- Tetramethylammonium pentaiodide
Photo-cross-linked polymer; Lithium trifluoromethanesulfonate; Magnesium trifluoromethanesulfonate; Solid polymer electrolytes; Primary cell (Ikeda, S. (81) 720)
- Thermal decomposition mechanism
Positive electrode; Lithium nickelate; Chemical delithiation; Acid leaching (Arai, H. (81) 401)
- Thermal stability
Li-ion battery; Graphite electrode; Lithium intercalation; SEI layer (Andersson, A.M. (81) 8)
Lithium-ion; Safety; Materials (Biensan, Ph. (81) 906)
- Thermodynamics
 γ - MnO_2 ; γ - Li_xMnO_2 ; Li insertion process; Kinetics; Structural changes (Sarciaux, S. (81) 661)
- Thin film
Lithium-ion battery; Anode; Silicon (Bourderau, S. (81) 233)
Vanadium oxide; Electrochemical quartz crystal microbalance; Sputtering; Lithium battery (Koike, S. (81) 581)
- Thin film cathodes
 LiCoO_2 ; $\text{LiCo}_{0.5}\text{Al}_{0.5}\text{O}_2$; Li-ion batteries (Perkins, J.D. (81) 675)
- Thin films
XPS analysis; Lithium batteries; RF magnetron sputtering; Transition element oxysulfide (Martin, I. (81) 306)
 LiCoO_x ; Microbatteries (Polo da Fonseca, C.N. (81) 575)
- Thiospinels
Lithium intercalation; ^{57}Fe Mössbauer; Cations migration (Branci, C. (81) 282)
- Three-stage current transient
 $\text{Li}_{1+\delta}[\text{Ti}_{2-y}\text{Li}_y]\text{O}_4$ electrode; Lithium transport; Diffusion-controlled phase boundary movement; Large potential stepping (Pyun, S.-I. (81) 248)
- Tin alloy
Lithium battery; Anode; Intermetallic (Kepler, K.D. (81) 383)
- Tin–antimony alloy
Lithium-ion batteries; Lithium-alloy anode; Nanocrystalline lithium anode (Besenhard, J.O. (81) 268)
- Tin oxide
 ^{119}Sn Mössbauer; Lithium intercalation; Lithium-ion cells (Chouvin, J. (81) 277)
- Tin oxide composite
Inert second phase; Li–Sn alloy; Lithium chemical diffusion coefficient (Huang, H. (81) 362)
- Titanate
Spinel; Li-ion battery; Neutron diffraction; Structure (Robertson, A.D. (81) 352)
- Titanium oxide
Lithium battery; Hollandite (Noailles, L.D. (81) 259)
- Transference number
Gel polyelectrolytes; Impedance spectroscopy; dc polarisation; Interface passivation; Equivalent circuit (Krok, F. (81) 766)
- Transition element oxysulfide
Thin films; XPS analysis; Lithium batteries; RF magnetron sputtering (Martin, I. (81) 306)
- Transition metal oxides
Lithium insertion; Vanadate; Vanadium oxide (Andrukaitis, E. (81) 651)
- Tunnel structure
Iron oxy-hydroxide; Lithium battery; XPS (Amine, K. (81) 221)
- Ultrasound
Lithium; Interfacial resistance; Erosion; Cavitation; Propylene carbonate (Birkin, P.R. (81) 833)
- Vacuum evaporation
Rate enhancement; Metal film; Graphite anode; Li-ion batteries (Takamura, T. (81) 368)
- Vanadate
Amorphous; Quenching; Lithium; Insertion (Kawakita, J. (81) 448)
Lithium insertion; Transition metal oxides; Vanadium oxide (Andrukaitis, E. (81) 651)
- Vanadates
Chimie douce; Anode material; Li-ion battery (Denis, S. (81) 79)
Lithium insertion (Fuentes, A.F. (81) 264)
- Vanadium
Lithium–nickel orthovanadate; Solution precipitation; Acetylacetonate; Cathode materials; Nickel; Lithium batteries (Fey, G.T.-K. (81) 467)
- Vanadium oxide
Atomic structure; Lithium battery; Modelling (Benedek, R. (81) 487)
Thin film; Electrochemical quartz crystal microbalance; Sputtering; Lithium battery (Koike, S. (81) 581)
Lithium insertion; Transition metal oxides; Vanadate (Andrukaitis, E. (81) 651)
Cathode material; Lithium insertion mechanism; In situ X-ray diffraction; Deformation electron density refinement (Bergström, Ö. (81) 685)
- Vanadium oxide cathodes
Lithium batteries; Structural characteristics; Electrochemical behavior; Li-ion diffusion coefficient (Shembel, E. (81) 480)
- Vanadium pentoxide
Lithium batteries; Sol–gel; Xerogel; Aerogel; Manganese dioxide (Owens, B.B. (81) 150)
Lithium batteries; Bronze; Sol–gel synthesis; Electrochemical insertion; Cesium (Grégoire, G. (81) 612)
Electrodeposition; Physico-chemical characterization; Electrochemical lithium intercalation (Potiron, E. (81) 666)
Lithium batteries; Chemical lithiation (Garcia, B. (81) 670)
- Voltage
Cell; Power density (Wilson, A.M. (81) 642)
- Xerogel
Lithium batteries; Sol–gel; Aerogel; Vanadium pentoxide; Manganese dioxide (Owens, B.B. (81) 150)
- XPS
Iron oxy-hydroxide; Tunnel structure; Lithium battery (Amine, K. (81) 221)
- XPS analysis
Thin films; Lithium batteries; RF magnetron sputtering; Transition element oxysulfide (Martin, I. (81) 306)
- X-ray absorption fine structure spectroscopy
Spinel; Lithium manganese oxides; Cation substitution; Computer simulation (Ammundsen, B. (81) 500)
- X-ray absorption fine structure
Lithium manganese oxide; Manganese oxidation state (Kwon, O.-S. (81) 510)
- X-ray diffraction
Lithium intercalation; Petroleum cokes; Multi-point N_2 gas adsorption analysis; Electron microscopies (Tran, T.D. (81) 296)
- X-ray photoelectron spectroscopy
Li-ion batteries; Graphite anode; High-temperature performance (Andersson, A.M. (81) 286)
- XRD
SnO anode; Lithium ion batteries; Electrochemical properties (Li, H. (81) 335)
 $\text{Li}_x\text{Mn}_2\text{O}_4$; Spinel electrode (Aurbach, D. (81) 472)
