

Preface

It is a sign of the current high level of enthusiasm for fuel cell research that the very popular Grove symposium, which is held once every two years, can now be supplemented, during the 'off-year', by an additional fuel cell event. Organized along similar lines to the 'Grove' this event was held in Amsterdam 25 and 26 September 2002. 41 oral presentations and 117 poster papers ensured that this was a strong meeting covering all aspects of fuel cell research, engineering and applications. Over 50 of the papers presented during the programme were offered and deemed suitable for publication and these are collected together in this special issue of the Journal of Power Sources.
