

Subject Index of Volume 143

- Air battery anode
Nano-carbon; Iron/carbon nanocomposite (Hang, B.T. (143) 256)
- Air stoichiometry
Proton exchange membrane fuel cell; Pressure ratio; Cell voltage;
Relative humidity; Power loss (Kazim, A. (143) 9)
- Alkaline direct borohydride fuel cell
Hydrogen peroxide; Sodium borohydride (Choudhury, N.A. (143) 1)
- Anatase
Nano-sized TiO₂; Electrochemical lithium insertion (Liu, Z. (143) 231)
- Cathode chamber
PEM fuel cell; Pressure and velocity distributions (Maddirala, V.K. (143) 173)
- Cathode material
Li-ion battery; Co-precipitation method; Cobalt doping; Lithium nickel oxide; Discharge capacity (Liao, P.Y. (143) 212)
- Cell voltage
Proton exchange membrane fuel cell; Pressure ratio; Air stoichiometry;
Relative humidity; Power loss (Kazim, A. (143) 9)
- CFD
Membraneless fuel cell; Microfluidic fuel cell; Laminar flow;
Modelling; Simulation (Bazylak, A. (143) 57)
- Channel width fraction
PEM fuel cell; Transient response; Gas transport; Porosity (Yan, W.-M. (143) 48)
- (Co/Mg)-coated NiO cathode
Solubility; MCFC; Sol-gel method (Park, E. (143) 84)
- Cobalt doping
Li-ion battery; Cathode material; Co-precipitation method; Lithium nickel oxide; Discharge capacity (Liao, P.Y. (143) 212)
- Cogeneration
Efficiency; Exergy; Optimization; PEFC; Fuel cell (Saidi, M.H. (143) 179)
- Composite cathode
PEO; LiBETI; Lithium polymer battery; Solvent-free electrolyte;
Hot-pressing (Appetecchi, G.B. (143) 236)
- Convection fuel cells
Proton exchange membrane; Fuel cells; Self-humidification; Fuel cell stability (Dhar, H.P. (143) 185)
- Co-precipitation method
Li-ion battery; Cathode material; Cobalt doping; Lithium nickel oxide;
Discharge capacity (Liao, P.Y. (143) 212)
- Cracking
Li-batteries; Fracture mechanics (Aifantis, K.E. (143) 203)
- Current density distribution
Fuel cells; Magnetotomography (Hauer, K.-H. (143) 67)
- DC conductivity
Poco graphite conductivity; PEM fuel cells (Cunningham, N. (143) 93)
- DC/DC converter
Supercapacitors modeling; Energy sources control; Energy management (Marie-Francoise, J.N. (143) 275)
- Deterioration mechanism
Nickel-metal hydride battery; Self-discharge; Storage characteristics;
Hybrid electric vehicle (Shinyama, K. (143) 265)
- Diagnostic tools
Fuel cells; Water management (Stumper, J. (143) 150)
- Diffusion in porous layer
Proton exchange membrane fuel cell; Partially blocked fuel channel;
Reactant gas transport; Pressure drop (Soong, C.Y. (143) 36)
- Direct methanol fuel cells
Polyphenylene oxide; Phosphomolybdic acid; PPO-PMA films;
Methanol cross-over (Sauk, J. (143) 136)
- Direct methanol
Fuel cell; Stoichiometry; Operating conditions; Engineering; Polymer electrolyte (Cowart, J.S. (143) 30)
- Discharge capacity
Li-ion battery; Cathode material; Co-precipitation method; Cobalt doping; Lithium nickel oxide (Liao, P.Y. (143) 212)
- Distributed generation
Fuel cell program; Solid oxide fuel cells; SOFCs; Fuel cell/turbine hybrid (Williams, M.C. (143) 191)
- Efficiency
Cogeneration; Exergy; Optimization; PEFC; Fuel cell (Saidi, M.H. (143) 179)
- Electrical efficiency model
SOFC; In situ hydrocarbon reforming; Minimization of free energy (Sidwell, R.W. (143) 166)
- Electrochemical impedance
LiBOB electrolytes; Graphite/electrolyte interface (Xu, K. (143) 197)
- Electrochemical lithium insertion
Nano-sized TiO₂; Anatase (Liu, Z. (143) 231)
- Electrochemical performance
Spherical Al-substituted α -Ni(OH)₂; Structure (Chen, H. (143) 243)
- Electrochemical recycling
Recycling; Zinc recovery; Spent battery; Zinc (Freitas, M.B.J.G. (143) 270)
- Electrodeposition
Methanol oxidation; Thermal decomposition; Fuel cell; Platinum; Ruthenium (Allen, R.G. (143) 142)
- Energy management
Supercapacitors modeling; DC/DC converter; Energy sources control (Marie-Francoise, J.N. (143) 275)
- Energy sources control
Supercapacitors modeling; DC/DC converter; Energy management (Marie-Francoise, J.N. (143) 275)
- Engineering
Direct methanol; Fuel cell; Stoichiometry; Operating conditions; Polymer electrolyte (Cowart, J.S. (143) 30)
- Exergy
Cogeneration; Efficiency; Optimization; PEFC; Fuel cell (Saidi, M.H. (143) 179)

- Fracture mechanics
Li-batteries; Cracking (Aifantis, K.E. (143) 203)
- Fuel cell program
Solid oxide fuel cells; SOFCs; Fuel cell/turbine hybrid; Distributed generation (Williams, M.C. (143) 191)
- Fuel cell stability
Proton exchange membrane; Fuel cells; Self-humidification; Convection fuel cells (Dhar, H.P. (143) 185)
- Fuel cell/turbine hybrid
Solid oxide fuel cells; SOFCs; Distributed generation (Williams, M.C. (143) 191)
- Fuel cell
Cogeneration; Efficiency; Exergy; Optimization; PEFC (Saidi, M.H. (143) 179)
- Fuel cell
Direct methanol; Stoichiometry; Operating conditions; Engineering; Polymer electrolyte (Cowart, J.S. (143) 30)
- Fuel cell
Methanol oxidation; Thermal decomposition; Electrodeposition; Platinum; Ruthenium (Allen, R.G. (143) 142)
- Fuel cells
Diagnostic tools; Water management (Stumper, J. (143) 150)
- Fuel cells
Magnetotomography; Current density distribution (Hauer, K.-H. (143) 67)
- Fuel cells
Proton exchange membrane (PEM); Two-phase flow; Water management (Sun, H. (143) 125)
- Fuel cells
Proton exchange membrane; Self-humidification; Fuel cell stability; Convection fuel cells (Dhar, H.P. (143) 185)
- Gas transport
PEM fuel cell; Transient response; Channel width fraction; Porosity (Yan, W.-M. (143) 48)
- Graphite/electrolyte interface
LiBOB electrolytes; Electrochemical impedance (Xu, K. (143) 197)
- High temperature insulation
Solid oxide fuel cell; Thermal modeling; Radiation heat transfer (Damm, D.L. (143) 158)
- Hot-pressing
PEO; LiBETI; Lithium polymer battery; Solvent-free electrolyte; Composite cathode (Appetecchi, G.B. (143) 236)
- Hybrid electric vehicle
Nickel-metal hydride battery; Self-discharge; Storage characteristics; Deterioration mechanism (Shinyama, K. (143) 265)
- Hydrogen gas
Sodium borohydride; Platinum; Ruthenium; Lithium cobalt oxide (Krishnan, P. (143) 17)
- Hydrogen peroxide
Alkaline direct borohydride fuel cell; Sodium borohydride (Choudhury, N.A. (143) 1)
- In situ hydrocarbon reforming
SOFC; Electrical efficiency model; Minimization of free energy (Sidwell, R.W. (143) 166)
- Intermetallic compounds
 Ni_3Sn_4 ; Lithium cell (Amadei, I. (143) 227)
- Iron/carbon nanocomposite
Nano-carbon; Air battery anode (Hang, B.T. (143) 256)
- Laminar flow
Membraneless fuel cell; Microfluidic fuel cell; CFD; Modelling; Simulation (Bazylak, A. (143) 57)
- LiAlO_2 electrolyte matrix
Molten carbonate fuel cell; Phase transformation; Particle growth; Solubility; Stability (Kim, S.D. (143) 24)
- Li-batteries
Fracture mechanics; Cracking (Aifantis, K.E. (143) 203)
- LiBETI
PEO; Lithium polymer battery; Solvent-free electrolyte; Hot-pressing; Composite cathode (Appetecchi, G.B. (143) 236)
- LiBOB electrolytes
Electrochemical impedance; Graphite/electrolyte interface (Xu, K. (143) 197)
- Li-ion battery
Cathode material; Co-precipitation method; Cobalt doping; Lithium nickel oxide; Discharge capacity (Liao, P.Y. (143) 212)
- Lithium cell
 Ni_3Sn_4 ; Intermetallic compounds (Amadei, I. (143) 227)
- Lithium cobalt oxide
Sodium borohydride; Platinum; Ruthenium; Hydrogen gas (Krishnan, P. (143) 17)
- Lithium nickel oxide
Li-ion battery; Cathode material; Co-precipitation method; Cobalt doping; Discharge capacity (Liao, P.Y. (143) 212)
- Lithium polymer battery
PEO; LiBETI; Solvent-free electrolyte; Hot-pressing; Composite cathode (Appetecchi, G.B. (143) 236)
- Local current density
PEMFC; Mathematical modeling; Water management; Parametric studies (Lum, K.W. (143) 103)
- Magnetotomography
Fuel cells; Current density distribution (Hauer, K.-H. (143) 67)
- Mathematical modeling
PEMFC; Water management; Local current density; Parametric studies (Lum, K.W. (143) 103)
- MCFC
Solubility; (Co/Mg)-coated NiO cathode; Sol-gel method (Park, E. (143) 84)
- Membraneless fuel cell
Microfluidic fuel cell; CFD; Laminar flow; Modelling; Simulation (Bazylak, A. (143) 57)
- Methanol cross-over
Polyphenylene oxide; Phosphomolybdic acid; PPO-PMA films; Direct methanol fuel cells (Sauk, J. (143) 136)
- Methanol oxidation
Thermal decomposition; Electrodeposition; Fuel cell; Platinum; Ruthenium (Allen, R.G. (143) 142)
- Microfluidic fuel cell
Membraneless fuel cell; CFD; Laminar flow; Modelling; Simulation (Bazylak, A. (143) 57)
- Minimization of free energy
SOFC; Electrical efficiency model; In situ hydrocarbon reforming (Sidwell, R.W. (143) 166)
- Modelling
Membraneless fuel cell; Microfluidic fuel cell; CFD; Laminar flow; Simulation (Bazylak, A. (143) 57)
- MOLB
SOFC; Transport (Hwang, J.J. (143) 75)
- Molten carbonate fuel cell
 LiAlO_2 electrolyte matrix; Phase transformation; Particle growth; Solubility; Stability (Kim, S.D. (143) 24)
- Nano-carbon
Iron/carbon nanocomposite; Air battery anode (Hang, B.T. (143) 256)
- Nano-sized TiO_2
Anatase; Electrochemical lithium insertion (Liu, Z. (143) 231)
- Nickel-metal hydride battery
Self-discharge; Storage characteristics; Hybrid electric vehicle; Deterioration mechanism (Shinyama, K. (143) 265)
- Ni_3Sn_4
Lithium cell; Intermetallic compounds (Amadei, I. (143) 227)

- Operating conditions
Direct methanol; Fuel cell; Stoichiometry; Engineering; Polymer electrolyte (Cowart, J.S. (143) 30)
- Optimization
Cogeneration; Efficiency; Exergy; PEFC; Fuel cell (Saidi, M.H. (143) 179)
- Parametric studies
PEMFC; Mathematical modeling; Water management; Local current density (Lum, K.W. (143) 103)
- Partially blocked fuel channel
Proton exchange membrane fuel cell; Reactant gas transport; Pressure drop; Diffusion in porous layer (Soong, C.Y. (143) 36)
- Particle growth
Molten carbonate fuel cell; LiAlO₂ electrolyte matrix; Phase transformation; Solubility; Stability (Kim, S.D. (143) 24)
- PEFC
Cogeneration; Efficiency; Exergy; Optimization; Fuel cell (Saidi, M.H. (143) 179)
- PEM fuel cell
Cathode chamber; Pressure and velocity distributions (Maddirala, V.K. (143) 173)
- PEM fuel cell
Transient response; Gas transport; Channel width fraction; Porosity (Yan, W.-M. (143) 48)
- PEM fuel cells
DC conductivity; Poco graphite conductivity (Cunningham, N. (143) 93)
- PEMFC
Mathematical modeling; Water management; Local current density; Parametric studies (Lum, K.W. (143) 103)
- PEO
LiBETI; Lithium polymer battery; Solvent-free electrolyte; Hot-pressing; Composite cathode (Appetecchi, G.B. (143) 236)
- Phase transformation
Molten carbonate fuel cell; LiAlO₂ electrolyte matrix; Particle growth; Solubility; Stability (Kim, S.D. (143) 24)
- Phosphomolybdic acid
Polyphenylene oxide; PPO-PMA films; Direct methanol fuel cells; Methanol cross-over (Sauk, J. (143) 136)
- Platinum
Methanol oxidation; Thermal decomposition; Electrodeposition; Fuel cell; Ruthenium (Allen, R.G. (143) 142)
- Platinum
Sodium borohydride; Ruthenium; Lithium cobalt oxide; Hydrogen gas (Krishnan, P. (143) 17)
- Poco graphite conductivity
DC conductivity; PEM fuel cells (Cunningham, N. (143) 93)
- Polymer electrolyte
Direct methanol; Fuel cell; Stoichiometry; Operating conditions; Engineering (Cowart, J.S. (143) 30)
- Polyphenylene oxide
Phosphomolybdic acid; PPO-PMA films; Direct methanol fuel cells; Methanol cross-over (Sauk, J. (143) 136)
- Porosity
PEM fuel cell; Transient response; Gas transport; Channel width fraction (Yan, W.-M. (143) 48)
- Porous membrane
Solvent-free polymer electrolyte; Thermal annealing; Rechargeable lithium batteries (Jeon, J.-D. (143) 219)
- Power loss
Proton exchange membrane fuel cell; Pressure ratio; Air stoichiometry; Cell voltage; Relative humidity (Kazim, A. (143) 9)
- PPO-PMA films
Polyphenylene oxide; Phosphomolybdic acid; Direct methanol fuel cells; Methanol cross-over (Sauk, J. (143) 136)
- Pressure and velocity distributions
PEM fuel cell; Cathode chamber (Maddirala, V.K. (143) 173)
- Pressure drop
Proton exchange membrane fuel cell; Partially blocked fuel channel; Reactant gas transport; Diffusion in porous layer (Soong, C.Y. (143) 36)
- Pressure ratio
Proton exchange membrane fuel cell; Air stoichiometry; Cell voltage; Relative humidity; Power loss (Kazim, A. (143) 9)
- Proton exchange membrane (PEM)
Fuel cells; Two-phase flow; Water management (Sun, H. (143) 125)
- Proton exchange membrane fuel cell
Partially blocked fuel channel; Reactant gas transport; Pressure drop; Diffusion in porous layer (Soong, C.Y. (143) 36)
- Proton exchange membrane fuel cell
Pressure ratio; Air stoichiometry; Cell voltage; Relative humidity; Power loss (Kazim, A. (143) 9)
- Proton exchange membrane
Fuel cells; Self-humidification; Fuel cell stability; Convection fuel cells (Dhar, H.P. (143) 185)
- Radiation heat transfer
Solid oxide fuel cell; Thermal modeling; High temperature insulation (Damm, D.L. (143) 158)
- Reactant gas transport
Proton exchange membrane fuel cell; Partially blocked fuel channel; Pressure drop; Diffusion in porous layer (Soong, C.Y. (143) 36)
- Rechargeable lithium batteries
Solvent-free polymer electrolyte; Porous membrane; Thermal annealing (Jeon, J.-D. (143) 219)
- Recycling
Zinc recovery; Spent battery; Zinc; Electrochemical recycling (Freitas, M.B.J.G. (143) 270)
- Relative humidity
Proton exchange membrane fuel cell; Pressure ratio; Air stoichiometry; Cell voltage; Power loss (Kazim, A. (143) 9)
- Ruthenium
Methanol oxidation; Thermal decomposition; Electrodeposition; Fuel cell; Platinum (Allen, R.G. (143) 142)
- Ruthenium
Sodium borohydride; Platinum; Lithium cobalt oxide; Hydrogen gas (Krishnan, P. (143) 17)
- Self-discharge
Nickel-metal hydride battery; Storage characteristics; Hybrid electric vehicle; Deterioration mechanism (Shinyama, K. (143) 265)
- Self-humidification
Proton exchange membrane; Fuel cells; Fuel cell stability; Convection fuel cells (Dhar, H.P. (143) 185)
- Simulation
Membraneless fuel cell; Microfluidic fuel cell; CFD; Laminar flow; Modelling (Bazylak, A. (143) 57)
- Sodium borohydride
Alkaline direct borohydride fuel cell; Hydrogen peroxide (Choudhury, N.A. (143) 1)
- Sodium borohydride
Platinum; Ruthenium; Lithium cobalt oxide; Hydrogen gas (Krishnan, P. (143) 17)
- SOFC
MOLB; Transport (Hwang, J.J. (143) 75)
- SOFC
Electrical efficiency model; In situ hydrocarbon reforming; Minimization of free energy (Sidwell, R.W. (143) 166)
- SOFCs
Fuel cell program; Solid oxide fuel cells; Fuel cell/turbine hybrid; Distributed generation (Williams, M.C. (143) 191)
- Solid oxide fuel cell
Thermal modeling; Radiation heat transfer; High temperature insulation (Damm, D.L. (143) 158)

- Solid oxide fuel cells
Fuel cell program; SOFCs; Fuel cell/turbine hybrid; Distributed generation (Williams, M.C. (143) 191)
- Sol-gel method
Solubility; MCFC; (Co/Mg)-coated NiO cathode (Park, E. (143) 84)
- Solubility
Molten carbonate fuel cell; LiAlO₂ electrolyte matrix; Phase transformation; Particle growth; Stability (Kim, S.D. (143) 24)
- Solubility
MCFC; (Co/Mg)-coated NiO cathode; Sol-gel method (Park, E. (143) 84)
- Solvent-free electrolyte
PEO; LiBETI; Lithium polymer battery; Hot-pressing; Composite cathode (Appetecchi, G.B. (143) 236)
- Solvent-free polymer electrolyte
Porous membrane; Thermal annealing; Rechargeable lithium batteries (Jeon, J.-D. (143) 219)
- Spent battery
Recycling; Zinc recovery; Zinc; Electrochemical recycling (Freitas, M.B.J.G. (143) 270)
- Spherical Al-substituted α -Ni(OH)₂
Electrochemical performance; Structure (Chen, H. (143) 243)
- Stability
Molten carbonate fuel cell; LiAlO₂ electrolyte matrix; Phase transformation; Particle growth; Solubility (Kim, S.D. (143) 24)
- Stoichiometry
Direct methanol; Fuel cell; Operating conditions; Engineering; Polymer electrolyte (Cowart, J.S. (143) 30)
- Storage characteristics
Nickel-metal hydride battery; Self-discharge; Hybrid electric vehicle; Deterioration mechanism (Shinyama, K. (143) 265)
- Structure
Spherical Al-substituted α -Ni(OH)₂; Electrochemical performance (Chen, H. (143) 243)
- Supercapacitors modeling
DC/DC converter; Energy sources control; Energy management (Marie-Francoise, J.N. (143) 275)
- Thermal annealing
Solvent-free polymer electrolyte; Porous membrane; Rechargeable lithium batteries (Jeon, J.-D. (143) 219)
- Thermal decomposition
Methanol oxidation; Electrodeposition; Fuel cell; Platinum; Ruthenium (Allen, R.G. (143) 142)
- Thermal modeling
Solid oxide fuel cell; Radiation heat transfer; High temperature insulation (Damm, D.L. (143) 158)
- Transient response
PEM fuel cell; Gas transport; Channel width fraction; Porosity (Yan, W.-M. (143) 48)
- Transport
MOLB; SOFC (Hwang, J.J. (143) 75)
- Two-phase flow
Proton exchange membrane (PEM); Fuel cells; Water management (Sun, H. (143) 125)
- Water management
Fuel cells; Diagnostic tools (Stumper, J. (143) 150)
- Water management
PEMFC; Mathematical modeling; Local current density; Parametric studies (Lum, K.W. (143) 103)
- Water management
Proton exchange membrane (PEM); Fuel cells; Two-phase flow (Sun, H. (143) 125)
- Zinc recovery
Recycling; Spent battery; Zinc; Electrochemical recycling (Freitas, M.B.J.G. (143) 270)
- Zinc
Recycling; Zinc recovery; Spent battery; Electrochemical recycling (Freitas, M.B.J.G. (143) 270)
