

ANNOUNCEMENT

Second International Conference on Mechanochemistry and Mechanical Activation

Academgorodok, Novosibirsk, Russia, August 12–16, 1997

The Second International Conference on Mechanochemistry and Mechanical Activation (INCOME-2) will be held in the Scientific Center of the Russian Academy of Sciences, situated in Academgorodok, Novosibirsk. This conference is held once every five years and is the only international meeting devoted to all aspects of theory, methods, and applications of mechanochemistry. The general meeting of the International Mechanochemical Association (IMA) and the election of a new President of the Association will follow the Conference.

Papers will be accepted in the following areas: (1) theoretical aspects of mechanical activation; (2) mechanochemical reactions, kinetics, and mechanisms; (3) mechanical alloying; (4) control of the reactivity of solids by mechanical activation; (5) mechanochemistry for environmentally safe technologies. Presentations will be primarily by posters with oral presentations and invited lectures selected by the local organizing committee. All abstracts will be published before the Conference. One-page abstracts, either in camera-ready form or on disk in the WORD editor standard, are required for any type of presentation. Abstracts can also be sent by E-mail. The Proceedings will be published both in English and in Russian in the journal *Chemistry for Sustainable Development* after the Conference.

All correspondence, including abstracts, should be addressed to:

Professor N. Lyakhov, Chairman
Institute of Solid State Chemistry
Kutateladze 18, Novosibirsk 630128, Russia
