

Editorial Announcement

We are pleased to announce the addition of Professor Pat Woodward of the Department of Chemistry, Ohio State University, Columbus, OH, as an associate editor of the *Journal of Solid State Chemistry*. Professor Woodward's research interests are devoted to synthesis and characterization of solid state inorganic materials as well as the development of new photocatalytic oxide materials and predictive modeling of new perovskites. Pat is well known for his expertise in synthesis, characterization, and reactivity of oxidic solids, which will be very valuable in helping us attain our goal of better handling of more manuscripts in these growing areas of solid state chemistry. We welcome Pat to our team and wish him much success in this new role. We look forward to working with him on the continued development of the journal.

Due to other commitments, Matt Rosseinsky stepped down as an associate editor at the beginning of 2006. We thank Matt for his service to the journal and the scientific community and wish him continued success going forward. We are happy to keep him as an editorial advisory board member for the journal.

Professor Pat Woodward
