

“When I’ve got something to write,  
Scopus is the <sup>first</sup> place I go to get  
relevant information fast.”

- Identify citations...
- Know who to cite...
- Confirm the idea is original...

- all necessities when authoring a cutting-edge paper. With Scopus, I can pinpoint what I’m looking for without having to waste time on the search. It’s all there.

If you could put your finger on what you need, fast, you would, wouldn’t you?

*I did!*

“As a *busy* scientist and administrator,  
using Scopus makes me more efficient  
and frees up time to do more.”

- Doing my own research
- Supervising graduate work
- Applying for funding
- Editing journals

- with that workload, I need a great all-science database to rely on. Scopus helps me quickly find the information I need to keep on top of my work, and stay ahead in my field. Now I have time to do more.

If you could save time, you would, wouldn't you?

*I did!*
