

(Contents continued from outside cover)

VELEX, P. and AJMI, M., On the modelling of excitations in geared systems by transmission errors	882
GRĀPIS, O., TAMUŽS, V., OHLSON, N.-G. and ANDERSONS, J., Overcritical high-speed rotor systems, full annular rub and accident	910
ZHAN, Y. and MAKIS, V., A robust diagnostic model for gearboxes subject to vibration monitoring	928
WAN, Q. and JIANG, W.K., Near field acoustic holography (NAH) theory for cyclostationary sound field and its application	956
ZHOU, L. and ZHENG, W.X., Moving least square Ritz method for vibration analysis of plates	968
FIELD, R.V. and GRIGORIU, M., Optimal stochastic models for spacecraft atmospheric re-entry	991
ALDIEN, Y., MARCOTTE, P., RAKHEJA, S. and BOILEAU, P.-É., Influence of hand forces and handle size on power absorption of the human hand–arm exposed to z_h -axis vibration	1015
CHRISTOPHERSON, J. and JAZAR, G.N., Dynamic behavior comparison of passive hydraulic engine mounts. Part 1: Mathematical analysis	1040
CHRISTOPHERSON, J. and JAZAR, G.N., Dynamic behavior comparison of passive hydraulic engine mounts. Part 2: Finite element analysis	1071
ZHANG, Y., TAO, C., DU, G. and JIANG, J.J., Parameter estimations of parametrically excited pendulums based on chaos feedback synchronization	1091
KANDASAMY, S. and SINGH, A.V., Free vibration analysis of skewed open circular cylindrical shells	1100
JUDGE, J.A., HOUSTON, B.H., PHOTIADIS, D.M. and HERDIC, P.C., Effects of disorder in one- and two-dimensional micromechanical resonator arrays for filtering	1119
GRECO, M. and CODA, H.B., Positional FEM formulation for flexible multi-body dynamic analysis	1141
SHUVALOV, A.L., PONCELET, O. and DESCHAMPS, M., Analysis of the dispersion spectrum of fluid-loaded anisotropic plates: flexural-type branches and real-valued loops	1175
MCALPINE, A., FISHER, M.J. and TESTER, B.J., “Buzz-saw” noise: A comparison of measurement with prediction	1202
SHI, Y., SOL, H. and HUA, H., Material parameter identification of sandwich beams by an inverse method	1234
GAO, W., Stochastically optimal active control of a smart truss structure under stationary random excitation	1256
BAI, M.R. and LEE, C.-C., Development and implementation of cross-talk cancellation system in spatial audio reproduction based on subband filtering	1269
NANDA, B.K., Study of the effect of bolt diameter and washer on damping in layered and jointed structures	1290
Short Communications	
XIONG, Z.G., HU, H. and TANG, Q., A modified eigenfunction expansion approximation for nonlinear oscillating equations	1315
GÜRGÖZE, M., On some relationships between the eigenfrequencies of torsional vibrational systems containing lumped elements	1322
Discussions	
SHABANI, R., SALARIEH, H. and ALASTY, A., Comments on “identification of a nonlinear electromagnetic system: An experimental study”	1333
CHANG, S.-C. and TUNG, P.-C., Author’s reply	1335
INDEX TO VOLUME	1337
