

(Contents continued from outside cover)

VELARDE-SUÁREZ, S., BALLESTEROS-TAJADURA, R., PABLO HURTADO-CRUZ, J. and SANTOLARIA-MORROS, C., Experimental determination of the tonal noise sources in a centrifugal fan	781
LI, W., CHANG, C.W. and TSENG, S., The linearization method based on the equivalence of dissipated energies for nonlinearly damped structural systems	797
PAN, M.-C. and CHIU, C.-C., Investigation on improved Gabor order tracking technique and its applications	810
CHAKRABORTY, A., BASU, B. and MITRA, M., Identification of modal parameters of a mdof system by modified L-P wavelet packets	827
WANG, J. and HASHIMOTO, K.-YA., A two-dimensional theory for the analysis of surface acoustic waves in finite elastic solids	838
YI, Y., SEEMANN, W., GAUSMANN, R. and ZHONG, J., A method for matching the eigenfrequencies of longitudinal and torsional vibrations in a hybrid piezoelectric motor	856
CHAN, T.H.T. and ASHEBO, D.B., Theoretical study of moving force identification on continuous bridges	870
ZHANG, W., LOU, C.Q., FU, G.H. and YANG, L.X., A thermo-electro-mechanical coupling study of Csw motions and an application to the ultrasonic spherical motors by TEM-FEM	884
LEI, X., ZHANG, G., XIGENG, S., CHEN, J. and DONG, G., Simulation on the motion of crankshaft with crack in crankpin-web fillet region	890
ZHAO, X., LI, Q., LIEW, K.M. and NG, T.Y., The element-free <i>kp</i> -Ritz method for free vibration analysis of conical shell panels	906
CAPIEZ-LERNOUT, E., PELLISSETTI, M., PRADLWARTER, H., SCHUELLER, G.I. and SOIZE, C., Data and model uncertainties in complex aerospace engineering systems	923
DUNNE, J.F. and HAYWARD, P., A split-frequency harmonic balance method for nonlinear oscillators with multi-harmonic forcing	939
WANG, R.-T. and LIN, Z.-X., Vibration analysis of ring-stiffened cross-ply laminated cylindrical shells	964
LIANG, J.-W. and FEENY, B.F., Balancing energy to estimate damping parameters in forced oscillators	988
LEE, C.R. and KAM, T.Y., Identification of mechanical properties of elastically restrained laminated composite plates using vibration data	999
ROBERTS, D.E. and HAY, N.C., Dynamic response simulation through system identification	1017
CIĞEROĞLU, E. and ÖZGÜVEN, H.N., Nonlinear vibration analysis of bladed disks with dry friction dampers	1028
RAFEZY, B. and HOWSON, W.P., Exact natural frequencies of a three-dimensional shear-torsion beam with doubly asymmetric cross-section using a two-dimensional approach	1044
VAN DER WESTHUIZEN, A. and VAN NIEKERK, J.L., Verification of seat effective amplitude transmissibility (SEAT) value as a reliable metric to predict dynamic seat comfort	1060
<b>Short Communications</b>	
KIM, S. and SINGH, R., High frequency energy characterization of beam structures based only on driving point mobility or impedance	1076
MUGGLETON, J.M., BRENNAN, M.J., PINNINGTON, R.J. and GAO, Y., A novel sensor for measuring the acoustic pressure in buried plastic water pipes	1085
ANDRIANOV, I.V. and VAN HORSSSEN, W.T., Analytical approximations of the period of a generalized nonlinear van der Pol oscillator	1099
<b>Book Reviews</b>	
BARRON, M., Acoustic Absorbers and Diffusers: Theory, Design and Application	1105
<b>Erratum</b>	
LEE, Y.Y., Erratum to “Anti-symmetric mode vibration of a curved beam subject to autoparametric excitation” [Journal of Sound and Vibration 290 (2006) 48–64]	1107
INDEX TO VOLUME	1109
