The author would like to point out that Refs. [3] (A.J. Fleming, S. Behrens, S.O.R. Moheimani, Optimization and implementation of multimode piezoelectric shunt damping systems, *IEEE/ASME Transactions on Mechatronics* 7 (1) (2002) 87–94) and [10] (S.O.R. Moheimani, Experimental verification of the corrected transfer function of a piezoelectric laminate beam, *IEEE Transactions on Control System Technology* 8 (4) (2000) 660–666) in the captioned paper should appear in the first paragraph of Section 1 as shown below:

Today’s increasingly high speed and lightweight structures are subjected to extensive vibrations that can reduce structural life and contribute to mechanical failure. Piezoelectric transducers in conjunction with appropriate circuitry can be used as a mechanical energy dissipation device [3]. Piezoelectric materials provide cheap, reliable, and non-intrusive means of actuating and sensing vibrations in flexible structures [10].
