

Future Contributions to *Journal of Statistical Physics*

Quantitative Universality for a Class of Nonlinear Transformations

Mitchell J. Feigenbaum

A Unified Approach for Deriving Kinetic Equations in Nonequilibrium
Statistical Mechanics. II. Approximate Results

J. L. del Rio and L. S. Garcia-Colin

Statistical Mechanics of a Nonlinear Stochastic Model

Rashmi C. Desai and Robert Zwanzig

Spanning Lengths of Percolation Clusters

Ralph J. Harrison, George H. Bishop, Jr., and George D. Quinn

Stochastic Theory of Nonlinear Rate Processes with Multiple Stationary
States. II. Relaxation Times from a Metastable State

K. Matsuo, K. Lindenberg, and K. E. Schuler

The Yang-Lee Edge Singularity in Spherical Models

Douglas A. Kurtze and Michael E. Fisher

Percolation and Cluster Distribution. II. Layers, Variable Range Inter-
actions, and Exciton Cluster Model

J. Hoshen, R. Kopelman, and E. M. Monberg

Growth of Clusters in a First-Order Phase Transition

O. Penrose, Joel L. Lebowitz, J. Marro, M. H. Kalos, and A. Sur

Critical Exponents and Large Order Behavior of Perturbation Theory

E. Brezin and G. Parisi

Statistical Mechanics of a Dynamical System Based on Conway's Game of
Life

L. S. Schulman and P. E. Seiden

Solution of the Ornstein–Zernike Equation with Yukawa Closure for a Mixture

L. Blum and J. S. Høye

Langevin Equation with Multi-Poissonian Noise

Akira Onuki

Generalized Master Equations Under Delocalized Initial Conditions

V. M. Kenkre

Long Time Correlation Effects on Displacement Distributions

B. J. Alder and W. E. Alley

Susceptibility of the Rectangular Ising-Ferromagnet

D. B. Abraham

Continuity of the Temperature and Derivation of the Gibbs Canonical Distribution in Classical Statistical Mechanics

R. Rechtman and O. Penrose

Scaling Properties of Models of Nonequilibrium Phenomena

S. W. Lovesey

To the Theory of Melting in Heteropolymers. I. Random Chains

A. Vilenkin

To the Theory of Melting in Heteropolymers. II. Correlated Chains

I. Simon and A. Vilenkin

Decimation Transformations in Lattice Systems of Continuous Spins

Gerald L. Jones

Estimates of General Mayer Graphs. II. Long Range Behavior of Graphs with Two Root Points Occurring in the Theory of Ionized Systems

Michel Lavaud
