

Future Contributions to *Journal of Statistical Physics*

ARTICLES

The Dimension Spectrum of Some Dynamical Systems

P. Collet, J. L. Lebowitz, and A. Porzio

Stochastic Mechanics and Quantum Theory

Sheldon Goldstein

Tracer Dynamics in Dyson's Model of Interacting Brownian Particles

Herbert Spohn

A Dynamical Theory of the Brownian Motion for the Rayleigh Gas

Domokos Szasz and Balint Toth

Another Critical Exponent Inequality for Percolation $\beta \geq 2/\delta$

Charles M. Newman

Coarse Graining Approach to First-Order Phase Transitions

K. Gawedzki, R. Kotecky, and A. Kupiainen

Analyticity of Low-Temperature Phase Diagrams of Lattice Spin Models

Milos Zahradnik

An Order by Order Construction of Low-Temperature Phase Diagrams for
Classical Lattice Systems

Maciek Tarnawski

Phase Diagrams of the Half-Infinite Ising Model

Charles-Ed. Pfister

Roughening Transition for the Ising Model on a *bcc* Lattice. A Case in the
Theory of Ground States

R. Kotecky and S. Miracle-Sole

Some Aspects of the Wetting Transition

J. K. Percus

Partial to Complete Wetting: A Microscopic Derivation of the Young
Relation

Joel De Coninck and François Dunlop

- Phase Space Analysis and Particle Structure in Field Theory
Jacques Magnen
- Charged Surfaces and the Analyticity Properties of the String Tension in Lattice Gauge Theories
Christian Borgs
- The Phase Diagram of the Abelian Lattice Higgs Model. A Review of Rigorous Results
Christian Borgs and Florian Nill
- Upper Bounds on Correlation Decay for One-Dimensional Long-Range Spin Glass Models
Aernout C. D. van Enter
- The Spin Glasses with Long-Range Interaction at High Temperatures
B. Zegarlinski
- Diagrammatic Expansion and Metastability in the Random-Field Ising Model
V. Janis
- One-Dimensional Random Field Ising Model and Discrete Stochastic Mappings
U. Behn and V. A. Zagrebnov
- Nonequilibrium Transitions Driven by External Dichotomous Noise
U. Behn, K. Schiele, A. Teubel, and A. Kuhnelt
- Dynamical Systems with Relaxation Time
Martin Machacek
- Asymptotically Normal Dynamical Semigroups
W. A. Majewski
- Point Processes and the Position Distribution of Infinite Boson Systems
K.-H. Fichtner and W. Freudenberg
- The Interface of the Ising Model and the Brownian Sheet
Koji Kuroda and Hiroko Manaka
- List of Additional Talks Given at the Trebon Symposium
