

Future Contributions to *Journal of Statistical Physics*

This special issue consists of papers related to the program "New Directions in Statistical Mechanics" held at the Institute for Theoretical Physics, Santa Barbara, California, during the fall of 1987

ARTICLES

Preface

Joel L. Lebowitz

Neural Networks: A Biased Overview

Eytan Domany

Dynamics of Simple Computer Networks

Michel Kerszberg and David Mukamel

Mean Field Theory of Self-Organized Critical Phenomena

Chao Tang and Per Bak

Stability of Nonstationary States of Classical, Many-Body Dynamical Systems

G. Grinstein

Polymers on Disordered Trees, Spin Glasses, and Traveling Waves

B. Derrida and H. Spohn

Microscopic Models of Hydrodynamic Behavior

Joel L. Lebowitz, Errico Presutti, and Herbert Spohn

Front Propagation in Certain One-Dimensional Exclusion Models

Maury Bramson

Macroscopic Stochastic Fluctuations in a One-Dimensional Mechanical Systems

Errico Presutti and W. David Wick

Dynamical Phase Transitions in the Two-Dimensional ANNNI Model

Michael N. Barber and Bernard Derrida

Phase Transitions and Universality in Nonequilibrium Steady States of Stochastic Ising Models

Jian-Sheng Wang and Joel L. Lebowitz

Absence of Mass Gap for a Class of Stochastic Contour Models

Alan D. Sokal and Lawrence E. Thomas

Reduced Descriptions of Hydrodynamic Turbulence

Robert H. Kraichnan

Micro-Hydrodynamics

L. Hannon, G. C. Lie, and E. Clementi

Lorentz Lattice Cases: Basic Theory

M. H. Ernst and P. M. Binder

Asymptotic and Essentially Singular Solutions of the Feigenbaum Equation

Colin J. Thompson and J. B. McGuire

Localization for Random and Quasiperiodic Potentials

Thomas Spencer

The Hierarchical Random Field Ising Model

J. Bricmont and A. Kupiainen

Scaling Properties of a Structure Intermediate between Quasiperiodic and Random

S. Aubry, C. Godrèche, and J. M. Luck

Invariance Principle for a Solid-on-Solid Interface Model

Pablo A. Ferrari

Difference Equations in Statistical Mechanics. I. Cluster Statistics Models

V. Privman and N. M. Švrakić

Difference Equations in Statistical Mechanics. II. Solid-on-Solid Models in Two Dimensions

V. Privman and N. M. Švrakić
