Mode-Coupling Effects in the Density Dependence of the Shear Viscosities
 of Dense Argon and Methane
 I. M. de Schepper, J. J. van Loef, and A. F. E. M. Haffmans
Two-Temperature Hydrodynamics and Multiple Sound Modes in Disparate-
 Mass Gas Mixtures
 E. A. Johnson
Commentary of the Self-Consistent Mode-Coupling Approximation
 Sidney Yip
Long-Time Tails of the Green–Kubo Integrands for a Binary Mixture
 W. W. Wood
Properties of a Soft-Sphere Liquid from Non-Newtonian Molecular Dynamics
 L. M. Hood, D. J. Evans, and H. J. M. Hanley
On the Entropy of Nonequilibrium States
 Denis J. Evans
Scaling Behavior of Two-Dimensional Domain Growth: Computer Simula-
 tion of Vertex Models
 Katsuya Nakashima, Tatsuzo Nagai, and Kyozi Kawasaki
Probes of Equipartition in Nonlinear Hamiltonian Systems
 D. Thirumalai and Raymond D. Mountain
Canonical Commutator and Mass Renormalization
 G. W. Ford and R. F. O'Connell
Mixing Properties of Quantum Systems
 H. Narnhofer and W. Thirring
Classical and Quantum Kinetic Equations with Exact Conservation Laws
 James W. Dufty and David B. Boercker
The Büttiker–Landauer Model Generalized
 J. A. Støvneng and E. H. Hauge
The Random Parking Problem
 P. C. Hemmer
Three-Body Problem in the Theory of the Dielectric Constant
 B. Cichocki and B. U. Felderhof
Boltzmann Equation for a Dissociating Gas
 James A. McLennan
Chapman–Enskog Velocity Distribution for Tracer Diffusion
 M. López de Haro
Bulk and Shear Viscosities of a Polydisperse Hard-Sphere Fluid
 Jiasai Xu and George Stell
New Methods for Calculating the Dew/Bubble Curves of Classical Model
 Fluids
 J. M. Kincaid, K. B. Shon, and G. Fescos
