

Future Contributions to *Journal of Statistical Physics*

This special issue contains papers dedicated to Jerry Percus on the occasion of his 65th birthday

ARTICLES

Preface

M. Aizenman, M. Kalos, and J. L. Lebowitz

Convexity and Concavity of Eigenvalue Sums

Elliott H. Lieb and Heinz Siedentop

Strict Monotonicity for Critical Points in Percolation and Ferromagnetic Models

Michael Aizenman and Geoffrey Grimmett

Theory of Percolation in Fluids of Long Molecules

Kevin Leung and David Chandler

Dynamic Critical Exponent of the BFACF Algorithm for Self-Avoiding Walks

Sergio Caracciolo, Andrea Pelissetto, and Alan D. Sokal

Statistical and Systematic Errors in Monte Carlo Sampling

Alan M. Ferrenberg, D. P. Landau, and K. Binder

The Hierarchy of Correlations in Random Binary Sequences

Aaldert Compagner

On Some Transport Properties of Baker's Maps

Stephen Childress and Isaac Klapper

Reaction-Diffusion Fronts in Periodically Layered Media

George Papanicolaou and Xue Xin

A Particle Model for Spinodal Decomposition

Joel L. Lebowitz, Enza Orlandi, and Errico Presutti

A Mean-Field Equation of Motion for the Dynamic Ising Model

O. Penrose

- A Stochastic Model of Three-Dimensional Crystal Growth
Claude Garrod
- Some Properties of a Fractal-Time Continuous-Time Random Walks in the Presence of Traps
George H. Weiss and Shlomo Havlin
- Onsager Relations for Transport in Inhomogeneous Media
N. G. van Kampen
- Diffusion from Sessile Droplets Through Membranes
G. O. Williams and H. L. Frisch
- Flexural Rigidity of a Liquid Surface
Joseph B. Keller and Gregory J. Merchant
- Theory of Interfacial Phase Transitions in Surfactant Systems
K. P. Shukla and M. Robert
- Finite-Size Effects in Surface Tension. I. Fluctuating Interfaces
D. B. Abraham and N. M. Švrakić
- The Wetting Transition in a Random Surface Model
D. B. Abraham and C. M. Newman
- Exploiting the Diversity of Time Scales in the Immune System: A B-Cell Antibody Model
Lee A. Segel and Alan S. Perelson
- How Do Ovarian Follicles Interact? A Many-Body Problem with Unusual Symmetry and Symmetry-Breaking Properties
H. Michael Lacker and Allon Percus
- The Hard-Sphere Order–Disorder Transition in the Bethe Continuum
A. Robledo and C. Varea
- Relation Between the Free Energy and the Direct Correlation Function in the Mean Spherical Approximation
L. Blum and Yaakov Rosenfeld
- The Nonuniform Hard-Rod Fluid Revisited
M. Q. Zhang
- Sticky Spheres and Related Systems
George Stell
- Implementing the Fast Multipole Method in Three Dimensions
K. E. Schmidt and Michael A. Lee
- Fermion Nodes
D. M. Ceperley
- Exact Monte Carlo for Few-Fermion Systems
M. H. Kalos
