## Future Contributions to Journal of Statistical Physics

## ARTICLES

The (	Cavity	Metho	d at .	Zero '	Tem	perat	ure
	Marc 1	Mézard	and	Giorg	io P	arisi	

- Temperature Dependence of the Gibbs State in the Random Energy Model I. Kurkova
- The Percolation Transition for the Zero-Temperature Stochastic Ising Model on the Hexagonal Lattice
  - C. Douglas Howard and Charles M. Newman
- Interfaces for Random Cluster Models J. Černý and R. Kotecký

## Rigorous Generalization of Young's Law for Heterogeneous and Rough Substrates

J. De Coninck, S. Miracle-Solé, and J. Ruiz

- Droplet Shapes for a Class of Models in  $\mathbb{Z}^2$  at Zero Temperature *Xavier Descombes and Eugène Pechersky*
- Exact Relations Between Elastic and Electrical Response of *d*-Dimensional Percolating Networks with Angle-Bending Forces David J. Bergman

Non-Universality in Ising Models with Four Spin Interaction V. Mastropietro

- Exact Solution of a Charge-Asymmetric Two-Dimensional Coulomb Gas L. Šamaj
- Long-Range Order in Nonequilibrium Systems of Interacting Brownian Linear Oscillators W. I. Skrvpnik
- New Developments in the Eight Vertex Model Klaus Fabricius and Barry M. McCoy

## 1523

The Landauer Resistivity on Quantum Wires
Masahiro Kaminaga and Fumihiko Nakano
Analyticity of Smooth Eigenfunctions and Spectral Analysis of the Gauss Map
I. Antoniou and S. A. Shkarin
An Equation for the Dissipation Rate Correlation and Its Implications for the Intermittency Exponent $\mu$ in Turbulence <i>C. Jayaprakash and F. Hayot</i>
On a Shock Front in Burgers Turbulence Christophe Giraud
<ul> <li>Proof of an Asymptotic Property of Self-Similar Solutions of the Boltzmann Equation for Granular Materials</li> <li>A. V. Bobylev, C. Cercignani, and G. Toscani</li> </ul>
Long-Time Behavior for the 1-D Stochastic Ising Model with Unbounded Random Couplings H. Spohn and E. Zhizhina
Stationary States and Scaling Shapes of One-Dimensional Interfaces François Dunlop
Gaussian Fields and Random Packing Yu. Baryshnikov and J. E. Yukich
Variational Principle and Almost Quasilocality for Renormalized Measures Roberto Fernández, Arnaud Le Ny, and Frank Redig
The Concavity of Entropy and Extremum Principles in Thermodynamics Santi Prestipino and Paolo V. Giaquinta
DEPARTMENTS

- Book Review: Path Integrals in Physics. Volumes I and II G. Roepstorff
- Book Review: Path Integrals in Quantum Mechanics, Statistics, Polymer Physics and Financial Markets F. M. C. Witte
- Erratum: "Analyticity of the *d*-Dimensional Bond Percolation Probability Around p = 1," *J. Statist. Phys.* **107**:1267 (202) *Gastão A. Braga, Aldo Procacci, and Remy Sanchis*
