

REFEREES FOR VOLUME 1

In common with the editors of most scientific periodicals we depend upon the advice given to us by those who are willing to review manuscripts. Although the policy of the *Journal of Structural Geology* is to preserve a referee's anonymity from an author, unless the referee requests otherwise, we believe that his time and thought should be acknowledged. The names of geologists who have commented on one or more manuscripts which are published, or were considered for publication, in Volume 1 are listed below.
