

## Erratum

Platt, J. P. 1984. Secondary cleavages in ductile shear zones. *J. Struct. Geol.* **6**(4), 439–442.

The left-hand side of the equation at the bottom right of p. 440 should be  $\dot{\psi}$ , not  $\psi$ . The last three lines should therefore read:

$\dot{\psi} = D^s \sin 2\eta - W^s$ , where  $\psi$  is the angle between *ecc* 1 and the shear plane (Fig. 2), and  $\eta = \phi + \psi$ .

$$\dot{\psi} = \frac{1}{2}\Gamma[\sin 2\phi \sin 2(\phi + \psi) - 1 + \cos 2\phi].$$
