Leicester, U.K.
D. S. Wood
Llandudno, U.K.

Aims and Scope

The principal aim of this international, English-language journal is to publish original research and review articles in structural geology and tectonics. Deformation phenomena and processes on all scales from the crystal lattice to the lithospheric plate are included in the scope of the *Journal*.

Long or short articles are invited in the fields of: the analysis of natural deformation elements (e.g. folds, foliations, faults, minor fractures); structural associations (e.g. diapirs, grabens, orogenic belts); microfabrics; experimental deformation; strain analysis; seismotectonics; regional structural geology; and global tectonics. The *Journal* particularly welcomes papers on relationships between tectonic phenomena and deformation processes. Articles on the structure of specific regions are also welcome provided that they contain material of general interest. Papers from scientists and technologists in allied disciplines, or earth scientists such as geophysicists or sedimentologists will be considered if their contents are of direct concern to structural geologists, or if they demonstrate interrelationships between tectonics and other branches of science.

From time to time the *Journal* will publish letters and discussion papers in the *Brevia* section. Some issues will be devoted to thematic topics or to papers delivered at conferences or symposia. Books will be reviewed in some issues.

Publishing and Advertising Offices. Headington Hill Hall, Oxford, OX3 0BW, England (Oxford 64881). Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A. All subscription enquiries should be addressed to: The Subscriptions Fulfillment Manager, Subscriptions Dept., Pergamon Press Ltd., Headington Hill Hall, Oxford OX3 0BW. Annual Subscriptions Rate (1985): for Libraries, University Departments, Government Laboratories, Industrial and other multiple-reader institutions—U.S. \$135.00 per annum (including postage and insurance). Two-year rate (1985/1986): U.S. \$256.50. Specially reduced rates to individuals. In the interests of maximizing the dissemination of the research results published in this important international journal we have established a two-tier price structure. Any individual whose institution takes out a library subscription, may purchase a second or additional subscription for personal use at the much reduced rate of U.S. \$60.00 per annum.

Published bi-monthly

CONTENTS OF VOLUME 7

Number 1

- R. J. KNIPE 1 Footwall geometry and the rheology of thrust sheets
- G. D. WILLIAMS 11 Thrust tectonics in the south central Pyrenees
- J. P. PLATT and G. S. LISTER 19 Structural history of high-pressure metamorphic rocks in the southern Vanoise massif, French Alps, and their relation to Alpine tectonic events
- L. B. HARRIS and P. R. COBBOLD 37 Development of conjugate shear bands during bulk simple shearing
- W. J. GREGG 45 Microscopic deformation mechanisms associated with mica film formation in cleaved psammitic rocks
- P. ERDMER 57 An examination of the cataclastic fabrics and structures of parts of Nisutlin, Anvil and Simpson allochthons, central Yukon: test of the arc-continent collision model
- P. ALEKSANDROWSKI 73 Graphic determination of principal stress directions for slick-enside populations: an attempt to modify Arthaud's method
- J. M. DIXON and J. M. SUMMERS 83 Recent developments in centrifuge modelling of tectonic processes: equipment, model construction techniques and rheology of model materials
- M. CASEY and P. HUGGENBERGER 103 Numerical modelling of finite-amplitude similar folds developing under general deformation histories
- Brevia*
- R. J. LISLE 115 The use of the orientation tensor for the description and statistical testing of fabrics
- S. H. TREAGUS 119 The relationship between foliation and strain: an experimental investigation: discussion
- B. E. HOBBS, W. D. MEANS and P. F. WILLIAMS 123 The relationship between foliation and strain: an experimental investigation: reply
- 125 Book Reviews

Number 2

- M. P. SEARLE 129 Sequence of thrusting and origin of culminations in the northern and central Oman Mountains
- J. P. PLATT and G. S. LISTER 145 Structural evolution of a nappe complex, southern Vanoise massif, French Penninic Alps
- S. P. KELLEY and D. POWELL 161 Relationships between marginal thrusting and movement on major, internal shear zones in the Northern Highland Caledonides, Scotland

M. FAURE	175	Microtectonic evidence for eastward ductile shear in the Jurassic orogen of SW Japan
J. G. SPRAY	187	Dynamothermal transition zone between Archaean greenstone and granitoid gneiss at Lake Dundas, Western Australia
B. G. WOODLAND	205	Relationship of concretions and chlorite–muscovite porphyroblasts to the development of domainal cleavage in low-grade metamorphic deformed rocks from north-central Wales, Great Britain
M. FORD and C. C. FERGUSON	217	Cleavage strain in the Variscan Fold Belt, County Cork, Ireland, estimated from stretched arsenopyrite rosettes
J-P. LATHAM	225	The influence of nonlinear material properties and resistance to bending on the development of internal structures
J-P. LATHAM	237	A numerical investigation and geological discussion of the relationship between folding, kinking and faulting
E. H. RUTTER, C. J. PEACH, S. H. WHITE and D. JOHNSTON	251	Experimental 'syntectonic' hydration of basalt
D. BARR, R. MCQUILLIN and J. A. DONATO	267	Letter to the Editors: Footwall uplift in the Inner Moray Firth basin, offshore Scotland

Number 3/4

v Preface

Section I: Multiply deformed terrains

P. F. WILLIAMS	269	Multiply deformed terrains—problems of correlation
C. MCA. POWELL, J. P. COLE and T. J. CUDAHY	281	Megakinking in the Lachlan Fold Belt, Australia
R. A. GLEN	301	Basement control on the deformation of cover basins: an example from the Cobar district in the Lachlan Fold Belt, Australia
J. D. JOHNSTON	317	Interpretation of refolding and asymmetric folds using vergence concepts in drillcore

Section II: Multiple deformation and the development of cleavage and allied structures

T. ENGELDER and S. MARSHAK	327	Disjunctive cleavage formed at shallow depths in sedimentary rocks
S. MARSHAK and T. ENGELDER	345	Development of cleavage in limestones of a fold-thrust belt in eastern New York
G. MITRA and W. A. YONKEE	361	Relationship of spaced cleavage to folds and thrusts in the Idaho–Utah–Wyoming thrust belt
T. B. HOLST	375	Implications of a large flattening strain for the origin of a bedding-parallel foliation in the Early Proterozoic Thomson Formation, Minnesota
C. MCA. POWELL and M. J. RICKARD	385	Significance of the early foliation at Bermagui, N.S.W., Australia
C. J. L. WILSON and P. DE HEDOUVILLE	401	Early cleavage development in the Late Ordovician of north-east Victoria, Australia

A. C. DUNCAN	409	Transected folds: a re-evaluation, with examples from the 'type area' at Sulphur Creek, Tasmania
N. SWAGER	421	Solution transfer, mechanical rotation and kink-band boundary migration during crenulation-cleavage development
J. P. BURG and M. IGLESIAS PONCE DE LEON	431	Pressure-solution structures in a granite
Section III: Multiple brittle and semi-brittle deformation		
P. L. HANCOCK	437	Brittle microtectonics: principles and practice
T. ENGELDER	459	Loading paths to joint propagation during a tectonic cycle: an example from the Appalachian Plateau, U.S.A.
M. SANDIFORD	477	The origin of retrograde shear zones in the Napier Complex: implications for the tectonic evolution of Enderby Land, Antarctica
Section IV: Abstracts of other papers presented at the conference on <i>Multiple Deformation and Foliation Development</i>		
C. MCA. POWELL	489	Abstracts of other papers presented at Bermagui
Number 5		
C. SIMPSON	503	Deformation of granitic rocks across the brittle-ductile transition
R. G. GIBSON and D. R. GRAY	513	Ductile-to-brittle transition in shear during thrust sheet emplacement, Southern Appalachian thrust belt
L. N. JENSEN and J. STARKEY	527	Plagioclase microfabrics in a ductile shear zone from the Jotun Nappe, Norway
D. DIETRICH and P. R. GRANT	541	Cathodoluminescence petrography of syntectonic quartz fibres
M. CANNAT	555	Quartz microstructures and fabrics in the Island of Groix (Brittany, France)
A. BELL	563	Strain paths slaty cleavage formation—the role of volume loss
R. W. H. BUTLER	569	The restoration of thrust systems and displacement continuity around the Mont Blanc massif, NW external Alpine thrust belt
R. NICHOLSON and D. D. POLLARD	583	Dilation and linkage of echelon cracks
J. MCEWEN and E. HILLARY	591	Early fracture within the Eye-Dashwa Lakes pluton, Atikokan, Ontario, Canada
J. ANGELIER	605	Extension and rifting: the Zeit region, Gulf of Suez
D. BAHAT	613	Low-angle normal faults in Lower Eocene chalks near Beer Sheva, Israel

Number 6

	621	Editorial
A. P. S. REYMER and G. OERTEL	623	Horizontal cleavage in southeastern Sinai: the case for a coaxial strain history
L. HARRIS	637	Progressive and polyphase deformation of the Schistes Lustrés in Cap Corse, Alpine Corsica
S. K. GHOSH and A. CHATTERJEE	651	Patterns of deformed early lineations over later folds formed by buckling and flattening
R. J. VARGA	667	Mesoscopic structural fabric of early Paleozoic rocks in the northern Sierra Nevada, California and implications for Late Jurassic plate kinematics
S. SMALLWOOD	683	A thin-skinned thrust model for Variscan Pembrokeshire, Wales
C. TEYSSIER	689	A crustal thrust system in an intracratonic tectonic environment
H. K. OBEE and S. H. WHITE	701	Faults and associated fault rocks of the Southern Arunta block, Alice Springs, Central Australia
G. FERENTINOS, M. BROOKS, and T. DOUTSOS	713	Quaternary tectonics in the Gulf of Patras, Western Greece
C. N. WINSOR	719	Interpretation of a set of faults across the hinge and a limb of a large-scale flexure in the Mount Isa district, Queensland, Australia, in terms of fractures related to the folding process
J. M. CUTLER and P. R. COBBOLD	727	A geometric approach to two-dimensional finite strain compatibility: interpretation and review
T-f. WONG and R. BIEGEL	737	Effects of pressure on the micromechanics of faulting in San Marcos gabbro
<i>Brevia</i>		
R. H. SIBSON	751	A note on fault reactivation
C. R. TIPPETT, P. B. JONES and F. R. FREY	755	Strains developed in the hangingwalls of thrusts due to their slip/propagation rate: a dislocation model: discussion
T. J. CHAPMAN and G. D. WILLIAMS	759	Strains developed in the hangingwalls of thrusts due to their slip/propagation rate: a dislocation model: reply
	763	Book Reviews
	765	Referees for Volume 7
