

EDITORIAL

I am pleased to welcome Cees Passchier (Utrecht University, The Netherlands), as a new Associate Editor of the *Journal of Structural Geology*, and our first based in mainland Europe. Cees began his duties on 1 July 1991, in preparation for the vacancy to be left by Dave Sanderson when he steps down at the end of the year.

I should like to take this opportunity to thank Dave Sanderson for his 6½ years as an Associate Editor of *JSG*. In addition to handling a large number of regular manuscripts during this time, Dave helped to initiate the occasional Brevia section, *Microcomputer Techniques and Applications*, and was the house editor in charge of this year's Special Issue *Characteristics of Active Faults*. I have valued his advice and support over the years, and look forward to his continued involvement in the *Journal*, as a member of the Editorial Advisory Board.
