

ERRATUM

“Structural evolution of a foreland fold-and-thrust belt: the Umbria–Marche Apennines, Italy” by E. Tavarnelli (*Journal of Structural Geology* **19**, 523–534, 1997).

It is regretted that one line was missed from the *Acknowledgements* during final printing. The *Acknowledgements* are printed again here, in their entirety.

Acknowledgements—This paper, initiated as part of a ph.D program at the University of Siena (Italy), was completed at the University of California in Berkeley (U.S.A.) during receipt of a NATO–CNR post-doctoral grant. I thank Francesco Antonio Decandia for careful supervision during the project. Walter Alvarez, Rob Butler, Chris Hedlund, Janine Weber-Band and Dan Karner are also kindly acknowledged for much help and useful discussion. Critical reviews by Kevin Stewart, David Anastasio, Chris Hedlund and two anonymous referees greatly improved the original manuscript. Fieldwork was supported through a MURST-40% fund to F.A. Decandia. Structural data were plotted with the STEREO PLOT 32 software (courtesy of Neil Mancktelow). Preliminary data and ideas from this contribution were first orally presented at the TSG Annual Meeting held in Leeds (U.K.) in December 1994, and at the GSA Annual Meeting held in New Orleans (U.S.A.) in November 1995.
