The authors wish it to be known that the Acknowledgements in the above paper should have been as follows:

The paper greatly benefited from the thorough and constructive reviews by an anonymous referee, M.A. Martins-Neto and E. Tavarnelli. We also wish to thank F. Borraccini, G. Cello, C. Invernizzi, L. Marchegiani, L. Mattioni, P. Shiner and E. Tondi for the stimulating discussions and useful comments. S.M. was enthusiastically inspired by John Ramsay to work on these topics during his ETH-Zurich times. Projections of orientation data were made using STEREO PLOT (by Neil Mancktelow). Financial support by the University of Urbino and the National Seismic Survey, Rome, are gratefully acknowledged.
