

List of reviewers 2007

The Editor(s) and Publisher of the *Journal of Structural Geology* would like to express their thanks to the reviewers who have contributed reviews for the journal during 2007. We are most grateful to these scientists for reviewing, and sometimes re-reviewing, papers. We appreciate this is a demanding task and thank all those who have contributed in so many ways, including those whose names have been omitted from this list – for whatever the reason.
