List of Top Reviewers–2007

Authors and Reviewers are the most important people involved in the production of the Journal of Structural Geology.

It is thanks to the effort of numerous Reviewers that the standard of papers published in our Journal remains high. Nevertheless, reviewing is usually a difficult and thankless task. A request to review a paper normally comes at a bad and busy moment; the paper to be reviewed may be written in an unusual style, contain flaws or mistakes; figures may be accidentally missing or should be missing; reference lists are incomplete or cite the wrong papers; and finally, once a report is written and dispatched, the author may not do as asked, and editors may differ in opinion with the Reviewer. All in all, we admire the stamina, dedication and thoroughness of all of you, our Reviewers, and the usually positive and supportive way in which even poorly written papers are treated, improvements suggested, and authors helped to improve the presentation of their work.

If life were fair, the task of reviewing papers would be equally distributed over contributing authors to the Journal. However, the expertise of some people is in higher demand than that of others, and some Reviewers are approached more often because their work stands out by quality and thoroughness.

As Editors of the Journal, we would like to thank all of you who review papers for the Journal. As a special dedication, however, we would like to honour those Reviewers who gave a greater than usual contribution in reviewing, in quantity, quality or both. The list given below is the list of our “Top Reviewers” for 2007, based on statistics and the opinion of all Editors of the Journal. The list is given in alphabetical order because it would be extremely hard to make

a further ranking. In the name of all authors of papers in the Journal, the editors, and the staff of Elsevier I would like to specially thank our “Top Reviewers” for their excellent work. Thank you, and congratulations!

Aerden, Domingo, Universidad de Granada, Granada, Spain
Borradaile, Graham, Lakehead University, Ontario, Canada
Bouchez, Jean Luc, University Paul Sabatier, Toulouse, France
Boullier, Anne-Marie, Université Joseph Fournier, Grenoble, France
Goodwin, Laurel, University of Wisconsin at Madison, WI, USA
Groshong, Richard, 3D Structure Research, Tuscaloosa, AL, USA
Hudleston, Peter, University of Minnesota, MN, USA
Jiang, Dazhi, University of Western Ontario, London, Ontario, Canada
Koyi, Hemin, Uppsala University, Uppsala, Sweden
Lisle, Richard, University of Cardiff, Wales, U.K.
