THE NINTH CONFERENCE ON VACUUM MICROBALANCE TECHNIQUES

The Ninth Conference on Vacuum Microbalance Techniques will be held on 11th and 12th June, 1970 in West Berlin.

This conference will be concerned with progress in any of the following fields:

New design and construction of microweighing devices e.g. balances or oscillators.

Modification of commercially available instruments.
Atmospheric control in balance chambers.

Temperature control of the sample or around the balance chamber.

Application of vacuum microweighing techniques in physics and physical chemistry.

Correspondence should be addressed to:

Prof. Dr. Th. Gast, Technische Universität, 1 Berlin 15,
Kurfürstendamm 195, Tel.: 314 41 00, or

E. Robnes, Battelle-Institut E. V., 6 Frankfurt/Main—90,
Wiesbadener Straße, Tel.: 790 84 15.
