

Events

ESTAC-7

7th European Symposium on Thermal Analysis and Calorimetry will be held at Hotel Füred, Balatonfüred (Hungary) from August 30 to September 4, 1998. The topics of the Symposium will cover all aspects of thermal analysis and calorimetry.

Scientific program

Invited lectures oral presentations and posters will be accepted in the following sections:

- Inorganic chemistry and materials science
- Organic substances, pharmaceuticals and life science
- Polymers
- Environment
- Geosciences
- Theory and instrumentation

PhandTA 3

3rd Symposium/Workshops on Pharmacy and Thermal Analysis will be held at the Centro Stefano Franscini Monte Verità, Ascona, Switzerland October 12–15, 1997.

The scientific program consists of the following sections:

A. Drug Substances, Excipients and Polymers:

thermal characterization, phase diagrams, polymorphism, stability, hydrates, solvates, enantiomers

B. Dosage Forms, Manufacturing, Aging, and Release:

solid dispersions, semi-solid forms, liquid forms, microemulsions, controlled released systems

C. Site-specific Drug Delivery, Interactions:

interactions drug-receptor, transport mechanisms

D. Instrumentation and Methods of Thermal Analysis and Calorimetry:

new techniques, calibration, validation
