The paper published in J Therm Anal Calorim (2010) 99:655–658, DOI: [10.1007/s10973-009-0595-1](https://doi.org/10.1007/s10973-009-0595-1) with the title of “Predicting eutectic behavior of drugs and excipients by unique calculations” and authors Satya Girish Avula, Kenneth Alexander, Alan Riga would like to have the following completion to the above article.

Acknowledgements

We want to recognize the excellent research accomplished by Amanda Jones (MS, College of Pharmacy, Division of Industrial Pharmacy, University of Toledo, 2005). For this publication, we used and further evaluated her data with our data analysis calculations to accomplish our goals of developing correlations between her data and our predictions.

The online version of the original article can be found under doi:[10.1007/s10973-009-0595-1](https://doi.org/10.1007/s10973-009-0595-1).
