

**Total Synthesis of Epothilone B, Epothilone D, and *cis*- and *trans*-9,10-Dehydroepothilone D** [*J. Am. Chem. Soc.* **2001**, *123*, 5407–5413]. James D. White,\* Rich G. Carter, Kurt F. Sundermann, and Markus Wartmann

Page 5412. Structures **51**, **52**, **53**, and **54** in Scheme 11 are incorrect. The configuration of the C12–C13 trisubstituted alkene is (*E*), not (*Z*) as drawn in these structures. An undetected isomerization of (*Z*)-allylic chloride **50** which occurred during its coupling with stannane **47** led to this error. We are grateful to Professor Samuel Danishefsky and Dr. Alexey Rivkin for drawing our attention to this error.
