

Listing of Inorganic Syntheses, Vol. 35

Inorganic Syntheses, Vol. 35. Edited by Thomas B. Rauchfuss (University of Illinois at Urbana-Champaign). John Wiley & Sons, Inc.: Hoboken, NJ. xxxii + 188 pp. \$135. ISBN 978-0-471-68255-4.

The present volume of *Inorganic Syntheses* presents, in the words of the Editor-in-Chief, "procedures to compounds that illustrate the scope of modern inorganic and organometallic synthesis". The titles of the chapters are as follows: Complexes of Bulky β -Diketiminato Ligands; Boron Cluster Compounds; Coordination Compounds; Carbene Ligands and Complexes; Functional Ligands and Complexes; Organometallic Reagents; Bio-Inspired Iron and Nickel Complexes; Ruthenium Complexes; and Iridium Complexes. Indices of contributors, subjects, and formulas complete the book.
