

Book Listing of Annual Review of Physical Chemistry, Vol. 62, 2011

Annual Review of Physical Chemistry, Vol. 62, 2011.

Edited by Stephen R. Leone (University of California, Berkeley), Paul S. Cremer (Texas A&M University), Jay T. Groves (University of California, Berkeley), and Mark A. Johnson (Yale University). Annual Reviews: Palo Alto, CA. 2011. xiv + 682 pp. \$86.00. ISBN 978-0-8243-1062-2.

Volume 62 of *Annual Review of Physical Chemistry* contains 30 chapters covering the latest research in this broad field, with the representative theme of this issue being “complex systems, requiring coarse-grained theoretical methods”, to quote from the Preface. A sampling of the chapters includes “Laboring in the Vineyard of Physical Chemistry” by Benjamin Widom, an autobiography of his research in “kinetics, thermodynamics, and statistical mechanics”; “Hydrated Acid Clusters” by Kenneth Leopold; and “Roaming Radicals” by Joel Bowman and Benjamin Shepler, to name a few. A Cumulative Index of Contributing Authors, Volumes 58–62 and a Cumulative Index of Chapter Titles, Volumes 58–62 complete the book.
