

**Macrocyclic Design Strategies for Small, Stable Parallel  $\beta$ -Sheet Scaffolds** [*Journal of the American Chemical Society* 2009, 131, 7970–7972 DOI: 10.1021/ja902210f]. Felix Freire and Samuel H. Gellman\*

Page 7972. The structure shown for macrocyclic compound **9** in Figure 4a is incorrect; this structure actually corresponds to compound **3** in the paper. The correct drawing for **9** is provided below. In the correct structure, the positions of the upper and lower strand segments are swapped relative to the original drawing.
