

Oil Chemists' Annual Meeting

*Twenty-first Successive Yearly Gathering to be Held
at Hotel Roosevelt, May Eighth and Ninth*

THE twenty-first annual convention of The American Oil Chemists' Society will be held at the Hotel Roosevelt, New Orleans, Louisiana, on Thursday and Friday, May Eighth and Ninth. President W. R. Stryker has arranged a program of exceptional interest to all oil and soap chemists, and a large attendance is expected.

Among many papers and addresses to be presented are included a paper on Rubberseed Oil by Dr. George S. Jamieson, Chief of the Oil, Fat and Wax Laboratory of the Bureau of Chemistry and Soils, U. S. Department of Agriculture; a paper on Methods for Analyses of Cottonseed, also by Dr. Jamieson; a paper, Studies on Gossypol, by Dr. E. P. Clarke, Research Associate, Cottonseed Products Association; Address—Chemical Resources of Louisiana, by Professor Charles S. Williamson, Jr., of Tulane University and many others.

Committee Reports

FULL reports of all standing and special committees of the Society will be presented, including reports of: the Referee Board, Smalley Foundation, Governing Committee, Membership Committee, Soap Section, Crude Mill Operations Committee, Refining Committee, Olive Oil Committee, Detergent Committee, Planning and Uniform Methods Committee, Joint Committee on Fat Analysis of the American Oil Chemists' Society and the American Chemical Society, Committee on Publication of Methods; and other committees covering all phases of the Society's manifold activities.

Social Features

AS IN former years, the convention will be accompanied by attractive social features, so enjoyable in hospitable New Orleans with its true Creole charm.

A golf tournament will be held, of course, to decide what member will be the holder during the coming year of the Challenge Cup donated last year by The Industrial Chemical Sales Co. There will be many handsome prizes for the consolation of those entrants who compete in the golf tournament, but just fail to win the cup. It will be remembered that the Challenge Cup was donated last year and is to become the permanent property of any contestant who shall win it three times, not necessarily consecutively.

Roosevelt Hotel, New Orleans, convention headquarters for the 21st Annual Meeting of the American Oil Chemists' Society

The Annual Banquet will offer an opportunity for the renewal of old friendships and the formation of new ones, and a program of appropriate entertainment is assured.

Special arrangements are being completed for the entertainment of ladies who attend the convention, therefore all members and guests are urged to bring their wives and daughters.

All who attend the convention of the Oil Chemists' Society and the National Cottonseed Products Convention, which will be held at the same place during the following week, will be able to avail themselves of the special rate of one and one-half one-way fares for the round trip, which will be offered by all railroads for the latter convention. Particulars may be obtained from your local railway ticket agent.
