

is curtailed, an appreciable proportion must be allotted for fatty foods.

One of the most interesting elements is found in the continuance of the soap industry's demands for fats and oils. Comparative poverty and unemployment evidently cannot conquer the native urge cleanliness of the American population.

A. O. C. S. Bowling Tournament

The twelve fastest and smoothest alleys in the city of Chicago, at 235 South Wabash Avenue, just around the corner from the Congress Hotel, have been secured for the Second Annual Bowling Tourney of The American Oil Chemists' Society, October 29th.

Play will be resumed for the Nuchar Challenge Trophy Cup, won last year by the Amaizo team of The American Maize Products Co., and this year the eligibility rules have been so tightened up that a good stiff competition, in doubt to the last minute, is assured.

All contestants must be actually employed in the chemical laboratory or in some department of the plant where actual processing of fats, oils or soaps is done, and at least one member of each team must be a member of The American Oil Chemists' Society, in good standing. Exhibitors at the convention are also eligible for competition.

In addition to the Nuchar Challenge Trophy, herewith shown, there will be several other prizes, including individual high single game, and high three games, also illustrated.

One of the most dangerous teams last year was the Procter and Gamble team of Cincinnati, and we understand that, in spite of extreme heat, this team has started preliminary practice on the Wyoming alleys, headed by President Richardson of the Society. They will be a hard team to beat this year. They are all eligible.

The Armour team will bear watching this year, as they turned in the highest single game of the year last year and we hear that John Vollertsen has had them out practicing regularly. The Swift Premiums form one of the best teams we have ever seen in competition. They play together regularly and will be close up at the finish as they were last year. Irwin will be a factor this year, even though he had hard luck last year.

The "Dark Horse" team of the race is said to be the Wilson team. They didn't get to "clicking" last year, but watch them go this year. Tolman is in the pink of condition, and

A. O. C. S. Bowling Challenge Trophy

promises to show the boys some real rolling. It's going to be a lot of fun. We guarantee plenty of alleys and lots of good clean fun this year. Come in and meet your competitors and your friends on the alleys, and have a lot of real sport.

There'll be a surprise entertainment too, that will be the talk of the meeting. You'll be sorry if you miss it. We are planning to meet at the hotel at six-thirty and have dinner in the balcony of the Pine Room, and go from there in a body to the alleys.

Send in your reservations early for team and personal bowling to John P. Harris, 205 W. Wacker Drive, Chicago, Chairman of the Bowling Committee.

Position Wanted: *Chemist*—Has recently developed a new process for decolorizing and bleaching beeswax, also applicable to some oils and fats; desires permanent position. Address Box No. D71, *Oil & Fat Industries*, 136 Liberty Street, New York City.
