

## Oil Chemists to Meet at Chicago

**T**ECHNICAL and scientific progress in oils, fats, soaps, and related materials will be brought up to date when the American Oil Chemists' Society holds its annual fall convention at the Drake hotel in Chicago. The sessions are scheduled for October 8th to 10th.

The program will feature three groups of papers: (1) A general group on soaps; (2) A general group on fats and oils; and (3) A symposium on analytical methods as applied to fats, oils, and soaps.

Noteworthy among the papers scheduled for presentation are the following:

### SOAP

Foster D. Snell will present a paper on "Soap and Other Surface Active Agents."

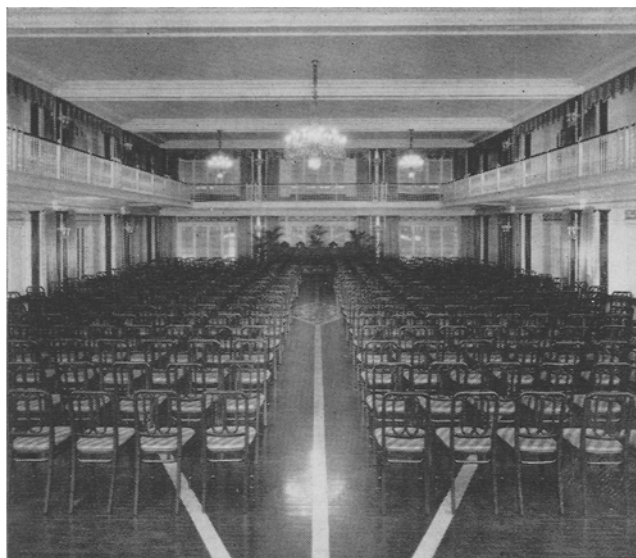

W. D. Pohle, naval stores research division, United States department of agriculture, will present two papers—one on "Foaming Properties of Rosin Soap and Their Comparison with Those of Fatty Acid Soaps," and the other on "Solubility of Calcium Soaps of Gum Rosin, Rosin Acids, and Fatty Acids."

Pauline Beery Mack, Pennsylvania State college, will present a paper on a soap subject.

### FATS AND OILS

H. A. Schuette, University of Wisconsin, will present a paper on "Unsaponifiables."

J. Eichberg, American Lecithin company, will present a paper on "Recent Developments in Phosphatide Chemistry."

*Meeting Room*

Other papers of interest will be presented by E. B. Kester, of the Western Regional Research laboratory; by G. R. Greenbank, United States department of agriculture; and by W. G. McLeod, of Oscar Meyer & Co., Madison, Wis. A paper from the U. S. Regional Soybean Industrial Products laboratory at Urbana, Ill., also will appear.

### ANALYTICAL METHODS SYMPOSIUM

H. E. Longenecker, University of Pittsburgh, will present a paper on "Glyceride Structures in Natural Fats."

A. D. Rich, Armour and Company, a paper on "Plasticity in Shortenings."

I. N. Diller, Hellige, Inc., will present a paper on color measurements, and H. A. Schuette and co-workers at the University of Wisconsin will have two papers.

The above list is incomplete at this writing but will give a cross-section of the nature of the program.

Special entertainment for the evenings of both October 8th and 9th is planned. One evening probably will be occupied by supper and a smoker, the other evening by the annual banquet. While detailed arrangements have not yet been announced, a good time is assured those who attend either affair. Original entertainment features are planned for each event.

A feature of the convention will be the industrial and laboratory exhibits. These exhibits will show the newest developments in processing equipment and laboratory apparatus. They are always an instructive aspect of the convention.

J. J. Vollertsen, Armour and Company research laboratories, is in general charge of the convention. V. Conquest, also of Armour laboratories, is in charge of the scientific program.

The American Oil Chemists' Society extends a cordial welcome to all.
