

About 100 Applications in for 1949 Short Course

APPPLICATIONS to the number of nearly 100 have already been received by the Education Committee for enrollment in the second annual short course to be conducted jointly by the American Oil Chemists' Society and the University of Illinois at Urbana on August 15-19, 1949. A limit of 150 registrants has been set tentatively, according to J. P. Harris, chairman.

B. H. Thurman

Speaker acceptances have been received from George Karnofsky, Blaw-Knox, Pittsburgh; A. E. Bailey, Girdler Corporation, Louisville, Ky.; C. E. Morris, Armour and Company, Chicago; G. A. Crapple, Wilson and Company, Chicago; Leo Brown, Swift and Company, Chicago; and B. H. Thurman, New York City consultant. Others who will speak, as announced in the April issue of the Journal, are W. H. Goss of Pillsbury Mills, Minneapolis; F. C. Vibrans, of American Meat Institute, Chicago; and B. F. Daubert, University of Pittsburgh. Several university men will also be on the faculty, including Prof. T. S. Hamilton.

All speakers are invited to stay for the duration of the course so they and their students alike may benefit by the exchange of ideas and friendly relations accruing from the group.

Fee for the course is \$20, payable to the national headquarters of the Society in Chicago in advance. Reservations for rooms should be made direct with the hotels: Inman hotel, Champaign (50 rooms); or the Urbana-Lincoln, Urbana (50 rooms); or the Men's Residence halls at the University of Illinois, in care of R. K. Newton, 205 Arcade building, Champaign, Illinois.

Theme of the course in 1949 will be similar to that of 1948: "The Production and Processing of Edible Fats" although a new division has been added, lard,

C. E. Morris

F. C. Vibrans

margarine, and all animal fats. As announced in the March issue of the Journal, the lectures all open at 8 a.m. daily, and the schedule is as follows:

August 15—Economics, chemistry, and composition in the morning; tour of the university's south farms in the afternoon; and get-acquainted hour in the evening.

August 16—Hydraulic and screw pressing, theory of solvent extraction, mechanics of solvent extraction, and rendering in the morning; refining symposium in the afternoon; symposium on nutritive value in the evening.

August 17—Theory and mechanics of hydrogenation, fundamentals and mechanics of deodorization in the morning; color symposium in the afternoon; and banquet in the evening, with address on "Future Planning for the Industry."

August 18—Stabilization and antioxidants, compounding and plasticizing, shortening, and emulsion products in the morning; trip to Allerton Estate in the afternoon for picnic and fish fry.

August 19—Field trip to Peoria.

In addition to Mr. Harris, members of the committee are A. R. Baldwin, R. R. King, H. R. Kraybill, and K. F. Mattil; for the university: Mr. Hamilton and R. K. Newton.
