Houston Prepares Welcome For 43rd Spring Meeting

MEMBERS of the American Oil Chemists' Society in Houston, Tex., are dusting off the welcome mat in preparation for the 43rd annual spring meeting to be held there at the Shamrock hotel, April 28-30, 1952, under the chairmanship of William Argue of Anderson, Clayton and Company.

H. D. Fincher

A. Cecil Wamble

Technical papers are being solicited by a program committee headed by J. D. Lindsay of Texas A & M College, College Station, Tex. His assistants are H. D. Fincher, W. D. Harris, Carl M. Lyman, and A. Cecil Wamble.

Hotel reservations should be made direct with John L. Schnake, at Box 2538, Houston, Tex. G. M. Kreutzer of Anderson, Clayton is chairman of the exhibits committee, thus innovating commercial displays at a spring meeting.

Special events will be the traditional golf tournament on the afternoon of April 29, the banquet that evening, an awards luncheon on the 30th, and the annual dinner of past presidents on the 28th. On Sunday, following the meeting of the Governing Board in the afternoon, at which A. E. Bailey will preside, there will be a surprise program for early comers. Mrs. Fincher is arranging the entertainment for the ladies. Plant trips are to be scheduled by J. K. Dixon.

On the business side of the annual meeting there will be reports by officers and committee chairmen, announcement of election of officers, and so on.

Election will be carried on by mail prior to the Houston meeting. Ballots will be sent out to active members on February 27, carrying a deadline of March 28 for voting. J. R. Mays Jr. of Barrow-Agee Laboratories, Memphis, Tenn., is chairman of the Nominating and Election Committee.

Announce Tentative Outline For Soap Short Course in July

A TENTATIVE outline of topics for the 1952 short course on soap and synthetic detergents, to be held July 6-11 at Rutgers University, New Brunswick, N. J., has been supplied by Foster Dee Snell of New York City, chairman of arrangements for the American Oil Chemists' Society. Rutgers is the state university of New Jersey, and the course will be conducted by the University Extension Division, of which M. A. Chaffee is director.

Program

Sunday, July 6

Registration and Mixer

Monday, July 7, Soap Raw Materials

Saturated and Unsaturated Fats, 8:30 a. m.
Pretreatment of Fats
Fat Splitting and Distillation
Chemicals and Future Fats
Plant Trips, 2 p. m.
Evaluation at the Consumer Level, 7:45 p.m.

Tuesday, July 8, Soap Processing

Soaps by Saponification, 8:30 a. m.
Soaps from Fatty Acids
Glycerine and Other By-Products
Soap Finishing
Plant Trips, 2 p. m.
Evaluation at the Industrial Level, 7:45 p. m.

Wednesday, July 9, Soap Properties

Building and Prebuilding, 8:30 a. m.
Performance Desiderata
Soap Packaging
Specialty Soaps Including Insoluble Soaps (Afternoon free)
Competition of Soaps and Syndets, 7:45 p. m.

Thursday, July 10, Surfactants and Syndets

Raw Materials, 8:30 a. m.
Sulfation and Sulfonation
Conversion to Form for Sale
Performance Desiderata
Plant Trips, 2 p. m.
Banquet, with speaker on "Economics of Soap Industry"

Friday, July 11, Evaluation Methods

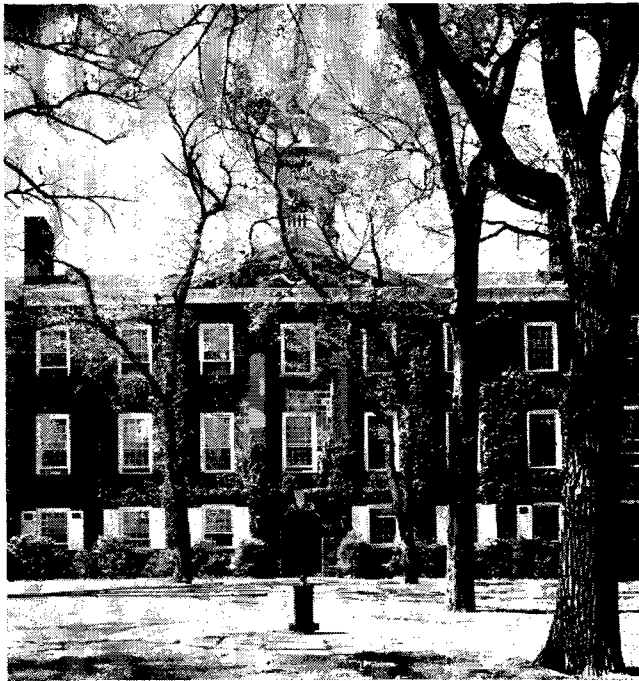

Chemical Analysis and Interpretation, 8:30 a. m.
Physical Analysis
Detergency Evaluation
Relation Between Structure and Detergency
Plant Trips, 2 p. m.

Demarest hall will be used for housing, dining, and classes. Students will be expected to live on the campus. Enrollment will be limited to 200, and the fee will be \$90 (\$50 for room and board, \$40 for registration). Applications with fee should be sent to the national headquarters of the American Oil Chemists' Society, 35 E. Wacker drive, Chicago 1, Ill. Assignment of rooms will be made by the Society office.

ASSISTING Dr. Snell in arrangements for the short course, the fourth to be given by the Society, is the following committee:

- J. L. Hale, Swift and Company, Newark, N. J.—registration, mixer, and grouping for plant trips
- E. A. Sigworth, Industrial Chemical Sales Division, West Virginia Pulp and Paper Company, New York City—transportation
- Kenneth Johnson, Armour and Company—secretary
- P. E. Ronzone, C. F. Simonin's Sons Inc., Philadelphia—printed matter and supplies

The course will be under the supervision of the Society's Education Committee, of which J. P. Harris of Chicago is chairman. Previous courses have

Old Queen's, Rutgers University

been on edible oils in 1948 and 1949 at the University of Illinois and on drying oils in 1950 at the University of Minnesota. Proceedings of the 1949 and 1950 courses are available in bound form for \$2 and \$3, respectively, from the Society office.

Glycerine Cooperative Samples

REFER to page 28 of the November, 1951 Journal. The response to this announcement and to that of the Association of American Soap and Glycerine Producers Inc. has been very good. To date requests for 45 sets have been made. This does not include several glycerine producers that will be handled directly by the Glycerine Analysis Committee. Some of these will require more than one set.

The sample shipping list has been turned over to W. D. Pohle, chairman of the Glycerine Analysis Committee. It is hoped to make the first sample distribution not later than the middle of February. There are quite a number of laboratories which should be interested in participating in the analyses that have not been heard from. A prompt request should not be too late to be included.

A.O.C.S. SPECIAL GLYCERINE COMMITTEE
C. P. LONG, chairman

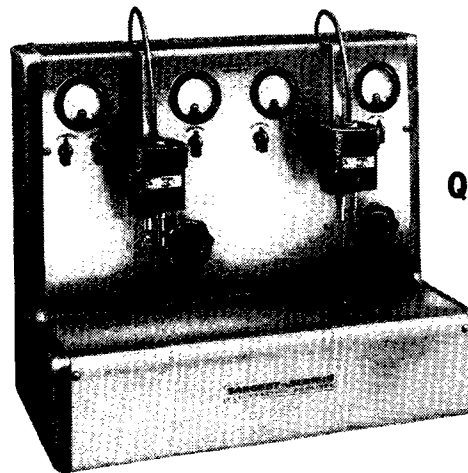

Committee Appointments

RECENT appointments to technical committees of the American Oil Chemists' Society by the president, A. E. Bailey, are as follows: Kenneth H. Fink, Armour and Company, Chicago, Ill., to the tallow and grease subcommittee of the Smalley Foundation Committee, of which R. W. Bates is chairman; Frederick W. Keith Jr., Sharples Corporation, Philadelphia, Pa., to the Soapstock Analysis Committee, of which J. L. Trauth is chairman; and Paul D. Cretien, Texas Testing Laboratories Inc., Dallas, Tex., to the Cellulose Yield Committee, of which L. N. Rogers is chairman. Mr. Cretien replaces P. A. Williams.

SARGENT-SLOMIN

Electrolytic Analyzers

★ IMMEDIATE SHIPMENT FROM STOCK

FOR
HIGH SPEED
QUANTITATIVE
ANALYSIS
OF...

- Ferrous and non-ferrous metals and alloys.
- Electroplating solutions and electro-deposits.
- Ores and minerals.
- Metals in biological materials.
- Metals in foods, soils, etc.
- Forensic materials.
- Micro and semi-micro specimens.

Designed for continuous trouble-free performance

The Sargent-Slomin Electrolytic Analyzer represents a complete re-design of the original Slomin instrument. Each unit is mounted within a case consisting of a one-piece stainless steel panel, beaker platform and apron with sturdy end castings. All models are completely self-contained and operate from 50-60 cycle electric circuits—no auxiliary generators or rheostats are required.

The two position analyzers consist of two complete, independently operating analyzer circuits. Duplicate or check analyses can be run at the same time.

The central electrode is rotated by a constant speed capacitor wound motor, operating at 550 r.p.m., especially engineered for this application.

Outstanding features of this rugged motor are:

Greater output than any motor of similar characteristics and size.
No internal switches or brushes.

No "permanent" magnets — full output for long service life.

No speed change with change of load.

All parts of the new electrode chucks are made of stainless steel.

These analyzers used with the specially designed high efficiency corrugated electrodes rapidly produce smooth, close grained deposits at maximum current density.

S-29460 ELECTROLYTIC ANALYZER—Sargent-Slomin, One Position, with Heating Plate. For operation from 115 Volt, 50-60 cycle circuits\$275.00

S-29465 ELECTROLYTIC ANALYZER—Sargent-Slomin, Two Position, with Heating Plate. For operation from 115 Volt, 50-60 cycle circuits\$415.00

S-29632 ANODE—Platinum gauze, Corrugated Form, High Speed. (Patent pending.) Price subject to market.

S-29672 CATHODE—Platinum gauze, Corrugated Form, High Speed. (Patent pending.) Price subject to market.
