

New Members

Active

- Roger F. Arnold, plant chemist, Emery Industries Inc., Cincinnati, O.
 Irvin Clarence Bentz, assistant chief engineer, Anderson, Clayton and Company, Houston, Tex.
 Walter C. Davis, director of engineering, John J. Harte Company, Atlanta, Ga.
 Chung Hwa Hwang, chemical engineer, Hwa Hong Manufacturing Company, Singapore, Malaya.
 Donald S. Kent, president and manager, Soc. An. Comercial Manuel Ferreira, Asuncion, Paraguay.
 Ralph M. Persell, chemical engineer, Southern Regional Research Laboratory, New Orleans, La.
 Elizabeth L. Primm, chemist, Chicago, Ill.
 Edward J. Reid, chemical engineer, Lever Brothers Company, Los Angeles, Calif.
 Robert H. Robertson, consultant in raw material department, Glasgow, Scotland.
 James W. Shigley, instructor in agricultural and biological chemistry, Pennsylvania State College, State College, Pa.
 Dimitri D. Siadimas, technical director, "Elma" Margarine and Oil Factory, Athens, Greece.
 Francis H. Thurber, chemist, Southern Regional Research Laboratory, New Orleans, La.

Individual Associate

- Wilbur F. Nicholson, works superintendent, South Texas Cotton Oil Company, Houston, Tex.

Corporation Associate

- Cotona Oil and Cake Mills Ltd., representative, Rupert Ingram, Germiston, South Africa.

J. G. Affleck recently joined the New Product Development Department of American Cyanamid Company, New York City. He formerly was employed in Cyanamid's Stamford Research Laboratories where he was chiefly connected with process development work.

De Laval Names Moore

N. HUNT MOORE will represent the DeLaval Separator N. Company in the sale of equipment in the vegetable oil industry in Memphis, Tenn., and the states of Mississippi, Ar-

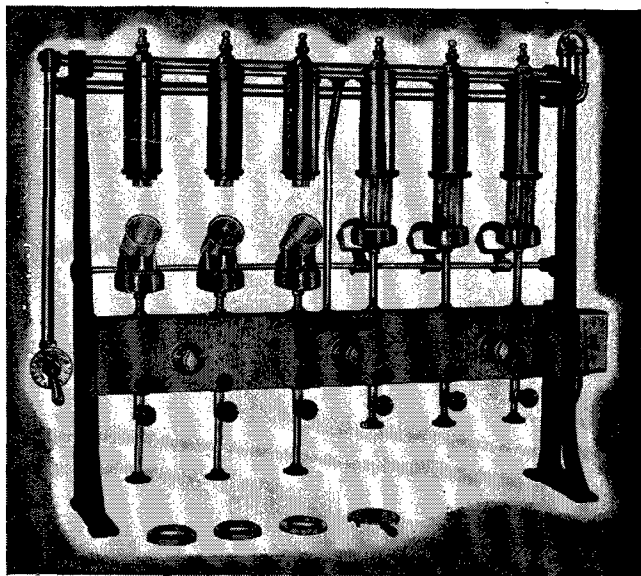

N. H. Moore

kansas, and Louisiana. Moore was graduated from the University of Tennessee in chemical engineering and has been employed by the Engineering Experiment Station, Knoxville, Tenn., and by the Allis-Chalmers Manufacturing Company, Milwaukee, Wis. In 1945 he became general superintendent of the Delta Products Company, Wilson, Ark., and later was made production and general manager of the combined operation of the cottonseed oil mill, the vegetable oil refinery, and the shortening and margarine plant. In 1951 Moore set up offices as a consulting engineer in the field of planning and installing new solvent extraction plants and the enlargement and improvement of existing solvent plants.

Will Publish Symposium Number

The special symposium number of Oils and Oilseeds Journal, published by the Oil Merchants' Chamber Ltd., Bombay, will be brought out within the second half of April 1952 to cover the proceedings of the Symposium on Indian Oils and Fats and Their Utilization which was held from Nov. 7-9, 1951, under the auspices of the National Chemical Laboratory of India at Poona.

Solvent Extractions "holding up the works"?

No. 3000 "GOLDFISCH" EXTRACTION APPARATUS
 Dimensions: 10" x 38" x 31" high. Available in 2, 4, and 6 capacity units, complete with all glassware and ready to operate.

Modernize with a

"GOLDFISCH" EXTRACTOR

Now, with "Goldfish" improved extraction apparatus, you can do the same work that used to take all day in just 2 to 4 hours! For, due to automatic release and seal of the condensation chamber, vaporized solvent condenses quickly, steps up your extraction process. This unique extractor also reclaims a high percentage of solvent, operates safely in open rooms, soon pays for itself in time and labor saved.

"Goldfish" apparatus won't change your present methods; it will speed them up so that controls can keep pace with increased production. Write for full details . . . today!
