

Appoints Chairmen for Los Angeles Meeting in September

Committee appointments for the 33rd annual fall meeting of the American Oil Chemists' Society, to be held in Los Angeles September 28-30, 1959, are announced by the general chairman, H. C. Bennett, of the Los Angeles Soap Company.

Advisory—John Morrisroe, Pilot California Company
Willard D. York, Emery Industries Inc.
Arrangements—David Porter, Los Angeles Soap Company
Banquet—John Schierbeck, Smith-Emery Company
Entertainment—Richard Beedle, Gooch Laboratories
Exhibits—Joseph Michaelson, Applied Biological Sciences Laboratory
Harold Gilmore, consultant
General—Lester Leenerts, Purcx Corporation
William Skardo, Lever Brothers Company
Hotel—George Busby, Los Angeles Soap Company
Ladies—Mrs. Lester Leenerts
Printing—Bruce Clark, Procter and Gamble Company
Program—Roslyn Alfin-Slater, University of Southern California
Publicity—R. L. Olson, Emery Industries Inc.
Reception—George Benck, Braun Chemical Company
Registration—Richard Atwood, Pilot California Company

The meeting will be held in the Statler Hilton hotel, with "Saludos Amigos" as the theme. The Golden State room and the Los Angeles room have been chosen for the technical sessions. Exhibits will be displayed in the Garden room overlooking the pool and garden below. About half of the available space has already been reserved.

The technical program will deal with soaps, detergents, fish oils, polyunsaturated fatty acids, polymerized oils, edible and inedible oils, shortenings, and so on. Abstracts should be about 200 words in length and should be submitted in triplicate by June 15.

Field tours will be arranged with local industry. The ladies will have a trip to Hollywood and the TV and movie studios, with fashion shows, teas, and luncheon besides.

Bond Award Given to ERRL Ms.

Winners of the Bond award for the best paper of the year were Joseph E. Coleman and Daniel Swern of Eastern Regional Research Laboratory, U.S.D.A., Philadelphia, for their paper entitled "Oxidation of Olefins with Potassium Permanganate in Oil/Water Emulsion," which was presented at the 1958 fall meeting of the American Oil Chemists' Society in Chicago and published in the December issue of the *Journal of the A.O.C.S.*

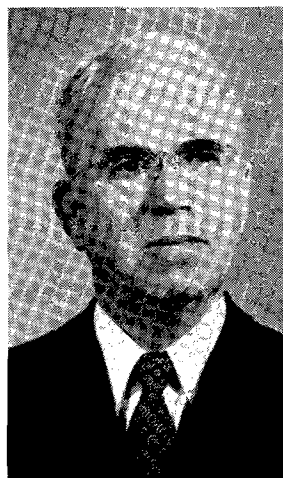

Presentation was made at the 50th anniversary meeting of the Society in New Orleans at the Roosevelt hotel on April 20.

The award is a gold medal for the person delivering the paper and a certificate to co-authors. Oral presentation is given 60 points, and preparation of the manuscript 40 points. The purpose is to stimulate interest in presenting papers before the Society and in improving the over-all quality of the presentation and the manuscript.

For 1959 the judges will consider papers given at the New Orleans meeting in April and the September 28-30 meeting in Los Angeles. The award will be bestowed at the Dallas spring meeting in 1960.

The organization committee for the Bond award, which has been established by an anonymous donor, has comprised A. R. Baldwin, Cargill Inc., Minneapolis, as chairman; W. O. Lundberg, Hormel Institute, Austin, Minn.; and D. H. Wheeler, General Mills Inc., Minneapolis.

R. M. Evans, director, Color Technology Division, Eastman Kodak Company, Rochester, N.Y., has been selected to be the second recipient of the Godlove Award of the Inter-Society Color Council, for his outstanding contributions to the knowledge of color in science, art, and industry.

H. C. Bennett

Roslyn Alfin-Slater

• *New Members*

Active

- Muhammad Ahmad Ansari, chief chemist, Maqbool Company Ltd., Karachi, West Pakistan
- Rodolfo Roberto Brenner, head professor of biological chemistry, Facultad de Ciencias Medicas, Universidad Nacional de la Plata, La Plata, Argentina
- Edgar Allan Day, assistant professor, Oregon State College, Corvallis, Ore.
- Robert W. Gressang, chemical engineer, West Virginia Pulp and Paper Company, Charleston, S. C.
- Dustin H. Griffin, assistant vice president and assistant treasurer, Hunter Packing Company, East St. Louis, Ill.
- Wallace B. Jacobs, chemist, Harshaw Chemical Company, Cleveland, O.
- David Karp, technical and research director, AB WASA Spisbroedsfabrik, Filipstad, Sweden
- Norman V. Lovegren, chemist, Southern Regional Research Laboratory, New Orleans, La.
- Giovanni Riccardo Matarrese, director of production control and research, Societa Internazionale Olearia, Modena, Italy
- Richard W. Murphy, process engineer, Archer-Daniels-Midland Company, Minneapolis, Minn.
- Robert Arthur Piper, manager, midwestern region, Beckman Instruments Inc., Chicago, Ill.
- Hubert Dudley Reeves, general superintendent, Plains Cooperative Oil Mill, Lubbock, Tex.
- Bernard Reynolds, control analytical chemist, Central Soya Company Inc., Chicago, Ill.
- Donald James Schwedler, laboratory and research director, Calusa Chemical Company, Los Angeles, Calif.
- Louise B. Thiele, research chemist, Purex Corporation Ltd., South Gate, Calif.
- Antonette Trinchese, chemist, Emulsol Egg Products Corporation, Chicago, Ill.
- James V. Wilkerson, plant superintendent, edible oils, Armour and Company, Chicago, Ill.
- Donald Langford Wood, organic chemist, Southern Regional Research Laboratory, New Orleans, La.

Corporation Associate

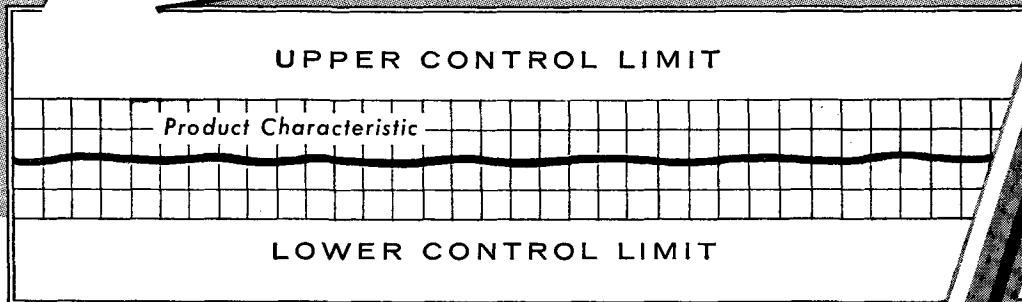

- Cargill Inc., James R. Randall, plant supervisor, Minneapolis, Minn.
- Coleman Instruments Inc., Maywood, Ill.
- Far East Superintendence Company Ltd., Kobe, Japan
- Stratford Engineering Corporation, Ward A. Graham, sales engineer, Kansas City, Mo.

A NOTE TO OIL HYDROGENATORS

The Superiority of

RUFERT NICKEL CATALYST FLAKES

lies in its Predictable, Uniform Behavior!

The Oil Hydrogenator increases production efficiency by specifying Rufert Nickel Catalyst Flakes.

- He can depend on a uniform behavior, because Rufert Catalyst is made with the finest materials, under careful manufacturing control.
- He can count on increased output, because Rufert Catalyst speeds oil's acceptance of hydrogen.
- He can be sure Rufert Catalyst will stay purer longer, because of its strong resistance to poison.
- AND, he'll get his catalyst *when he wants it*, because Harshaw produces in quantity.

Please ask us to explain further how Rufert Nickel Catalyst can simplify your catalyst application. Write or call our nearest office.
