Active

- Clyde Aders, head, Refinery and Technical Products Division of General Superintendent's Office, Swift and Company, Chicago, Ill.
- Theodore Franklin Bradley, head, Plastics and Resins Department, Shell Development Company, Emeryville, Calif.
- George Christianson, research biochemist, Rath Packing Company, Waterloo, Ia.
- Herbert L. Davis, associate research professor, Biochemistry and Surgery, College of Medicine, University of Nebraska, Omaha, Neb.
- William Regis Driscoll, technical staff, Fine Chemical Division, Hoffman-La Roche Inc., Nutley, N.J.
- Raymond C. Foster, chief chemist, Chicago Laboratories, Best Foods, Division of Corn Products Company, Chicago, Ill.
- Duane G. Gallo, senior chemist, Mead Johnson and Company, Evansville, Ind.
- George Edward Lindemulder, supervisor, Resin Research, Grand Rapids Varnish Corporation, Grand Rapids, Mich.
- William C. Krumrei, associate director, Foods Division, Procter and Gamble Company, Cincinnati, O.
- Helmut K. Mangold, assistant professor, Hormel Institute, University of Minnesota, Austin, Minn.
- James Francis McGhie, reader in organic chemistry, Chelsea College of Science and Technology, London, England
- Stanley Nesheim, chemist, U.S. Department of Health, Education, and Welfare, Food and Drug Administration, Washington, D.C.
- Yook C. Ng, assistant professor, Department of Biochemistry, College of Medicine, University of Nebraska, Omaha, Neb.
- Richard Arthur Phelps, assistant director, Research and Educational Division, National Cottonseed Products Association, Dallas, Tex.
- Doyle Winford Ramey, research chemist, Swift and Company, Chicago, Ill.
- Vincent F. Scorese, quality control chemist, Best Foods, Division of Corn Products Company, Bayonne, N.J.
- Shoji Takahashi, chief engineer and director, Showa Sangyo Company Ltd., Tokyo, Japan
- Juan Maria Vidal Valls, director tecnico gerente, Industrias Quimicas Monje S.A., Monje, Santa Fe, Argentina

Individual Associate

- William Glenn Garlough, manager, Sales Research, Knowlton Brothers Inc., Watertown, N.Y.
- Bobby M. Jordan, chemist, Cudahy Packing Company, Memphis, Tenn.
- John L. Iverson, chemist, Food and Drug Administration, Washington, D.C.
- Basil N. Zoullas, executive, Intercom Inc., N.Y.

Corporation Associate

Industrias Quimicas Monje S.A., Santa Fe, Argentina

Named to Committee

R. A. Reck, Armour Chemical Division, La Grange, Ill., has been appointed to the Fat Analysis Committee of the American Oil Chemists' Society by V. C. Mehlenbacher, chairman, with the approval of R. W. Bates, president. Mr. Reck will serve on three subcommittees: commercial fatty acids, gas chromatography, and nitrogen derivatives.

Edward L. Gordy (1935), research and development, Standard Oil Company, Chicago, was presented with the 1960 Honor Scroll award of the Chicago chapter, American Institute of Chemists, at the Furniture club on October 11, 1960.

George Barsky (1958), president of Barsky and Strauss Inc., has moved his business in New York to 50 East 41st street.

A. R. Johnson (1956) is working with F. B. Shorland in the Fats Research Laboratory, Government Buildings, Wellington, New Zealand. He was formerly with the University of Adelaide, South Australia.

A. M. Altschul (1942), planning chairman for the November 14-16 conference on "Cottonseed Protein for Animal and Man" at New Orleans, La., for the Southern Utilization Research and Development Division, U.S.D.A., announces his committee members: L. E. Allen, Richard Phelps, V. L. Frampton, T. H. Hopper, E. L. Patton, and R. M. Persell.

Tall Oil Is Subject of Northeast Program

F. B. White, chairman of the program committee for the Northeast Section of the American Oil Chemists' Society, has announced that a panel discussion on economic and marketing factors effecting the production, grades, and availability of tall oil has been planned for the December 6 meeting at Whyte's Restaurant, New York City. C. T. Fiscella, Union Bag-Camp Paper Corporation, is in charge of this special program.

D. E. Campbell, secretary-treasurer of the Pulp Chemicals Association, is the main speaker and moderator for the panel discussion. Panel members are J. M. Wafer, vice president in charge of chemical sales, West Virginia Pulp and Paper Company; J. H. Ruskin, president, Arizona Chemical Company; C. T. Eurenium, assistant general manager of the Paper Makers Chemical department, Hercules Powder Company; and D. R. Eagleson, assistant sales manager of Emery Industries Inc.

New York Report to Come

A full report of the 34th annual fall meeting of the American Oil Chemists' Society, held October 17-19 at the Hotel New Yorker in New York, will be given in the December issue of the Journal. Pictures will help tell the story of the convention, and there will be a summary of the technical papers and an account of social activities.
