Know your antioxidants!

Their intelligent use can protect your product's reputation

Which Antioxidant?

Longer shelf-life, gained through the intelligent use of antioxidants, has often spelled the difference between success and failure in marketing a food product. Key to the intelligent use of antioxidants is an understanding of their function. An easy way to obtain that understanding is through the following pieces of literature:

- Tenox—Eastman food-grade antioxidants
- The Eastman family of Tenox food-grade antioxidants
- Which antioxidants for your fat-containing foods?
- Tenox antioxidants for more effective food packaging materials
- Tenox antioxidants for edible animal fats
- Effective stabilization of inedible animal fats with Tenox
- Tenox feed-grade antioxidants for poultry and animal feeds
- Tenox antioxidants for the fishing industry
- Mechanisms of fat oxidation

Eastman manufactures all the principal types of food-grade antioxidants in use today. We can, therefore, suggest without bias the most effective antioxidant for your product. For any of this literature about antioxidants, write to EASTMAN CHEMICAL PRODUCTS, INC., subsidiary of Eastman Kodak Company, KINGSPORT, TENNESSEE.
