

Easy does it

Vitamin A fortification of food is as simple as opening a can of MYVAPACK® Vitamin A and pouring. One can precisely fortifies one batch. The cans are available with color-coded labels. Their contents can include vitamin D and carotene or other acceptable colorants custom-blended with the vitamin A.

Another easy way to fortify foods is with our vitamin A in bulk—oil or dry. Once you've decided, you'll get fast response from **Distillation Products Industries, Rochester, N. Y. 14603** (Division of Eastman Kodak Company). West Coast distributor: W. M. Gillies, Inc.

Meetings

AOCS National Meetings

1967—New Orleans, Roosevelt Hotel, May 7-10.
