## AOCS Pollution Control Symposium Planned for AOCS Spring Meeting

AOCS has scheduled a Symposium on Water Pollution Control for the Spring Meeting in New Orleans, April 26-30, 1970. Chairman of the Symposium will be C. F.

C. F. Gurnham

Gurnham of Gurnham and Associates, Pollution Control Engineers. Dr. Gurnham is an internationally recognized authority on industrial wastewater technology and the author of two books and many technical papers on industrial wastewater control. He has been actively involved in analyzing and developing solutions for waste disposal problems in electroplating and metal finishing plants, textile mills, communities with considerable industry, dairies, copper mines and smelters, and water sheds.

You are invited to submit papers for this symposium, to be sent as soon as possible. The present tentative plan is to have each paper emphasize a particular phase of pollution control, such as single unit operation, to be discussed from the case history point of view. Other suitable topics are also welcome and will be carefully considered.

Please send all papers to C. Fred Gurnham, Gurnham and Associates, Inc., 223 West Jackson Blvd., Chicago, Ill. 60606.

## Cereal Chemists Change Meeting Dates

Future Annual Meetings of the Association of Cereal Chemists have been rescheduled effective with the 1970 Convention. The AACC will move its meetings from spring to fall as a result of a recent vote by the membership. Having met in the spring of the year since the Society was founded over fifty years ago, the new dates will be a real break with tradition. However, the increasingly crowded spring meeting schedule of food-oriented Societies made the switch highly desirable. It is hoped that a larger percentage of AACC members will be able to attend the rescheduled meetings. The first change will take place in 1970 when the AACC's 55th Annual Meeting will be held October 18-22 in Minneapolis. It had been originally scheduled for April 19-23. The Dallas meeting in 1971 will be held October 10-14. New cities and dates are being planned for 1972 and 1973.
