

# Minneapolis—City of Lakes

Will Host the

## AOCS 43rd Fall Meeting

Leamington Hotel. October 5-8, 1969

### W. E. Link Issues Call For Papers

W. E. Link, Chairman of the Technical Program Committee, has issued the first call for papers for the 1969 Fall Meeting. Papers are welcomed on any phase of research and development concerned with lipids, fats and oils. These include such subjects as fatty acids and their derivatives, analytical and statistical methodology, processing and utilization, chemical reactions, physical properties and biochemistry and nutrition. The goal of the entire Committee is to present a balanced technical program which will make the Minneapolis Fall Meeting a must.

### Centennial Session On Margarine Highlights Symposia

Special symposia have been organized which will be timely and interesting to scientists and technologists in all walks of fats and oils investigation and utilization. Included are several contributions from outside the United States. Particularly noteworthy is a symposium on margarine sponsored by the National Association of Margarine Manufacturers and commemorating the centennial of the invention of margarine in France during the Franco-Prussian War -- an invention which won a prize offered by Napoleon III.

Other symposia in the formative stages are as follows:

*Biosynthesis of Unsaturated and Oxygenated Fatty Acids* -- Lindsay Morris, Unilever Research, England.

*Branched-Chain Fatty Acids* -- R. G. Ackman, Fisheries Research Board of Canada.

*Ether-Linked Neutral Glycerides* -- Randall Wood, Oakridge Associated University.

*Fatty Chemicals in Ore Flotation* -- J. Hartlage, Ashland Chemical Company, Minneapolis.

*Marketing of Fatty Products* -- Herbert Fineberg, Ashland Chemical Company, Minneapolis.

*Role of Computers in Fat Chemistry* -- R. O. Butterfield, Northern Regional Laboratory, USDA.

*Solvent Extraction* -- N. H. Witte, Central Soya.

*Statistical Applications* -- Horace Andrews, Rutgers University.

*Surfactants in Paints* -- Edmund Harvey, Jr., Interchemical Corporation.

*Tall Oil* -- J. P. Krumbein, Tenneco Chemicals, Pensacola.

*Wide Line NMR* -- William Bosin, Pillsbury, Minneapolis.

The Program Committee is proposing sessions on other subjects including dairy substitutes, salmonella, unit processes, soaps and detergents, analytical separations, food additives, instrumental analyses and fatty derivatives.

### Deadline for Abstracts

June 15, 1969

In order that the technical program and abstracts of papers may be published before the meeting, it is necessary that the author submit two copies of a 100 to 300 word abstract with title, author, and speaker before the deadline, June 15.

All correspondence should be directed to: Dr. William E. Link, ASHLAND CHEMICAL COMPANY, Research Department, Bloomington, Minnesota 55420.

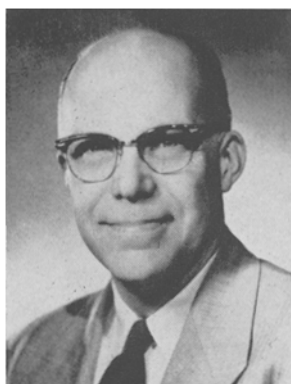

Members of Dr. Link's Technical Program Committee are: J. C. Cowan, Northern Regional Laboratories, USDA, Peoria, Illinois; R. T. Holman, Hormel Institute, Austin, Minnesota; P. J. Menardi, Ashland Chemical Company, Minneapolis, Minnesota; G. G. Wilson, General Mills, Minneapolis, Minnesota; C. G. Youngs, National Research Council, Saskatoon, Saskatchewan, Canada.

Please submit your paper as soon as possible, but in no event later than June 15, 1969 since papers cannot be accepted after that date.

*The Committee for the Minneapolis meeting is working diligently to make sure that all of the ingredients for a successful meeting will be mixed together in the proper proportions so that October 5 to October 8 will be circled on your 1969 calendar as "must" dates reserved for the Fall AOCS Meeting. Past AOCS meetings have highlighted the more important elements for a successful meeting. Minneapolis intends to put the recipe to work:*

- a balanced and wide-ranging technical program,
- spiced with the proper dash of fun and entertainment time,
- with exhibits to show the latest in equipment and supplies,
- and a program for the ladies with time to go places and see things, shop, or just rest those tired and happy feet,
- all mixed together in a conveniently located hotel with ample space to gather together to talk shop, attend technical sessions or participate in committee activities.

*Details of the meeting and progress reports on the program development will appear in succeeding issues of The Journal.*

D. H. Wheeler  
General Chairman

W. E. Link  
Technical Chairman
