**Greatest Advance Since the
 Typewriter was Invented!
 No More Smearly Erasing—
 Covers Mistakes Instantly,
 Permanently!**

SELF-CORRECTING TYPEWRITER RIBBON!

Most exciting, needed advance since the typewriter was invented! As of this moment, every messy, smudgy, smearly typewriter eraser in the world hits the scrap heap for good. No more erasing—ever! Bottom half of miracle ribbon is like a magic wand that makes errors disappear before your eyes. To make corrections, just back space, shift ribbon selector and retype error. Presto! White ink makes error completely invisible. Order extra ribbons for friends. This is one gift they'll love you for! No CODs.

This is a questionnaire about Custom Catalysts.

Only this time you ask the questions.

And the answers come from Chemetron's Catalysts Division. From our Product Manager who knows about the research and manufacturing capabilities of our confidential custom catalysts service.

Just write, in the space below, your catalyst question(s). Be specific, but be as expansive as your time allows.

Ask *anything*. And remember, when you ask us about a custom catalyst, you don't have to tell us why you're asking.

Send your questionnaire (or use your own letterhead) to: Chemetron Corporation, Catalysts Division, P. O. Box 337, Louisville, KY 40201.

You'll get a prompt reply. With the answers. And complete security.

The favorites on the right are fine products—but they can't be much help in lowering your meal cooling and processing costs. The French Oil Machinery Company engineered, manufactured and tested the Stationary Louver Meal Cooler to make it the most efficient, most dependable and most accepted meal cooler on the market.

French Stationary Louver Meal Coolers trim first costs, help lower installation and maintenance costs due to a more compact design that offers maximum cooling capacity with minimum floor space. Avail-

able in four models for continuous meal cooling in capacities up to 1,200 tons per day, French Meal Coolers utilize naturally-occurring air during the cooling process for lower operating costs and more uniform, trouble-free service. If you're interested in lower operating costs and increased product profitability for your operation, check with the experts at French. Throughout the industry, French means the sweet smell of success.

Again this year... users of Pope Kjeldahl Mixtures placed 1 & 2 in the Smalley sample series check for nitrogen!

Year after year, users of Pope Kjeldahl Mixtures place high in the Smalley check sample series for nitrogen. Pope Kjeldahl Mixtures mean a lot to users . . . they mean economy, convenience and complete accuracy! Pope-Kjeldahl knows that time means money, that's why they ship almost every order within 24 hours after it is received. Pope Kjeldahl Mixtures are blended and packaged in bulk. They're mechanically blended from nitrogen free products to give you free flowing, dust free and completely uniform consistency. All A.O.A.C. and A.O.C.S. formulas are available in bulk at bulk rate prices. We can also make up your specific formula.

FREE \$35 Pope dispenser

with your initial order of 100 pounds. One pull dispenses an accurate amount, pre-set for your particular formula.

1973-74 SMALLEY CHECK SAMPLE PROGRAM

The Smalley Committee annually offers a number of Check Sample Series in various analytical categories. Interested analysts should write to Smalley Committee, AOCS, 508 S. Sixth St., Champaign, Illinois 61820, prior to July 15, 1973 for order forms and complete information, which will be distributed before each series begins.

The following Check Sample Series (the number of samples being shown in parentheses) are offered:

| | | |
|--------------------|---------------------|--------------------------|
| Cottonseed (10) | Oilseed Meals (15) | Cottonseed Oil (4) |
| Soybeans (10) | Edible Fats (5) | Soybean Oil (4) |
| Peanuts (7) | Drying Oils (6) | Copra (4) |
| Safflower Seed (7) | Tallow & Grease (5) | N.I.O.P. Fats & Oils (5) |

Gas Chromatography (fatty acid composition) (6)

Cellulose Yield (cotton linters) (10)

Additional series will be offered should sufficient interest be indicated. Please advise the Smalley Committee of series you feel would be of value.

W.T. Coleman, Chairman, Smalley Committee
