

Rutgers dedicates Food Science Building

AOCS past-president Stephen S. Chang has moved his laboratories for the study of chemistry and technology of edible fats and oils and chemistry of flavor and odor of foods into the new \$4.5 million Rutgers Food Science Building which was dedicated on March 20, 1973. The new building, with 80,000 ft² of space, is the home for 16 faculty members of the Food Science Department. Their research and teaching programs range from food processing and engineering, packaging, nutrition, toxicology, microbiology, dairy chemistry and technology, to chemistry and biochemistry of foods.

The new Food Science Building has its own library and cafeteria, and an auditorium that seats 196 persons. Besides research facilities, it also has pilot plants and classrooms.

Among the new facilities added to the oil and flavor laboratories are a library for collections of IR and mass spectra and a new DuPont mass spectrometer coupled with a Varian gas chromatograph. Chang has expressed a sincere welcome for AOCS members to visit his new facilities. ■

NSCIC announces '72 Soybean Efficiency Awards

Managing director of the National Soybean Crop Improvement Council, Bob Judd, has announced the winners of the NSCIC Soybean Efficiency Awards for 1972. The winners—selected by a panel of soybean experts from detailed summaries of these growers' production practices and 5 year yields—are: in the midwest, Felix Witt, Jasper, Mich.; in the midsouth, Floyd G. Dabbs, Stuttgart, Ark., and in the southeast, William Peace, Sr., Hanover, Va.

The NSCIC awards are made to recognize the accomplishment of growers who consistently realize high yields on their entire bean acreage. As such, their production practices are of special value to other growers looking for ways to improve their average farmwide yields as they go into the 1973 planting season. ■
