

If you're testing for protein or fat... put Foss to the test.

We'll give you free proof that Foss does a superior testing job at low cost.

We will show you: high testing speed—high accuracy—superior reproducibility—simple test procedure—small floor space requirement—safety of operation—durability of equipment—ideal for quality control—unexcelled as a screening device in process control.

A hint of proof... Kjell-Foss protein test results every 3 minutes using standard Kjeldahl chemistry—Foss-Let fat content results in 5 minutes. These instruments will meet all your requirements on raw or processed meat, agricultural and processed food products... even frozen foods.

There's a lot more proof, too. The complete story is available from Foss America. The testing instrumentation people. Get in touch with them today.
