

Keith, Hahn

top Smalley entrants

Horace, J. Keith, laboratory supervisor at Anderson Clayton & Co., has won the Smalley Cup for 1976-77, and Edward R. Hahn, owner of Hahn Laboratories, has received the R.T. Doughtie Jr. Cup for the 1976-77 Smalley Check Sample Program.

Keith received the award for the highest proficiency in the combined determination of moisture, oil, and nitrogen in the oilseed meal series. It is the second consecutive year Keith has won the cup.

Hahn received his award for the highest proficiency in the analysis of cottonseed.

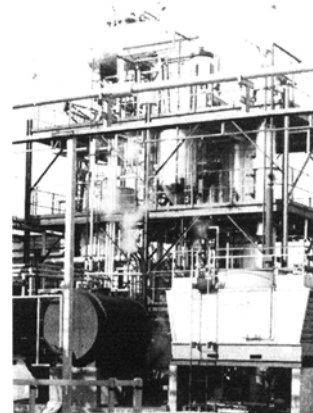

Certificates of proficiency were awarded to 92 chemists in 23 categories for the 19 samples series offered this past year. First place certificates and the Smalley and Doughtie Cup Awards were presented during the AOCS 68th Annual Meeting in New York City.

During the coming year, participants may select from 20 sample series including oilseed meal, cottonseed, soybean, peanuts, tallow and grease, vegetable oils, and others. Fish by-product series were added this year.

During the past year 332 individual chemists enrolled for 818 separate sample series which involved the distribution of 6,069 samples for analysis. Jim Ridlehuber, chairman for the Smalley program, offered a special thank you to committee members who donated time and materials for the program.

A full list of all first place certificate recipients will be published in the July *JAACS*. Chemists seeking to participate in this year's program may write to AOCS Headquarters, 508 S. Sixth St., Champaign, IL 61820, for full information.

SMALLEY

CHECK

SAMPLE

PROGRAM

Interested analysts should write to Smalley Committee, AOCS, 508 S. Sixth St., Champaign, IL 61820, prior to July 31, 1977, for order forms and complete information, which will be distributed before each series begins.

The following Check Sample Series (the number of samples being shown in parentheses) are offered:

Cottonseed (10)	Oilseed Meals (15)	Cottonseed Oil (4)
Soybeans (10)	Edible Fats (5)	Soybean Oil (4)
Peanuts (7)	Drying Oils (6)	Safflower, Sunflower, and Rape (10)
Vegetable Oil for Color (4)	Tallow & Grease (5)	NIOP Fats & Oils (5)
Fish Meal (8)	Condensed Fish Solubles (8)	Fish Oil (8)

Gas Chromatography (fatty acid composition) (6)
Cellulose Yield (cotton linters) (10)
Aflatoxins (cottonseed products) (6)
Aflatoxins (peanut products) (6)
Aflatoxins (corn products) (6)

Additional series will be offered should sufficient interest be indicated. Please advise the Smalley Committee of series you feel would be of value.

Jim Ridlehuber, Chairman, Smalley Committee
