### 22nd ICBL to be in Milan

The 22nd International Conference on the Biochemistry of Lipids will be held May 26-28, 1980, in Milan.

Topics to be discussed include: fatty acid metabolism and nutrition; cholesterol and bile acid metabolism; and hepatic and extrahepatic lipoprotein lipases. Meeting cochairmen are Drs. Rodolfo Paoletti and Giovanni Galli of the Institute of Pharmacology and Pharmacognosy in Milan.

Further information will be available from: Centro Studi dell' Alimentazione; NFI (Nutrition Foundation of Italy); Via S. Pietro all 'Orto 17; 20120 Milan, Italy (tele: 02-709-514).

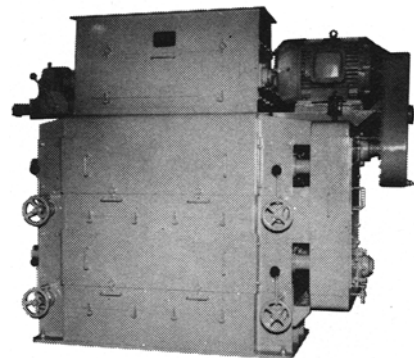

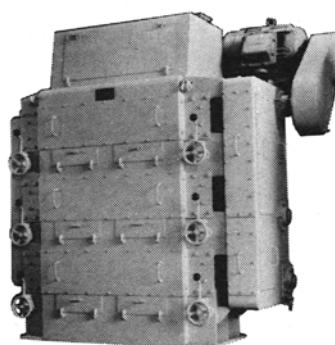

### Margarine program in Paris

"Information Day: Margarine" will be held Dec. 17-18, 1979, in Paris under sponsorship of the L'Institut des Corps Gras and the Chambre Syndicate de la Margarinerie—Trade Union Committee for Margarine Producers.

The meeting will be similar to the program held ten years ago to mark the 100th anniversary of the invention of margarine. The first day will include papers dealing with expectations about margarine, with information from and for nutritionists, analysts, biologists and related personnel. The second day will deal with how those needs may be met by producers.

Persons seeking further information or who wish to attend should write to the Institut des Corps Gras, 5 Boulevard Latour-Maubourg, 75007 Paris, France.

# THE ROSKAMP 'EDGE'

## 10 x 42 CRACKING ROLL MILLS

- Best quality deep-chilled iron rolls.
- All rolls come out front for quickest, easiest access.
- Extra heavy-duty frame construction for greatest rigidity.
- Best for cracking, crumbling, crimping, grinding of all friable materials.
- Choice of 2 big-capacity units — 3-pair-high with vibratory feeder — or 2-pair-high with rotary feeder.
- A perfect companion to the Roskamp 28 x 52 Flaking Mill.

Time and again, customers tell us the Roskamp-Langhurst 10 x 42 Cracking Mill has the 'edge' over other mills they have used — in several areas:

A consistently greater uniformity of particle size reduction with lower fines; The finest quality, most rugged rolls in the business for more precise cracking and rolling capability; Requires less maintenance and attending care because it's the heaviest-built mill of all.

See the 'edge' Roskamp 10 x 42 mills give you. Phone, write for Bulletin RCM-79.
