## Witco to expand capacity

Witco Chemical Corp. has announced plans to double its production of biodegradable detergent alkylate to 90 million pounds a year from the present 45 million pounds.

Witco says a \$12 million addition to its Witfield Division unit at Carson, California, will be completed in early 1981. The expansion also will provide facilities to manufacture

other products related to detergent alkylate for captive use by Witco.

The firm also announced plans to expand its capacity to manufacture industrial surfactants at its Houston, TX, plant. The new process will provide improved quality calcium sulfonate, used to produce agricultural and oil field surfactants, Witco said. ●
