## Referee chemist list adjusted

The AOCS Examination Board has modified its 1979-80 list of official referee chemists to delete Donald Britton at Barrow-Agee Laboratories in Memphis, Tennessee, from the list for "Cottonseed, soybeans, oil cake and meal, protein

concentrate, cottonseed oil, soybean oil and other fatty oils, tallow and grease, fish meal, fish oil and fish solubles." Mr. Britton is no longer with the firm and as certification applies to both the individual and the laboratory, the separation required a change in the list of Official Referee Chemists. □

## Official Notice of Proposed Amendments

Copies of proposed amendments to the American Oil Chemists' Society's articles of incorporation and by-laws have been mailed to voting members, along with proxy ballots.

The proposed amendments are to be voted upon during the AOCS business meeting at 5:40 p.m. Sunday, April 27, 1980, as part of the 71st annual meeting of the society. The proposed changes were prepared by a special committee appointed several years ago by the Governing Board with instructions

to study the articles and recommend changes to reflect current practices.

Substantive changes include provisions to permit both vice-presidential candidates in the most recent election to serve on the Governing Board, to provide a special membership category for fully retired persons, and to change the state of incorporation from Louisiana to Illinois. Full details of the changes are outlined in the booklet mailed to voting members. Proxy ballots must be returned before the annual meeting to be valid at the meeting; members planning to attend the session in person need not return proxy ballots. On the proxy ballot form, the date for the meeting was listed as April 27, 1979; it should have read April 27, 1980.
